David N. Ashton, Johnny Sung

Work, Industry, and Canadian Society Harvey J. Krahn, Karen Hughes, Graham S. Lowe, 2020-02-11 Work, Industry, and Canadian Society provides a sociological introduction to the history, nature, organization, and management of work in Canada. The eighth edition expands and adds new coverage on the biggest work challenges faced now and in the future, such as Canada's aging and increasingly diverse workforce, the work experiences of Canada's Indigenous peoples, the rise of the app-based gig economy, and how technology will continue to impact future jobs and work organization. The new edition continues to incorporate recent empirical findings, review new and ongoing theoretical and policy debates, and provide a more international perspective. As the world of work continues to change rapidly, all trends and statistics have been updated. These authors are well regarded for their teaching and research, and their years of experience are evident in this comprehensive volume on the past, present, and future of work in Canada.

Teaching the World Merrill Distad, University of Alberta. Office of the Vice-President (Research and External Affairs), 1996-04 This book catalogues an exhibition of textbooks by authors from the University of Alberta. Each finished textbook contains its own story of challenges and victories. And each has its own power as a record of knowledge, a teaching tool, and an object of permanence and beauty.

How Societies Work, 5th Edition Joanne Naiman, 2020-04-28T00:00:00Z In 2011, protesters around the world - including Canada - called for changes to the societies in which they live. Many observers were asking: "What do they want?" Some answers to this question can be found in How Societies Work, a unique and accessible introductory sociology textbook that introduces students to the structure of contemporary societies and the power relationships within them. In contrast to most introductory textbooks, How Societies Work explores a broad range of sociological concepts and theories while simultaneously creating a coherent picture of modern societies. Drawing on fields as diverse as anthropology, genetics, economics, social psychology, history and politics, this innovative and popular text looks at both the roots of modern societies and the current structures within them. This approach helps undergraduate students make sense of our complex social world

and encourages them to connect the social world to their own lived experiences. This extensively revised and updated fifth edition includes discussions of the roots of the recent global economic crisis and worldwide responses to it, growing social inequality, broader global struggles for change, the growth of the security state in Canada and the sudden resurgence of political protest in North America. The final chapter looks to the future, examining such issues as the possible consequences of climate change, increased forced migration of peoples and the changing dynamic of global power. More boxes, quotes and “think about it” elements have been added to the fifth edition, while the language, clarity of presentation and many examples make it even more accessible to readers. It is an introductory textbook that truly engages students in the “sociological imagination.” This fifth edition is presented in a large format, making it easier to read and even more student friendly. A testbank and power point presentation are available for instructors upon request.

Healthy Work Namir Khan, Nina Nakajima, Willem H. Vanderburg, 2004 This reference provides an overview of relevant literature to engineers, managers, accountants, occupational health and safety specialists, and industrial hygienists, so that they, and other professionals, can understand what has caused our workplaces to become primary sources of physical and mental illness.

Worlds of Work Daniel B. Cornfield, Randy Hodson, 2012-12-06 The advent of transnational economic production and market integration compels sociologists of work to look beyond traditional national boundaries and build an international sociology of work in order to effectively address the human, scientific, and practical challenges posed by global economic transnationalism. The purpose of this volume is to promote transnational dialogue about the sociology of work and help build a truly international discipline in this field.

Hidden Knowledge D. W. Livingstone, Peter Harold Sawchuk, 2003 Explodes the dual myths that working-class adults have inferior learning capacities and that talented youths naturally leave blue-collar careers, and documents the genuine learning practices of working-class people, using accounts of prior school experiences; current adult education course participation; and a wide array of learning resources in paid workplaces, households, and community settings. The authors criticize dominant theories of learning and work and develop an alternative explanation of working-class adult learning.

Female Well-Being Carolyn Fluehr-Lobban, Janet Mancini Billson, 2013-07-04 This global survey starts from the assumption that the significant transformations in women's lives deserve to be fully documented and interpreted. Janet Mancini Billson and Carolyn Fluehr-Lobban tackle the complexities of social change by using data from countries in every world region to illustrate the most critical challenges that women faced during the last century - challenges that are also likely to shape the 21st century. Global knowledge and feminism dovetailed in the 20th century, fed by international air travel, telecommunications, the internet, and a growing awareness that solving female oppression would improve the lot of all humankind. The authors therefore adopt a strong international, comparative, cross-cultural, and feminist framework that

uncovers the fundamental processes that promote, sustain, or degrade the female condition. At the heart of Female Well-Being are case studies written by country teams of scholars, educators, and policy analysts, in Canada, The United States, Colombia, Iceland, the United Kingdom, Croatia, Japan, Bangladesh, Thailand, South Africa, and Sudan. Female well-being is measured by analysing trends in infant mortality, maternal mortality, literacy, life expectancy, education, work, income, family structure, and political power. These trends are contextualised in the light of the century's major events, legislative initiatives, social policies, and leadership, to illustrate the processes that enhance, sustain, or detract from the female condition. This book will be a critical resource for academics, development experts and policy analysts.

Inside Capitalism; An Introduction to Political Economy Paul Phillips, 2007 These Days Almost Anyone Is Bound To Be Depressed By The Litany Of Economic Woes Besieging Canada. Mainstream Economists, Politicians And Business Leaders Claim That Workers Wages Must Fall, That The Social Safety Net Must Be Stripped Away, That Taxes Must Be Cut And That Environmental Regulations Must Be Relaxed. There Is No Alternative, We Are Told, If Canada Is To Be Competitive. But Is This Really The Case? If We Are To Even Begin To Respond To This New Economic Mantra We Have To Know What Makes Our Economy Tick. In InsideCapitalism, Paul Phillips Introduces Us To Political Economic Analysis That Explains Why Firms Behave As They Do, Why We Have Such A High Level Of Economic Monopoly And Who Benefits From The Economic Structure Of Capitalism. In So Doing, Phillips Shows Us That Traditional Economic Analysis Is Mainly Ideology. Clearly, The Dismal Prospects That Average Canadians Face Are Not The Result Of Immutable Economic Laws But Rather Due To The Political And Economic Power That Business Has Amassed With The Aid Of Successive Governments And The Bank Of Canada.

Economic Restructuring and Human Resource Development Margaret Black, Marcus Powell, 2024-11-01 This title was first published in 2003. An analysis of education and training issues from the perspective of a planner, this book is the culmination of three years' research stemming from a concern by governments over how they can manage change and what contribution education and training policies play in this.

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, Rodney A. Clifton, Barry Ferguson, 2005-08-15 The introduction summarizes and locates the major waves of change. The authors then document each trend in relation to eighteen thematic groups that include age, community, women, labour, management, stratification, social relations, the state, mobilizing institutions, social forces, ideologies, households, lifestyle, leisure, education, integration, and attitudes and values.

Handbook on Inequality and Social Capital Steve McDonald, Rochelle Côté, Jing Shen, 2024-10-03 Building upon the extensive and expansive tradition of research on social capital and inequality, this Handbook summarizes current social capital research and showcases cutting-edge applications. It highlights the major theoretical and methodological

advancements in the field and provides a comprehensive review of the diversity of research on social capital and its relationship with the creation and maintenance of different forms of inequality.

The Wiley Handbook of Vocational Education and Training David Guile, Lorna Unwin, 2019-01-18 A collection of the theories, practices, and policies of vocational education and training written by international experts The Wiley Handbook of Vocational Education and Training offers an in-depth guide to the theories, practices, and policies of vocational education and training (VET). With contributions from a panel of leading international scholars, the Handbook contains 27 authoritative essays from a wide range of disciplines. The contributors present an integrated analysis of the complex and dynamic field of VET. Drawing on the most recent research, thinking, and practice in the field, the book explores the key debates about the role of VET in the education and training systems of various nations. The Handbook reveals how expertise is developed in an age of considerable transformation in work processes, work organization, and occupational identities. The authors also examine many of the challenges of vocational education and training such as the impact of digital technologies on employment, the demand for (re)training in the context of extended working lives, the emergence of learning regions and skill ecosystems, and the professional development of vocational teachers and trainers. This important text: Offers an original view of VET's role in both the initial and continuing development of expertise Examines the theories and concepts that underpin international perspectives and explores the differences about the purposes of VET Presents various models of learning used in VET, including apprenticeship, and their relationship with general education Explores how VET is shaped in different ways by the political economy of different countries Reviews how developments in digital technologies are changing VET practice Discusses the challenges for universities offering higher vocational education programs Draws on both recent research as well as historical accounts Written for students, researchers, and scholars in the fields of educational studies, human resource development, social policy, political economy, labor market economics, industrial relations, sociology, The Wiley Handbook of Vocational Education and Training offers an international perspective on the topic of VET.

The Migrant Maternal: Birthing New Lives Abroad Schultes Anna Kuroczycka, 2016-10-01 This edited volume explores how and why immigrant/refugee mothers' experiences differ due to the challenges posed by the migration process, but also what commonalities underline immigrant/refugee mothers' lived experiences. This book will add to the field of women's studies the much-needed discussion of how immigrant and refugee mothers' lives are dependent on cultural, environmental and socio-economic circumstances. The collection offers multiple perspectives on migrant mothering by including ethnographic and theoretical submissions along with mothers' personal narratives and literary analyses from diverse locales: New Zealand, Japan, Canada, The United States, Turkey, Italy and the Netherlands among others. The first section of the volume focuses on mothers' roles in the family institution and the pressures and responsibilities they face in "creating" and "reproducing" families physically and socially. The second section shifts its attention to children and highlights mothers'

continued roles in the development of their children abroad, along with the gendered/generational dynamics in the settlement process and the resultant effects on motherhood responsibilities. In all chapters, readers will find how women negotiate their traditional roles in a new sociocultural milieu, and how mothering processes are critical in creating connections with traditions and homelands.

Rethinking Workplace Regulation Katherine V.W. Stone, Harry Arthurs, 2013-02-14 During the middle third of the 20th century, workers in most industrialized countries secured a substantial measure of job security, whether through legislation, contract or social practice. This “standard employment contract,” as it was known, became the foundation of an impressive array of rights and entitlements, including social insurance and pensions, protection against unsociable working conditions, and the right to bargain collectively. Recent changes in technology and the global economy, however, have dramatically eroded this traditional form of employment. Employers now value flexibility over stability, and increasingly hire employees for short-term or temporary work. Many countries have also repealed labor laws, relaxed employee protections, and reduced state-provided benefits. As the old system of worker protection declines, how can labor regulation be improved to protect workers? In *Rethinking Workplace Regulation*, nineteen leading scholars from ten countries and half a dozen disciplines present a sweeping tour of the latest policy experiments across the world that attempt to balance worker security and the new flexible employment paradigm. Edited by noted socio-legal scholars Katherine V.W. Stone and Harry Arthurs, *Rethinking Workplace Regulation* presents case studies on new forms of dispute resolution, job training programs, social insurance and collective representation that could serve as policy models in the contemporary industrialized world. The volume leads with an intriguing set of essays on legal attempts to update the employment contract. For example, Bruno Caruso reports on efforts in the European Union to “constitutionalize” employment and other contracts to better preserve protective principles for workers and to extend their legal impact. The volume then turns to the field of labor relations, where promising regulatory strategies have emerged. Sociologist Jelle Visser offers a fresh assessment of the Dutch version of the ‘flexicurity’ model, which attempts to balance the rise in nonstandard employment with improved social protection by indexing the minimum wage and strengthening rights of access to health insurance, pensions, and training. Sociologist Ida Regalia provides an engaging account of experimental local and regional “pacts” in Italy and France that allow several employers to share temporary workers, thereby providing workers job security within the group rather than with an individual firm. The volume also illustrates the power of governments to influence labor market institutions. Legal scholars John Howe and Michael Rawling discuss Australia's innovative legislation on supply chains that holds companies at the top of the supply chain responsible for employment law violations of their subcontractors. Contributors also analyze ways in which more general social policy is being renegotiated in light of the changing nature of work. Kendra Strauss, a geographer, offers a wide-ranging comparative analysis of pension systems and calls for a new model that offers “flexible pensions for flexible

workers.” With its ambitious scope and broad inquiry, *Rethinking Workplace Regulation* illustrates the diverse innovations countries have developed to confront the policy challenges created by the changing nature of work. The experiments evaluated in this volume will provide inspiration and instruction for policymakers and advocates seeking to improve worker’s lives in this latest era of global capitalism.

Beyond Service Greg McElligott,2001-01-01 Greg McElligott traces neoconservative labour market policy from its international origins to the local offices of the Canadian state.

Supporting Workplace Learning for High Performance Working David N. Ashton,Johnny Sung,2002 Explores workplace learning as a means of enhancing both work performance and the quality of working life. Identifies characteristics of high performance work organizations, considers the implementation of high performance work practices and investigates how far these practices are embedded in different countries. Examines ways in which public policy can be used to encourage organizations to make more effective use of the skills of their employees.

Labour Markets, Industrial Relations and Human Resources Management in Europe Roger Blanpain,2012-03-01 Social models are always contested and ambiguous. This is particularly evident in the field of human resources management, where decisions that ultimately affect the patterns of social relations are made every day. This collection of in-depth essays focuses on some central human resources elements – gender, youth, ageing, educational background, training, workers’ rights – providing an up-to-date summary and analysis of how employers are dealing – and should be dealing – with workforce characteristics under current globalized forces. The emphasis is on Europe, but valuable insights come also from Chile, Canada, and the United States. Sixteen experts discuss such important issues as the following: the shift from intervention in favour of workers’ rights towards corporate neo-liberal policies; importance of transnational framework agreements in countries where a trade union; tradition is lacking; evidence that provision of childcare promotes female labour market participation; short-time working, labour hoarding, and labour underutilization; enhancing training policies for employable skills; enforcement of corporate social responsibility; alarmingly high rates of precarious employment; worldwide decline of full-time permanent positions; pension system reform; over-exposure of young people to non-standard employment; discouraged workers; regional imbalances in employment policy; and weaknesses of education programmes in connection with the world of work. Industrial relations and human resources professionals as well as employment lawyers worldwide will welcome this incisive analysis, and academics everywhere are sure to benefit from its evidence, insights, and proposals. The book presents a selection of papers from the international conference in commemoration of Marco Biagi entitled *Europe 2020: Comparative Perspectives and Transnational Action*, held at the Marco Biagi Foundation in Modena, Italy. 17-19 March 2011.
