Breastfeeding in Combat Boots is a much needed resource for active-duty mothers and mothers-to-be, who are seeking information and support on how to breastfeed successfully while serving their country. Are you pregnant and in the military? Do you want to breastfeed, but just don't know how you can combine 12 hour shifts, training exercises, or deployment with breastfeeding your baby? Robyn Roche-Paull answers these questions and more in *Breastfeeding in Combat Boots - A Survival Guide to Successful Breastfeeding While Serving in the Military*. As a veteran of the United States Navy, mother of three breastfed children, International Board Certified Lactation Consultant, and La Leche League Leader, the author has helped many active-duty mothers breastfeed their babies. She has now compiled this knowledge into a comprehensive guide to help all mothers in the military breastfeed their babies successfully. Most services now have written policies in place to support breastfeeding and direct commanders to provide a place and time for pumping milk. However, even with the policies in place, military mothers face unique circumstances that can make breastfeeding successfully a challenge. This book was written to help military mothers overcome the challenges they face so they can provide the best nutrition for their babies. Some of the topics covered include: How do I get breastfeeding off to a good start in only six short weeks? Can I pump while in the desert for training exercises? Is my pump allowed onboard ship? Do I need to pump and dump if I've been exposed to JP-8? How do I deal with co-workers who do not support my pumping while on duty? These questions and more are answered in *Breastfeeding in Combat Boots!* In this book, the author provides military moms with insight into the rewarding and wonderful aspects of breastfeeding on active duty, while also giving a realistic look at the challenges that lay ahead. If you are an active- d

In recent decades, as women entered the US workforce in increasing numbers, they faced the conundrum of how to maintain breastfeeding and hold down full-time jobs. In 2010, the Lactation at Work Law (an amendment to the US Fair Labor Standards Act) mandated accommodations for lactating women. This book examines the federal law and its state-level equivalent in Indiana, drawing on two waves of interviews with human resource personnel, supervising managers, and lactating workers. In many ways, this simple law - requiring break time and privacy for pumping - is a success story. Through advocacy by allies, education of managers, and employee initiative, many organizations created compliant accommodations. This book shows legal scholars how a successful civil rights law creates effective change; helps labor activists and management personnel understand how to approach

new accommodations; and enables workers to understand the possibilities for amelioration of workplace problems through internal negotiations and legal reforms.

The practical, relatable, and humorous guide to surviving the difficult, awkward, and rewarding job of being a breastfeeding, working mom. Meet the frenemy of every working, breastfeeding mother: the breast pump. Many women are beyond "breast is best" and on to figuring out how to make milk while returning to demanding jobs. *Work. Pump. Repeat.* is the first book to give women what they need to know beyond the noise of the "Mommy Wars" and judgment on breastfeeding choices. Jessica Shortall shares the nitty-gritty basics of surviving the working world as a breastfeeding mom, offering a road map for negotiating the pumping schedule with colleagues, navigating business travel, and problem-solving when forced to pump in less-than-desirable locales. Drawing on the war stories, hacks, and humor of working moms, and on her own stories from her demanding job and travel in developing countries, she gives women moral support for dealing with the stress and guilt that come with juggling working and breastfeeding. As she tells the reader in her witty, inspiring manifesto, "Your worth as a mother is not measured in ounces." 2015 Axiom Business Book Award Winner (Silver) in the category of Women/Minorities

No one warned me that becoming a mother would make me feel so rudimentary and small. Motherhood is amazing and because it's so amazing every mother should feel whole and blissfully happy. While that sounds like an easy task, many of us find ourselves lost among the dishes, carpools, homework, and family calendar. It doesn't have to be that way. *ME BEFORE MOM* asks moms to put in the time to find themselves again; stripping off the mom guilt of what motherhood should look like. What Bert Anderson has written is a call for mothers everywhere to focus on themselves, whether it's through finding a new passion, taking care of herself or investing in friendships. Each chapter focuses on a topic: finding your passion, self-care, emotional intimacy, and self assessments. Written in an easy format and with an accompanying journal *ME BEFORE MOM* is the perfect book for mothers of all ages.

For many women in their 20's and 30's, the greatest professional hurdle they'll need to overcome has little to do with their work life. The most focused, confident, and ambitious women can find themselves derailed by a tiny little thing: a new baby. While more workplaces are espousing family-friendly cultures, women are still subject to a "parenting penalty" and high-profile conflicts between parenting and the workplace are all over the news: from the controversy over companies

covering the costs of egg-freezing to the debate over parental leave and childcare inspired by Mark Zuckerberg's two-month paternity leave. Here's the Plan offers an inventive and inspiring roadmap for working mothers steering their careers through the parenting years. Author Allyson Downey—founder of weeSpring, the “Yelp for baby products,” and mother of two young children—advises readers on all practical aspects of ladder-climbing while parenting, such as negotiating leave, flex time, and promotions. In the style of #GIRLBOSS or Nice Girls Don't Get the Corner Office, Here's the Plan is the definitive guide for ambitious mothers, written by one working mother to another.

Work. Pump. Repeat is the practical guide author Jessica Shortall desperately needed, and couldn't find, when she went back to work after having her first baby. At the time, as Director of Giving for the now-iconic TOMS Shoes brand, Jessica found herself traveling the world with a breast pump. She was stunned to learn that of the mountains of breastfeeding books available, none cover this topic in depth. Looking like a champ while pumping milk throughout the work day isn't easy, and the only people who know how to do it are other working mothers. So Jessica interviewed hundreds of them, and this book represents their solutions for handling every situation and disaster. The book is also decidedly anti-Mommy Wars: all support and no judgment for the million women a year who attempt to juggle work and breastfeeding.

The vibrant, sprawling saga of Empress Maria Theresa—one of the most renowned women rulers in history—and three of her extraordinary daughters, including Marie Antoinette, the doomed queen of France. Out of the thrilling and tempestuous eighteenth century comes the sweeping family saga of beautiful Maria Theresa, a sovereign of uncommon strength and vision, the only woman ever to inherit and rule the vast Habsburg Empire in her own name, and three of her remarkable daughters: lovely, talented Maria Christina, governor-general of the Austrian Netherlands; spirited Maria Carolina, the resolute queen of Naples; and the youngest, Marie Antoinette, the glamorous, tragic queen of France, and perhaps the most famous princess in history. Unfolding against an irresistible backdrop of brilliant courts from Vienna to Versailles, embracing the exotic lure of Naples and Sicily, this epic history of Maria Theresa and her daughters is a tour de force of desire, adventure, ambition, treachery, sorrow, and glory. Each of these women's lives was packed with passion and heart-stopping suspense. Maria Theresa inherited her father's thrones at the age of twenty-three and was immediately attacked on all sides by foreign powers confident that a woman would be too weak to defend herself. Maria Christina, a gifted artist who alone among her sisters succeeded in marrying for love, would face the same dangers that destroyed the monarchy in France. Resourceful Maria Carolina would usher in the golden age of Naples only to face the deadly whirlwind of Napoleon. And, finally, Marie Antoinette, the doomed queen whose stylish excesses and captivating notoriety have masked the truth about her husband and herself for two hundred and fifty years. Vividly written and deeply researched, In the Shadow of the Empress is the riveting story of four exceptional women who changed the

course of history.

Hiroshima is the story of six people--a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest--who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

Breastfeeding. The mere mention of it has many mothers wracked with anxiety (how will I manage with work, other kids, what if I don't make enough milk?) or guilt about not doing it (will I be hurting my child if I choose not to breastfeed? what will people think of me if I choose not to?). This hot-button issue is one we've talked about repeatedly in the media and in celebrity culture. Remember when Angelina Jolie posed for the cover of *W* nursing her newborn? Oh, the controversy! And when Barbara Walters complained about the woman breastfeeding next to her on a plane? She was forced to issue a public apology. Or what about when supermodel Gisele Bündchen declared that there should be worldwide law that mothers be required to breastfeed their babies for the first six months of life? All hell broke loose. This topic gets people riled up, and there has never been a narrative account that explores the breastfeeding big picture for parents and their children in today's world. **THE BIG LETDOWN** by author, journalist, and breastfeeding advocate Kimberly Seals Allers will change that for the better and open up a candid conversation about the cultural, sociological, and economic forces that shape the breastfeeding culture and how it undermines women in the process.

Many appreciate Richard P. Feynman's contributions to twentieth-century physics, but few realize how engaged he was with the world around him—how deeply and thoughtfully he considered the religious, political, and social issues of his day. Now, a wonderful book—based on a previously unpublished, three-part public lecture he gave at the University of Washington in 1963—shows us this other side of Feynman, as he expounds on the inherent conflict between science and religion, people's distrust of politicians, and our universal fascination with flying saucers, faith healing, and mental telepathy. Here we see Feynman in top form: nearly bursting into a Navajo war chant, then pressing for an overhaul of the English language (if you want to know why Johnny can't read, just look at the spelling of “friend”); and, finally, ruminating on the death of his first wife from tuberculosis. This is quintessential Feynman—reflective, amusing, and ever enlightening.

There is no bigger issue for healthy infants than sleeping through the night. In this simple, straightforward book, Suzy Giordano presents her amazingly effective "Limited- Crying Solution" that will get any baby to sleep for twelve hours at night—and three hours in the day—by the age of twelve weeks old. Giordano is the mother of five children and one of the most sought-after baby sleep specialists in the country. The Washington Post calls her a baby sleep "guru" and "an underground legend in the Washington area for her ability to teach newborns how to achieve that parenting nirvana: sleeping through the night." Her sleep plan has been

tested with singletons, twins, triplets, babies with special needs, and colicky babies—and it has never failed. Whether you are pregnant, first-time parents, or parents who seek a different path with your second or third child, anyone can benefit from the Baby Coach's popular system of regular feeding times, twelve hours of sleep at night and three hours of sleep during the day, and the peace of mind that comes with taking the parent and child out of a sleep-deprived world.

The New York Times bestselling author of *Better* and *Complications* reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

"The Knowledge Machine is the most stunningly illuminating book of the last several decades regarding the all-important scientific enterprise." —Rebecca Newberger Goldstein, author of Plato at the Googleplex A paradigm-shifting work, The Knowledge Machine revolutionizes our understanding of the origins and structure of science. • Why is science so powerful? • Why did it take so long—two thousand years after the invention of philosophy and mathematics—for the human race to start using science to learn the secrets of the universe? In a groundbreaking work that blends science,

philosophy, and history, leading philosopher of science Michael Strevens answers these challenging questions, showing how science came about only once thinkers stumbled upon the astonishing idea that scientific breakthroughs could be accomplished by breaking the rules of logical argument. Like such classic works as Karl Popper's *The Logic of Scientific Discovery* and Thomas Kuhn's *The Structure of Scientific Revolutions*, *The Knowledge Machine* grapples with the meaning and origins of science, using a plethora of vivid historical examples to demonstrate that scientists willfully ignore religion, theoretical beauty, and even philosophy to embrace a constricted code of argument whose very narrowness channels unprecedented energy into empirical observation and experimentation. Strevens calls this scientific code the iron rule of explanation, and reveals the way in which the rule, precisely because it is unreasonably close-minded, overcomes individual prejudices to lead humanity inexorably toward the secrets of nature. "With a mixture of philosophical and historical argument, and written in an engrossing style" (Alan Ryan), *The Knowledge Machine* provides captivating portraits of some of the greatest luminaries in science's history, including Isaac Newton, the chief architect of modern science and its foundational theories of motion and gravitation; William Whewell, perhaps the greatest philosopher-scientist of the early nineteenth century; and Murray Gell-Mann, discoverer of the quark. Today, Strevens argues, in the face of threats from a changing climate and global pandemics, the idiosyncratic but highly effective scientific knowledge machine must be protected from politicians, commercial interests, and even scientists themselves who seek to open it up, to make it less narrow and more rational—and thus to undermine its devotedly empirical search for truth. Rich with illuminating and often delightfully quirky illustrations, *The Knowledge Machine*, written in a winningly accessible style that belies the import of its revisionist and groundbreaking concepts, radically reframes much of what we thought we knew about the origins of the modern world.

An alternative to formula exists! When breastfeeding doesn't work out, situations such as a premature or an ill baby delay breastfeeding, or you simply choose not to breastfeed, exclusively pumping breast milk—using a breast pump to initiate and maintain lactation—is a viable option and can be done on a long-term basis. Exclusively Pumping Breast Milk offers women the knowledge, advice, and support necessary to initiate and maintain their milk supply with a breast pump. This second edition of the first—and most comprehensive—book about exclusively pumping offers well-researched information, and plenty of tips and tricks, to help you on your journey. In addition to the basics of exclusively pumping, the second edition includes information on lactation and breast milk composition, increasing and decreasing supply, overcoming common challenges, pumps and accessories, storing expressed milk, weaning, and also a chapter specifically for mothers with babies in the NICU.
