

Wolves Animal Families

Why are wolves known as the best hunters in the animal kingdom? This book contains helpful information that will help you understand and better appreciate these animals. How do they survive the jungle? What do they eat? Is it really possible to tame them? Open this book, read and find out!

Describes the habitat, physical characteristics, life cycle, behavior, and different types of wolves, one of the members of the dog family.

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

Learn about life in a wolf pack.

The perfect gift for dog lovers and readers of *Inside of a Dog* by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times bestselling book *The Genius of Dogs*, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend.

Shows woodland creatures--including bears, bobcats, deer, squirrels, foxes, and wolves--participating in family life, and describes their kinship structure, behavior, and environment.

Text and pictures present families of different kinds of animals doing their ordinary activities.

Filled with spectacular full-color images of the elusive wolf in its natural habitat, this compelling study provides an up close and personal glimpse into three families. View life through the eyes of these wild creatures as they hunt together for food, defend their territory against intruders, keep peace in their tightly knit group with strict social rules, and care lovingly for their pups, so they will grow up to meet the challenges of their environment. From basic wolf biology, the evolution of the species, and wolf body language to the structure and practical functioning of packs to recent triumphs in wolf conservation, *Wolves* pairs fascinating information about the species with spectacular full-color images of these elusive animals in their natural habitat.

When a group of wolves live together, it's called a pack. Learn about life inside a pack of wolves and why these animals like to stick together. Find out how living together with others helps wolves hunt for food, communicate with one another, and raise their young. The Capstone Interactive edition comes with simultaneous access for every student in your school and includes read aloud audio recorded by professional voice over artists.

From the world-famous couple who lived alongside a three-generation wolf pack, this book of inspiration, drawn from the wild, will fascinate animal and nature lovers alike. For six years Jim and Jamie Dutcher lived intimately with a pack of wolves, gaining their trust as no one has before. In this book the Dutchers reflect on the virtues they observed in wolf society and behavior. Each chapter exemplifies a principle, such as kindness, teamwork, playfulness, respect, curiosity, and compassion. Their heartfelt stories combine into a thought-provoking meditation on the values shared between the human and the animal world. Occasional photographs bring the wolves and their behaviors into absorbing focus.

The *Sea Wolves* sets out to disprove the notion of "the Big Bad Wolf," especially as it is applied to coastal wolves, a unique strain of wolf that lives in the rainforest along the Pacific coast of Canada. Genetically distinct from their inland cousins and from wolves in any other part of the world, coastal wolves can swim like otters and fish like the bears with whom they share the rainforest. Smaller than the gray wolves that live on the other side of the Coast Mountains, these wolves are highly social and fiercely intelligent creatures. Living in the isolated wilderness of the Great Bear Rainforest, coastal wolves have also enjoyed a unique relationship with man. The First Nations people, who have shared their territory for thousands of years, do not see them as a nuisance species but instead have long offered the wolf a place of respect and admiration within their culture. Illustrated with almost one hundred of Ian McAllister's magnificent photographs, *The Sea Wolves* presents a strong case for the importance of preserving the Great Bear Rainforest for the wolves, the bears and the other unique creatures that live there.

Perpetual animal favorites are revisited in this series, but with a new treatment. The familial life of penguins, meerkats, dolphins, lions, gorillas, and wolves is explored, allowing readers to see that animals have fascinating family dynamics, much like we do. Beautiful photographs introduce kids to each animal's habitat, while uncomplicated, engaging text explains the family roles within each animal group. A picture glossary in each book introduces nonfiction features to emerging readers and researchers.

Jeffrey Moussaieff Masson's "marvelous" (Jane Goodall) New York Times bestseller, *When Elephants Weep*, made us re-evaluate the emotional lives of animals. And in his follow-up New York Times bestseller, *Dogs Never Lie About Love*, Masson reflected with "intelligence and originality" (Los Angeles Times Sunday Book Review) on the emotional world of dogs. Now, in *The Emperor's Embrace*, Masson offers a remarkable look at one of the most fulfilling roles in the animal world: fatherhood. With fascinating insight, impeccable research, and captivating writing, controversial psychoanalyst Jeffrey Masson, a new father himself, introduces us to the world's best dads. He takes us to

such places as Antarctica, as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months, nestled beneath a special brood pouch. And he tells us how, once the babies hatch, the fathers snuggle the babies on their feet until the mother returns from her time at sea, feeding them a special milk-like substance until her arrival. Masson, a superb storyteller, showcases the extraordinary behavior of outstanding fathers, heroes among animals, including: the wolf -- and why wolves make good fathers and dogs don't the beaver, who encourages his young to cling to his tail as he navigates through ponds the sea horse, the only male animal that gives birth to its young the marmoset, the South American monkey who carries his babies for the first two years of their lives wherever he goes. Masson also examines nature's worst fathers: lions, langurs, bears -- and humans. He shows that when a father does care for his young, as with the beaver, we immediately look for a biological and not an emotional explanation. But Masson demonstrates that for these animals, as with humans, fatherhood is a profound, all-encompassing experience. Groundbreaking, compelling, inspirational, Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world, yet always returns to the heart. For animal lovers, fathers, mothers, sons, and daughters everywhere, *The Emperor's Embrace* is a book that will forever change our perceptions of parenthood and family love.

An anthology of nature writing including pieces on penguins, wolves, eagles, and beavers.

Alaska's wolves lost their fiercest advocate, Gordon Haber, when his research plane crashed in Denali National Park in 2009. Passionate, tenacious, and occasionally brash, Haber, a former hockey player and park ranger, devoted his life to Denali's wolves. He weathered brutal temperatures in the wild to document the wolves and provided exceptional insights into wolf behavior. Haber's writings and photographs reveal an astonishing degree of cooperation between wolf family members as they hunt, raise pups, and play, social behaviors and traditions previously unknown. With the wolves at risk of being destroyed by hunting and trapping, his studies advocated for a balanced approach to wolf management. His fieldwork registered as one of the longest studies in wildlife science and had a lasting impact on wolf policies. Haber's field notes, his extensive journals, and stories from friends all come together in *Among Wolves* to reveal much about both the wolves he studied and the researcher himself. Wolves continue to fascinate and polarize people, and Haber's work continues to resonate.

A Pack of Wolves Capstone

When a group of wolves live together, it's called a pack. Learn about life inside a pack of wolves and why these animals like to stick together. Find out how living together with others helps wolves hunt for food, communicate with one another, and raise their young.

"Describes how living in a family group helps wolves thrive in their environment. Life cycle, habitat, and interaction with people are explained"--

Describes the dynamics of a wolf pack, the way in which wolves hunt, and where they live.

Describes the physical characteristics, behavior, habitat, and endangered status of gray wolves.

A look at the intriguing world of wolves.

Read Along or Enhanced eBook: Students will love learning about the way of life of wolves and the challenges they face as babies and adults. An exciting narrative format supported by fun facts, questions, and activities, tells the story of gray wolves who live in highly structured social units called packs. A pack has one breeding pair and their offspring, and may include older siblings or wolves from other packs. This delightful adventure story starts with the excitement created by the

birth of newborn cubs and how the other members of the pack bond with them. The cubs are taught vocal and physical communication and soon learn to hunt with the pack. This exciting story will enrich students' understanding of the importance of gray wolves to ecosystems in North America. Young readers will be amazed by how much the lives of wolves mimic their own lives!

Describes the life and behavior of the wolf, including remarks on conservation of the species.

The most complete and user-friendly photographic field guide to the world's canids This stunningly illustrated and easy-to-use field guide covers every species of the world's canids, from the Gray Wolf of North America to the dholes of Asia, from African jackals to the South American Bush Dog. It features more than 150 superb color plates depicting every kind of canid and detailed facing-page species accounts that describe key identification features, morphology, distribution, subspeciation, habitat, and conservation status in the wild. The book also includes distribution maps and tips on where to observe each species, making Canids of the World the most comprehensive and user-friendly guide to these intriguing and spectacular mammals. Covers every species and subspecies of canid Features more than 150 color plates with more than 600 photos from around the globe Depicts species in similar poses for quick and easy comparisons Describes key identification features, habitat, behavior, reproduction, and much more Draws on the latest taxonomic research Includes distribution maps and tips on where to observe each species The ideal field companion and a delight for armchair naturalists

A photographic tribute to the authors' work as wolf caregivers and advocates documents their efforts with the Sawtooth Pack in Idaho and features a passionate argument for reintroducing and protecting wild wolves.

Thick fur. Thin face or wide face. Long howls or short yips. Is it a wolf or a coyote? Learn how these beautiful wild creatures are alike and how they differ.

Favorite animals are visited in a new way as readers will look at the group dynamics and family lives of penguins, meerkats, dolphins, lions, gorillas, and wolves. Colorful photographs show each animal family in its natural habitat. Uncomplicated English and standard Latin-American Spanish translations explain the roles that group members play. A picture glossary in each book helps young bilingual readers to build and strengthen a connection between the two languages.

The New York Times best-selling account of how coyotes--long the target of an extermination policy--spread to every corner of the United States Finalist for the PEN/E.O. Wilson Literary Science Writing Award "A masterly synthesis of scientific research and personal observation." -Wall Street Journal Legends don't come close to capturing the incredible story of the coyote In the face of centuries of campaigns of annihilation employing gases, helicopters, and engineered

epidemics, coyotes didn't just survive, they thrived, expanding across the continent from Alaska to New York. In the war between humans and coyotes, coyotes have won, hands-down. Coyote America is the illuminating five-million-year biography of this extraordinary animal, from its origins to its apotheosis. It is one of the great epics of our time.

National Book Award Finalist: A “brilliant” study of the science and mythology of the wolf by the New York Times–bestselling author of Arctic Dreams (The Washington Post). When John Fowles reviewed *Of Wolves and Men*, he called it “A remarkable book, both biologically absorbing and humanly rich, and one that should be read by every concerned American.” In this National Book Award–shortlisted work, literary master Barry Lopez guides us through the world of the wolf and our often-mistaken perceptions of another species’ place on our shared planet. Throughout the centuries, the wolf has been a figure of fascination and mystery, and a major motif in literature and myth. Inspiring fear and respect, the creature has long exerted a powerful influence on the human imagination. *Of Wolves and Men* takes the reader into the world of the *Canis lupus* and its relationship to humankind through the ages. Lopez draws on science, history, mythology, and his own field research to present a compelling portrait of wolves both real and imagined, dispelling our fear of them while celebrating their place in our history, legends, and hearts. This ebook features an illustrated biography of Barry Lopez including rare images and never-before-seen documents from the author’s personal collection.

Provides information on wolves specifically the gray wolf family, but also contains information on other dog species, including the dhole and African wild dog.

“Don’t miss this dazzling tour de force.”—Katherine Applegate, Newbery Medal winning author of *The One and Only Ivan* This gripping novel about survival and family is based on the real story of one wolf’s incredible journey to find a safe place to call home. Illustrated throughout, this irresistible tale by award-winning author Rosanne Parry is for fans of Sara Pennypacker’s *Pax* and Katherine Applegate’s *The One and Only Ivan*. Swift, a young wolf cub, lives with his pack in the mountains learning to hunt, competing with his brothers and sisters for hierarchy, and watching over a new litter of cubs. Then a rival pack attacks, and Swift and his family scatter. Alone and scared, Swift must flee and find a new home. His journey takes him a remarkable one thousand miles across the Pacific Northwest. The trip is full of peril, and Swift encounters forest fires, hunters, highways, and hunger before he finds his new home. Inspired by the extraordinary true story of a wolf named OR-7 (or Journey), this irresistible tale of survival invites readers to experience and imagine what it would be like to be one of the most misunderstood animals on earth. This gripping and appealing novel about family, courage, loyalty, and the natural world is for fans of Fred Gipson’s *Old Yeller* and Katherine Applegate’s *Endling*. Includes black-and-white illustrations throughout and a map as well as information about the real wolf who inspired the novel.

This charming book teaches readers about the many funny and fascinating relationships found in nature, using the familiar concepts of family, friends, and neighbors. Luminescent, realistic paintings and simple text make this an inviting introduction to animal communities and cooperation.

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word "it" is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In *Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.
