Jess has been in love with her best friend, Kate, for seven years, but her feelings have never been returned. One night they sleep together, and Jess finds out how much it is possible to be hurt by someone close. Jess and Kate struggle to redefine their friendship. They spend a week at Jess's family holiday house in a small seaside town, Awatangi, intending to make the time to talk things through, but the conversations never happen. Kate makes vague promises, but begins to have second thoughts. Jess wants Kate, and nothing else, and is heartbroken that isn't enough. Jess decides – while everything is changing in her life – that she doesn't want to go on living in the city, that she wants to return to Awatangi. Part of her hopes some physical distance between them may help things with Kate, and part of her – frustrated and upset – simply wants to leave Kate behind. In Awatangi, Jess meets Keri, a local lawyer who has also recently returned home. Like Jess, Keri surfs, and like Jess, she seems to feel some attachment to her family roots in Awatangi. Jess is drawn to Keri, but forces herself not to let anything happen. Despite everything, Kate is still Jess's closest friend, and she has loved Kate all her life. She feels she has to give the situation with Kate as long as she can to work itself out. Awatangi is about coping with feelings for a close friend that are not returned, set in a small holiday township on the West Coast of the South Island of New Zealand. It is an exploration of getting what you've always wanted and it not being enough, of being in love with one person and wanting another, and of finding out that life doesn't always turn out as expected.

Envious of her best friends lavish lifestyle, a young woman wonders how different her life would be if she had an opportunity to change her past.

Your mind produces up to 70,000 thoughts a day—most of which are responsible for the decisions that you make. These decisions also determine your success both professionally and personally. However, we are taught what to think and not how to think. Information overload, short time frames and past failures can make even simple decisions and problems daunting. Do you lack confidence in your problem solving ability? Do you feel anxious when faced with a tough decision, or overwhelmed by lots of alternatives? Do you wish there was a formula for getting everything right? Executive coach and educator, Tremain du Preez, fills this book with practical tools and effective techniques, all presented in a clear and practical manner. Making the right decision will be a breeze and no problem will be too difficult to handle when you are armed with these new and proven strategies.

A simple mindset tweak will change your life. It started with a midnight insight. After a fifteen-year nightmare of coping with his struggling business, Sam Carpenter discovered and then developed a simple methodology that knocked his routine 80-hour workweek down to zero, while multiplying his net income by a factor of 100. Now, in 2021, here's his bestselling business book, revised yet again, showing how you too can instantly break free to build the business and life of your dreams. In this fourth edition of *Work the System*, Carpenter reveals the profound insight and exact uncomplicated, mechanical steps he took to turn his business--and his life--around. Once you "get" this new vision, success and serenity will come quickly. You will learn to:

- Make a simple perception adjustment that will change your life forever.
- See your world as a logical collection of linear systems that you can control.
- Manage the systems that produce results in your business and your life.
- Stop fire killing and become a fire-control specialist.
- Maximize profit, create client loyalty, and develop enthusiastic employees.
- Identify insidious "errors of omission."
- Maximize your biological and mechanical "prime time" so that you are working at optimum efficiency.
- Design the life you want--and then, in the real world, create it! You can keep doing what you've always done and continue getting unsatisfactory results. Or you can find the peace and freedom you've always wanted by transforming your businesses or corporate department into a finely tuned machine that runs smoothly and profitably on autopilot.

Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This publication is an attempt to capture the essence of a new state of art in software science and its supporting technology. It also aims at identifying the challenges such a technology has to master.

A tool to help gain momentum and clarity in the sometimes-confusing maze called life and work. The book covers subjects as diverse as parenting, finances, relationships, career, and more.

Do you feel like you struggle to make time for everything? We are living in a time-poor society, working more than ever and with less time for ourselves and family. The pressures and stress of the obligations we feel we have, often leave us without time to do everything that we would like to. More critically, we lack the time to reflect, review our lives and consider our direction. Time to contemplate if the decisions we are making are going to lead us to a life of purpose or an old age filled with regret. Time for Anything is based on 5 years of research by Craig D Robinson. Using the techniques in this book, Craig went from working in an entry level position to, in just four years: start 2 companies, recharge with 12 weeks holiday a year, start a family, grow and sell his startups and retire at the age of 34. This book shows you how you too can have time for it all.

In Stop Sabotaging Your Life: 3 Steps To Your Full Potential, acclaimed life coach Bruno LoGreco shares his simple path to achieving healthy mental and emotional independence. How many times have you caught yourself thinking something like this?: I'm not enough—good enough...smart enough...good looking enough...successful enough.... LoGreco says we sabotage our lives by focusing too much on being what others want us to be and do, and not spending enough time listening to our own hearts and minds. Some people try to find self-acceptance and contentment through counseling, but end up trapped on the therapy treadmill. Others try to go it alone, but still end up in a tiresome process of navel-gazing that never leads to personal fulfillment. LoGreco offers a three-step plan to help you reach your own potential: self-awareness (recognize what you have been doing, and why); rebuilding values (learn a different way to do things); and reach your full potential (identify opportunities and set meaningful goals). You will learn to leverage your strengths to stop chasing illusions and work toward achieving your dreams. LoGreco doesn't claim his book will cure everything that ails you. As he says, “There is no secret formula, no magic pill that will make you happy, productive, and successful. You must challenge your beliefs and take back control of your choices. Don't just think outside the box—break out of it altogether.” What clients and readers are saying about life coach, mentor, and motivational speaker Bruno LoGreco: “As a divorced mother of three, I've encountered many obstacles, mostly personal ones within myself. I wondered why I kept repeating the same patterns with the men I was dating and why it always ended badly, usually with me being hurt, and questioned what 'I' was doing wrong. Bruno taught me how to love myself again, how to respect myself and above all else, BELIEVE in myself.... Bruno saved me from my self-destructive patterns. Without his help, I wouldn't be the confident woman I am today. I am a better mother for that.”—

Cristina “The world is filled with very successful executives who for decades focus every waking minute on professional accolades and professional development [only to] realize they haven't take the time out to focus on personal development in terms of a better balance in life, being in touch with their spiritual side and inner self, and even the fun side of life. That would describe me in the past.... I came across Bruno, and I knew he was the man. His personality exudes authenticity and geniality. The man simply knows his stuff, has this uncanny ability to read between the lines, and zero in instantly on underlying triggers. His structured approach steers you to address issues head on; challenges you to challenge yourself; opens your mind; helps you understand behaviors, experiences and patterns; gets you in touch with yourself; fuels a sense of purpose and passion; and escorts you to chart a new course to life. He never judges, but relentlessly encourages and empowers you. He's truly a brilliant, genuine and a humane person with an infectious enthusiasm to make you seize your inborn potential.” —Adrian “If I had to sum up my experience with Bruno in one word, it would be 'awakened.' Bruno helped me see life from a different perspective, which is what I needed, but most importantly, he showed me how to do that myself without being dependent on him.... Bruno got me to step outside of my comfort zone and do things I normally wouldn't have done otherwise, which is undoubtedly the key to growth.” —Blaine

Work The System aims to convince people to change their fundamental perception of the world around them from a vision of an impenetrable, amorphous conglomeration, to one made up of individual linear systems, each of which can be improved and perfected. The reader is guided through the process of "getting" this new vision, and then through the specifics of applying it. It's simple, believable, and mechanical; not mystical or theoretical. Work the System will show business leaders and professionals how to achieve a positive macro result by looking at their business and work on a micro level - by analyzing and refining each of the systems that are already in place. Readers will learn how to tweak this network of systems to maximize profits, create client loyalty, and develop autonomous employees. The strategies will also help individuals improve their performance and decrease the stress of being overtaxed or disorganized.

A dense black cloud boiled up in the southeastern sky. It rose high and fast, like a time-lapse movie of the birth of a thunderhead. But it was no rain cloud. Wholly black, it reached up and up until it loomed over her, blocking out the sun. Somehow, she knew, it was Death coming for her. Pre-med student Coral is on vacation in Idaho when something terrible happens. The black cloud is followed by a wildfire and searing heat that lasts for days. She survives deep in a cave but emerges days later to find the world transformed, with blackened trees, an ash-filled sky, and no living creatures stirring--except for her. So begins her desperate journey: to find water, and food, and other survivors...and the answer to the mystery of what happened. Gray I is the first novel in a series.

Trading Systems That Work evaluates many of today's most influential techniques and, emphasizing trading software programs TradeStation and Excel, covers all aspects of researching, building, understanding, and evaluating your own trading system."

This book has evolved from our deep interest and involvement in the development and application of reliability evaluation techniques. Its scope is not limited to anyone engineering discipline as the concepts and basic techniques for reliability evaluation have no disciplinary boundaries and are applicable in most, if not all, engineering applications. We firmly believe that reliability evaluation is an important and integral feature of the planning, design and operation of all engineering systems; from the smallest and most simple to the largest and most complex. Also, we believe that all engineers involved with such systems should be aware of, and appreciate, not only the benefits which can accrue from reliability assessment, but also how such assessments can be made. Our primary objective has been to compile a book which provides practising engineers and engineering graduates who have little or no background in probability theory or statistics, with the concepts and basic techniques for evaluating the reliability of engineering systems. It is hoped that the material presented will enable them to reach quickly a level of self-confidence which will permit them to assimilate, understand and appreciate the more detailed applications and additional material which is available in the journals and publications associated with their own discipline.
