With its highly readable text and stunning illustrations, this masterpiece of a book tells the story of the creation, evolution and exploitation of the V12 engine. From the big American V12s of the early 1900s to today's Aston Martin Vanquish V12, these glorious engines have been revered as more than just feats of engineering; in many cases they are respected as works of art. Here is an insightful, analytical and technical history of the V12 engines that have powered some of the most exciting and dramatic cars ever built for road or track. In 1955, Mercedes-Benz wins the sports car world championship with the racing car 300 SLR (W 196 S). In addition to the titles achieved that same year in the formula 1 world championship and the European touring car championship, this success is proof of the unprecedented dominance of a single manufacturer on the stage of international automobile racing. Stirling Moss and Juan Manuel Fangio, the most successful drivers of their era, celebrate impressive double victories in the 300 SLR at the most demanding road races in the world, triumphs that

- A thrilling photographic account of the treasure trove of cars kept by the Mercedes-Benz Museum in Stuttgart that are not currently on display to the public The Mercedes-Benz Museum in Stuttgart is one of the largest and most visited industrial museums in the world. But the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the

public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz battling motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive. The second edition of this book continues the restoration of a 356 Porsche to driver level condition. This book does not spend time or money creating the "perfect" 356, and does not necessarily search for NOS (new old stock) replacement panels if a reproduction panel or patch is appropriate; but the book strives to give you a restoration that will be correct, admired and driven. This second edition provides more detail and contains additional comments to assist those restoring a 356 which was purchased disassembled. This second edition follows the restoration of a 1957 sunroof coupe from the time of purchase to the first drive. Additionally, detailed comments are provided from vendors, such as media blasting, painting, and upholstery.

Flamboyant Matthew Cannonbridge was touched by genius, the most influential mind of the 19th century, a novelist, playwright, the poet of his generation. The only problem is, he should never have existed, and recently divorced 21st century don Toby Judd is the only person to realise something is wrong with history. Cannonbridge was everywhere: he was by Lake Geneva when talk between Byron, Shelley and Mary Godwin turned to the supernatural; he was friend to the young Dickens as he laboured in the blacking factory; he was the only man of note to visit Wilde in prison. His extraordinary life spanned a century. But as the world prepares to toast the bicentenary of Cannonbridge's most celebrated work, Judd's discovery leads him on a breakneck chase across the English canon and countryside, to the realisation that the spectre of Matthew Cannonbridge, planted so seamlessly into the heart of the 19th century, might not be so dead and buried after all...
