2nd graders, where students have already mastered single digit addition and subtraction. This workbook provides kids with additional math practice that complements and supplements what is taught at school. The focus is on key foundational mathematics basics: addition, subtraction, and introduction to multiplication, division, geometry, and fractions. Note: Many schools do not start multiplication or division until 3rd grade, but we are covering these concepts here since it does take time and practice to get comfortable with multiplication and division. Math is all about the ability to put into action previous concepts taught. To do this, a child needs to be exposed to as many examples as possible, varying from the easy to the more mentally challenging. Sample equations need to be made random to truly test understanding of math skills. So if your child is struggling with addition and subtraction, then this is the best workbook to have!

You and your child will discover the joy of learning at home with this illustrated math book. Easy-to-follow directions and fun exercises motivate students to work on their own. Our Math Book for grade 2 includes progressive lessons like adding and subtracting. This Workbook strengthens mathematical skills of students and offers quality educational activities. It features lessons and exercises that help students to understand difficult subject matter. Writing in workbook pages, as opposed to typing on a computer, can help kids to focus and to learn. Writing by hand fires up specific areas of a child's brain, improving a child's ability to not only remembers what he or she learns but to think of new ideas. For use with Grade 2. We believe kids get better at math with practice, resulting in confidence and positive attitude towards math that is required to excel in school. This workbook provides kids with additional math practice that reinforces and complements what is taught at school. There are no pictures or word problems, and focus on mastery of basic addition and subtraction. This workbook combines traditional addition and subtraction math problems, with number bond problems. Many elementary schools teach math using Number Bonds, and we want kids to have practice on both traditional math questions and number bonds to build fluency

and speed in basic arithmetic.
