World History: Cultures, States, and Societies to 1500 offers a comprehensive introduction to the history of humankind from prehistory to 1500. Authored by six USG faculty members with advance degrees in History, this textbook offers up-to-date original scholarship. It covers such cultures, states, and societies as Ancient Mesopotamia, Ancient Israel, Dynastic Egypt, India's Classical Age, the Dynasties of China, Archaic Greece, the Roman Empire, Islam, Medieval Africa, the Americas, and the Khanates of Central Asia. It includes 350 high-quality images and maps, chronologies, and learning questions to help guide student learning. Its digital nature allows students to follow links to applicable sources and videos, expanding their educational experience beyond the textbook. It provides a new and free alternative to traditional textbooks, making World History an invaluable resource in our modern age of technology and advancement. With the spread of interest-based transactions, major problems such as inequality, poverty and debt-based slavery have emerged. Those who practiced professions such as usury have, despite the negative connotations attributed to them, contributed extensively to the construction of the conventional financial system in the global economy, suggesting that the core concepts in this practice need to be analyzed in greater depth and from a historical perspective. This book analyzes the evolution of interest-bearing debt transactions from ancient times to the era of Abrahamic religions. In modern times, interest is strictly prohibited by Islam, but this book demonstrates that it is a practice that has been condemned and legally and morally prohibited in other civilizations, long before Islam outlawed it. Exploring the roots of this prohibition and how interest has been justified as a viable practice in economic and financial transactions, the book offers deep insight into the current nature of finance and economics, and the distinctive features of Islamic finance in particular and enables researchers to further delve into a review of interest-free financing models. Islamic finance, or alternative financial methods, have become extremely popular particularly in the aftermath of global financial crises, suggesting that they will attract further interest in the future as well. The book is primarily aimed at undergraduate and graduate students but, as it avoids the use of technical jargon, it also speaks to a general readership. It will appeal to those who have an interest in financial history, particularly the history of debt as well.

This collection of essays begins with the premise that violence, in its relationship to order, is a central element of history.

Taking a broad definition of violence, including structural and symbolic violence, the contributions move beyond the problematic of civilization's mitigating or foundational role, instead seeing violence as inherently social, and, perhaps, socially inherent (if variable). The question then becomes what forms of harm are authorized or banned in which social orders and how they change over time. Beginning with a theoretical introduction, this interdisciplinary volume includes seven papers representing cultural anthropology, history, archaeology and international relations. The papers range from China to the Americas and from the 2nd millennium BCE to the 21st century CE. Some deal with long-term developments while others focus on a single time and place. Many treat the issue of the visibility/invisibility of violence, while all in one way or another deal with the role of violence in the re-production of community. Together, the volume aims to paint, with a few strokes, the outlines of a deep historical anthropology of social violence. The volume is based on the proceedings of a symposium hosted at Brown University.

Combines motivating stories with research-based instruction that helps students improve their reading and social studies skills as they discover the past. Every lesson of the textbook is keyed to California content standards and analysis skills.

Ancient history has traditionally focused on Greece and Rome. This book takes a global approach to the distant past, following the development of human societies across the globe from the last Ice Age, 11,700 years ago, to the rise of Islam in the seventh century CE. The only book of its kind, A Global History of the Ancient World provides succinct narratives of the first Asian, African and European civilizations and their importance for later history without foregoing the key topics of conventional textbooks. Thematic overviews give truly global perspectives on connections, disconnections and parallel developments shaping the ancient world. Written for students of history, classics and related disciplines, the book will appeal to anyone interested in widening their view of early history.
