Before Sir Arthur Evans, the principal object of Greek prehistoric archaeology was the reconstruction of history in relation to myth. European travellers to Greece viewed its picturesque ruins as the gateway to mythical times, while Heinrich Schliemann, at the end of the nineteenth century, allegedly uncovered at Troy and Mycenae the legendary cities of the Homeric epics. It was Evans who, in his controversial excavations at Knossos, steered Aegean archaeology away from Homer towards the broader Mediterranean world. Yet in so doing he is thought to have done his own inventing, recreating the Cretan Labyrinth via the Bronze Age myth of the Minotaur. Nanno Marinatos challenges the entrenched idea that Evans was nothing more than a flamboyant researcher who turned speculation into history. She argues that Evans was an excellent archaeologist, one who used scientific observation and classification. Evans's combination of anthropology, comparative religion and analysis of cultic artefacts enabled him to develop a bold new method which Sir James Frazer called 'mental anthropology'. It was this approach that led him to propose remarkable ideas about Minoan religion, theories that are now being vindicated as startling new evidence comes to light. Examining the frescoes from Akrotiri, on Santorini, that are gradually being restored, the author suggests that Evans's hypothesis of one unified goddess of nature is the best explanation of what they signify. Evans was in 1901 ahead of his time in viewing comparable Minoan scenes as a blend of ritual action and mythic imagination. Nanno Marinatos is a leading authority on Minoan religion. In this latest book she combines history, archaeology and myth to bold and original effect, offering a wholly new appraisal of Evans and the significance of his work. Sir

dynamic cultural interchange with its neighbors. Analyzing the symbols of the Minoan theocratic system and their similarities to those of Syria, Anatolia, and Egypt, Nanno Marinatos unlocks many Minoan visual riddles and establishes what she calls a "cultural koine," or standard set of cultural assumptions, that circulated throughout the Near East and the eastern Mediterranean. With more than 150 illustrations, *Minoan Kingship and the Solar Goddess* delivers a comprehensive reading of Minoan art as a system of thought.

On through the centuries, travellers hurried across the deserts of Syria and Iraq little knowing that, only a few yards off the beaten track the cities of Mesopotamia had once loomed over a green, fertile landscape now buried under blank, enigmatic mounds of earth. To the uninformed eye the skeletons of glittering palaces and temples would have been barely detectable in the glare of the punishing sun. French archaeologist Andre Parrot, however, was not such an oblivious passerby. Tramping through these wind-scoured wastes in the 1920s, Parrot heard, as he put it, the 'overtones' of humanity's earliest achievements, 'an orchestration of mighty names: Hammurabi, Nebuchadnezzar,' that evoked for him not only such giants of ancient history but also whole scenes out of the Bible. On a scorching day in January 1934, on a mound called Tell Hariri in Syria, a dozen miles from the Iraqi border, he gazed down at the small white statue he cradled in his hands and saw in it affirmation that all the travail had been worthwhile.

El detenido estudio de los anillos, de los textos existentes, de los motivos iconográficos, permite afirmar la existencia de relaciones profundas entre la

Creta minoica y las culturas del Próximo Oriente. La cultura minoica no es la de un pueblo aislado o limitado a intercambios comerciales. Nannos Marinatos ha sabido contarnos, en ocasiones con un lenguaje tan sencillo como apasionante, el papel desempeñado por la Diosa del Sol más allá de las habituales consideraciones que la conciben como diosa de la fertilidad . Sin dejar de ser gran madre, la Diosa del Sol es la autoridad suprema, de la que deriva el poder real. Es la Diosa del mundo y del inframundo, un rasgo específico de la cultura minoica. Comparando textos y motivos iconográficos, Marinatos muestra el significado de figuras que hasta ahora resultaban herméticas, la roseta, el árbol sagrado y la piedra, la doble hacha –atributo de la Diosa–, el trono de Cnossos, las montañas –límite y puerta al otro mundo–, las armas sagradas y milagrosas, todo lo cual configura la complejidad apasionante de una cultura que está en nuestros orígenes.

On March 23, 1900, Arthur John Evans and his staff began to excavate on Crete, looking for the fabled site of Knossos, where an extraordinary civilization, a precursor to classical Greece, was rumored to have existed. Almost from the first shovel stroke, artifacts began to emerge. Evans realized that here was "an extraordinary phenomenon, nothing Greek, nothing Roman. A wholly unexplored world." The Palace of Minos at Knossos recounts the exciting story of uncovering a remarkable society lost to the world for 3,500 years, from its initial discovery through its excavation to the structure we see today. Sidebars on archaeological techniques, illustrations of the sites, tables, and diagrams throughout provide a wealth of information on the Palace. The use of artifacts and other "documents" recovered from the Palace bring out the voices of the people of the past, offering clues to who they were and how they lived. The Palace of Minos at Knossos concludes with an interview with archaeologist Chris Scarre who talks about the misperceptions about Knossos and what we really know about its culture.

What is Human Intellectual Evolution? Could Darwins concept of evolution be incomplete? Darwins theory just might be insufficient, mainly because Darwin didnt apply his theory to the most complex organism of all; the human intellect. There is no question that in the past, numerous civilizations have ascended and then receded in terms of military power, influence and economic clout. Why? Will it happen to us? Human Intellectual Evolution accurately explains the past and greatly enhances the odds of successfully predicting the future. Human Intellectual Evolution drives the process of history forward and illuminates the path ahead. Understanding the three variables that affect the rate of intellectual development is critical to predicting the future and more profitably directing our time, energy and money. The future of the United States, what happens next in China, and the stability of the Middle East are all critical questions with global consequences. Profit and success will accrue to individuals who best grasp the concept of Human Intellectual Evolution and have the courage and fortitude to act upon their convictions.
