A provocative new book that shows us why we must put American history firmly in a global context--from 1492 to today Americans like to tell their country's story as if the United States were naturally autonomous and self-sufficient, with characters, ideas, and situations unique to itself. Thomas Bender asks us to rethink this "exceptionalism" and to reconsider the conventional narrative. He proposes that America has grappled with circumstances, doctrines, new developments, and events that other nations, too, have faced, and that we can only benefit from recognizing this. Bender's exciting argument begins with the discovery of the Americas at a time when peoples everywhere first felt the transforming effects of oceanic travel and trade. He then reconsiders our founding Revolution, occurring in an age of rebellion on many continents; the Civil War, happening when many countries were redefining their core beliefs about the nature of freedom and the meaning of nationhood; and the later imperialism that pitted the United States against Germany, Spain, France, and England. Industrialism and urbanization, laissez-faire economics, capitalism and socialism, and new technologies are other factors that Bender views in the light of global developments. A Nation Among Nations is a passionate, persuasive book that makes clear what damage is done when we let the old view of America alone in the world falsify our history. Bender boldly challenges us to think beyond our borders.

The authors of VOYAGES IN WORLD HISTORY never forget that history is made up of the stories of people. Each chapter of the text centers on a story -- a traveler's account that highlights the book's main theme, the constant movement of people, goods, and ideas. The travelers include merchants, poets, rulers, explorers, soldiers, missionaries, and scholars, and their voyages provide a framework for each chapter that will capture students' interest and draw them into the stories of the people, places, and events crucial to understanding world history. Special features highlight connections across chapters, societies, and periods, helping students understand historical events in a global context. Available in the following split options: VOYAGES IN WORLD HISTORY, Third Edition Complete, Volume 1: To 1600, and Volume 2: Since 1500. In the realm of political discourse there is a distinct gap in understanding between Russia and the West. To an outsider, the ideas that animate the actions of Russia's ruling elite, opposition, and civil society - from the motivations driving Russia's political actors to the class structure and international and domestic constraints that shape Russia's political thinking - remain shrouded in mystery. Contrary to the view that a bleak discursive uniformity reigns in Vladimir Putin's Russia, Political Ideologies in Contemporary Russia shows that the country is engaging in serious theoretical debates across a wide spectrum of modern ideologies including liberalism, nationalism, feminism, and multiculturalism. Elena Chebankova argues that the nation is fragmented and the state seeks to balance the various ideological movements to ensure that none dominates. She shows that each of the main ideological trends is far from uniform, but the major opposition is between liberalism and traditionalism. The pluralistic picture she describes contests many current portrayals of Russia as an authoritarian or even totalitarian state. Offering an alternative to the Western lens through which to view global politics, Political Ideologies in Contemporary Russia is a major contribution to our understanding of this world power.

This is the first comprehensive, multi-author survey of German history that features cutting-edge syntheses of major topics by an international team of leading scholars. Emphasizing demographic, economic, and political history, this Handbook places German history in a denser transnational context than any other general history of Germany. It underscores the centrality of war to the unfolding of German history, and shows how it dramatically affected the development of German nationalism and the structure of German politics. It also reaches out to scholars and students beyond the field of history with detailed and cutting-edge chapters on religious history and on literary history, as well as to contemporary observers, with reflections on Germany and the European Union, and on 'multi-cultural Germany'. Covering the period from around 1760 to the present, this Handbook represents a remarkable achievement of synthesis based on current scholarship. It constitutes the starting point for anyone trying to understand the complexities of German history as well as the state of scholarly reflection -- Germany's dramatic, often destructive, integration into the community of modern nations. As it brings this story to the present, it also places the current post-unification Federal Republic of Germany into a multifaceted historical context. It will be an indispensable resource for scholars, students, and anyone interested in modern Germany.

This major six-volume project, co-published with Macmillan, covers the historical experience of the peoples and societies of the Caribbean region from the earliest times to the present day. The sixth volume brings this series to an end as it takes in the whole of the modern period from colonial conquest and domination to decolonization; the Cold War from start to finish; the disintegration of the Soviet Union; and the renewed instability in certain areas. Not only did the colonial regimes lay a new patina over the region, but nationalism remoulded all old identities into a series of new ones. That process of the twentieth century was perhaps the most transformative of all after the colonial subjugation of the nineteenth. While it has been the basis of remarkable stability in vast stretches of the region, it has been a fertile source of tension and even wars in other parts. The impact and the results of such changes have been astonishingly variable despite the proximity of these states to each other and their being subject to, or driven, by virtually the same compulsions.

Zionism emerged at the end of the nineteenth century in response to a rise in anti-Semitism in Europe and to the crisis of modern Jewish identity. This novel, national revolution aimed to unite a scattered community, defined mainly by shared texts and literary tradition, into a vibrant political entity destined for the Holy Land. However, Zionism was about much more than a national political ideology and practice. By tracing its origins in the context of a European history of ideas and by considering the writings of key Jewish and Hebrew writers and thinkers from the nineteenth and twentieth centuries, the book offers an entirely new philosophical perspective on Zionism as a unique movement based on intellectual boldness and belief in human action. In counter-distinction to the studies of history and ideology that dominate the field, this book also offers a new way of reflecting upon contemporary Israeli politics.

The Atlantic in World History, 1490-1830 looks at the historical connections between four continents – Africa, Europe, North America and South America – through the lens of Atlantic history. It shows how the Atlantic has been more than just an ocean: it has been an important site of circulation and transmission, allowing exchanges and interchanges which have profoundly shaped the development of the world. Divided into four thematic sections, Trevor Burnard's sweeping yet concise narrative covers the period from the voyages of Columbus to the New World in the 1490s through to the end of the Age of Revolutions around 1830. It deals with key topics including the Columbian exchange, Atlantic slavery and abolition, war as a global phenomenon, the Age of Revolution, religious conversion, nation-building, trade and commerce and intellectual movements such as the Enlightenment. Rather than focusing on the 'rise of the West', Burnard stresses the interactive nature of encounters between various parts of the world, setting local case studies within his broader interconnected narrative. Written by a leading historian of Atlantic history, and including further reading lists, images and maps as well as a companion website featuring discussion questions, timelines and primary source extracts, this is an essential book for students of Atlantic and world history.

A groundbreaking study of the foundations of nationalism, exposing its antiquity, strong links with ethnicity and roots in human nature.

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

In this third edition of Migration in World History, Patrick Manning presents an expanded and newly coherent view of migratory processes, conveying new research and interpretation. The engaging narrative shows the continuity of migratory processes from the time of foragers who settled the earth to farmers opening new fields and merchants linking purchasers everywhere. In the last thousand years, accumulation of wealth brought capitalism, industry, and the travels of free and slave migrants. In a contest of civilizational hierarchy and movements of emancipation, nations arose to replace empires, although conflicts within nations expelled refugees. The future of migration is now a serious concern. The new edition includes: An introduction to the migration theories that explain the shifting patterns of migration in early and recent times Quantification of changes in migration, including international migration, domestic urbanization, and growing refugee movements A new chapter tracing twenty-first-century migration and population from 2000 to 2050, showing how migrants escaping climate change will steadily outnumber refugees from other social conflicts While migration is often stressful, it contributes to diversity, exchanges, new perspectives, and innovations. This comprehensive and up-to-date view of migration will stimulate readers with interests in many fields.

Rugged, remote, riven by tribal rivalries and religious violence, Afghanistan seems to many a forsaken country frozen in time. Robert Crews presents a bold challenge to this misperception. During their long history, Afghans have engaged and connected with a wider world, occupying a pivotal position in the Cold War and the decades that followed. A broad examination of the rise of nationalism, populism, xenophobia, and racism throughout the world *The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism* provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents—offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism. The Companion features original contributions by both established experts and emerging scholars that explore an expansive range of theoretical, historical, and empirical case studies. Organized into five sections, the text first discusses growing trends in the United States, the significance of populism in major societies around the globe, and how global changes are influencing regional variations in race, ethnicity, and nationalism. An investigation of global migration patterns is followed by examination of conflict and violence, from urban riots and boundary disputes to warfare and genocide. The final section focuses on the policy debates resulting from changing patterns and their impact on politics, the economy, and society. Timely and highly relevant, this book: Discusses contemporary issues such as the failure of school systems to provide equal opportunities to minorities, the evolution of the School-to-Prison pipeline, and the Black Lives Matter movement Explores shifts in American race relations, the influence of social media and the internet, and the links between increased globalization and contemporary forms of nationalism, racism, and populism Features essays on national and ethnic identity in China, Japan, and South Korea, India, Central Asia, Africa, Latin America, and Europe Analyzes policies regarding borders, immigration, refugees, and human rights in different countries and regions Offers perspectives on the radicalization of social movements, the creation of ethnic, linguistic and other boundaries between groups, and the models used to understand intractable conflicts in many global settings *The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism* is an indispensable resource for scholars, researchers, instructors, and students across the social sciences, including sociology, political science, global affairs, economics, comparative race and ethnic relations, international migration, social change, and sociological theory.

SOCIETIES, NETWORKS, AND TRANSITIONS connects the different regions of the world within and across chapters, and explores broader global themes in part-opening essays. This innovative structure combines the accessibility of a regional approach with the rigor of comparative scholarship to show students world history in a truly global framework. The “tree, tree, tree, forest” organization assures that students stay engaged and in tune with when and where they are in their study of world history. The text also features a strong focus on culture and religion. Author and veteran teacher Craig Lockard engages students with a unique approach to cultural artifacts, such as music and art. Pedagogical features—including chapter outlines with focus questions, section summaries, pronunciation guides, and marginal key term definitions—support students and instructors as they explore the interconnectedness of different people, places, and periods in the global past. The Third Edition has been extensively revised to sharpen the narrative and incorporate recent scholarship. Available in the following split options: *SOCIETIES, NETWORKS, AND TRANSITIONS*, Third Edition (Chapters 1-31), ISBN: 9781285783123; Volume I: To 1500 (Chapters 1-14), ISBN 9781285783086; Volume II: Since 1450 (Chapters 15-31), ISBN 9781285733852. From large-scale cattle farming to water pollution, meat—more than any other food—has had an enormous impact on our environment. Historically, Americans have been among the most avid meat-eaters in the world, but long before that meat was not even considered a key ingredient in most civilizations’ diets. Labor historian Wilson Warren, who has studied the meat industry for more than a decade, provides this global history of meat to help us understand how it entered the daily diet, and at what costs and benefits to society. Spanning from the nineteenth century to current and future trends, Warren walks us through the economic theory of food, the discovery of protein, the Japanese eugenics debate around meat, and the environmental impact of livestock, among other topics. Through his comprehensive, multifaceted research, he provides readers with the political, economic, social, and cultural factors behind meat consumption over the last two centuries. With a special focus on East Asia, *Meat Makes People Powerful* reveals how national governments regulated and oversaw meat production, helping transform virtually vegetarian cultures into major meat consumers at record speed. As more and more Americans pay attention to the sources of the meat they consume, Warren’s compelling study will help them not only better understand the industry, but also make more informed personal choices. Providing an international perspective that will appeal to scholars and nutritionists alike, this timely examination will forever change the way you see the food on your plate.

How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and

Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires in World History* offers a fresh approach to understanding the impact of empires on the past and present.

A Companion to World History presents over 30 essays from an international group of historians that both identify continuing areas of contention, disagreement, and divergence in world and global history, and point to directions for further debate. Features a diverse cast of contributors that include established world historians and emerging scholars Explores a wide range of topics and themes, including and the practice of world history, key ideas of world historians, the teaching of world history and how it has drawn upon and challenged "traditional" teaching approaches, and global approaches to writing world history Places an emphasis on non-Anglophone approaches to the topic Considers issues of both scholarship and pedagogy on a transnational, interregional, and world/global scale

Here is a brief, well-written, and lively survey of the history of Southeast Asia from ancient times to the present, paying particular attention to the region's role in world history and the distinctive societies that arose in lands shaped by green fields and forests, blue rivers and seas. Craig Lockard shows how for several millennia Southeast Asians, living at the crossroads of Asia, enjoyed ever expanding connections to both China and India, and later developed maritime trading networks to the Middle East and Europe. He explores how the people of the region combined local and imported ideas to form unique cultures, reflected in such striking creations as Malay sailing craft, Javanese gamelan music, and batik cloth, classical Burmese and Cambodian architecture, and social structures in which women have often played unusually influential roles. Lockard describes colonization by Europeans and Americans between 1500 and 1914, tracing how the social, economic, and political frameworks inherited from the past, combined with active opposition to domination by foreign powers, enabled Southeast Asians to overcome many challenges and regain their independence after World War II. The book also relates how Malaysia, Singapore, Thailand, Indonesia, and Vietnam are now among the fastest growing economies in the world and play a critical role in today's global marketplace.

This book argues that a tribe of the primitive society is formed because of kinship, while a state of the civilized society is formed because of language. Language presets the whole process of the progress of human civilization.

This Book covering a period from 5000 BCE to 1943 of Nuer History so Naath would be able to know their history. It contents the deeds of Naath ancestors from the past and how this great people has been done in ancient to modern time. The Book shall answer some questions of who are Naath identity, political and history. Clearly Nuer is a proudly independent Nation with a thousands of year's history since 5000 BCE until the era of imperialism and colonialism which came to an end in 1943. Before colonialism Naath were not part of Sudan until new political change occurred which was force by colonialism. Naath were not Sudanese by identity before scrambling of African continent by new colonial hegemony. Naath people were homogenous nation well-established since before colonization of Africa by seven European nations. This history is written because is very clear that people that has no written history always lost their ways and destined dream. Sudan and Southern Sudan is merely a newly adopted system of nationalism. However, Heterogeneity of Southern Sudan started later in 1947 by Juba's conference which considered by many as the beginning of new identity of South Sudan. 1943 marked the end of Naath state which pre-existing, after 30 years of war of struggle against colonialism by Naath. The Naath political struggle had caused Nuer colonial District commissioners to hold a meeting in 1943 before Juba's Conference for four years to create an independent state for Nuer. Nuer as people and National identity and language established their own nation called Rol Nath earlier before colonialism. Now is a right time to rewrite the Naath history to cover the period of important events started from 5000 BCE to 1943. The Book shall cover ancient and modern Nuer history. It means the Book shall cover a period of around two to three thousand years from 5000 BCE to 1943. This is the period in which Nuer were purely independent homogenous state with a separate political struggle. This is to teach Nuer children their own history to understand the deeds of their ancestors and feel proud of it. The Nuer history will not go wasted as it is part of world's legacy and history. We believe that the world's history is a combination of several civilizations because diversity is made up of differences. Our great Nation is about to lost its legacy and history which made them even confused. This great Nation called Naath people had survived several aggressions for thousands of years. Ancestors paid a lot of blood so that their glorious corpses are glory to next generations. For Nation to flourish its people must rewrite their history to control itself among other nations. With this piece of records, we tend to restore our actions in the past to boost our confidence on ourselves. This Book in

particular is not meant to make anthropological studies or research on Nuer people as per collections by scholars during and after colonial time nor making analyses. It is intended to records history tells by Nuer themselves about themselves of what they have done in the past. Clearly, the intention of this work is to record Nuer's deeds from the last centuries to bring Naath's world back to life. There is a long history about to be ignore because of colonial history. The proudness of world's legacy is a collected legacies of different people and cultures. Generations that lost its civilization and history always got no direction of their own. There were a lot of actions done by Nuer for good numbers of years that weren't recorded for long period of time. In addition of ancient Nuer history, there is also more records by colonial administrators. Several scholars and colonial government officials did a substantial work later. Individuals that have done a great work were Evans-Pritchard, Percy Coriat, C. h. Jackson, Douglas H. Johnson, J. W. Burton and Lienhardt and Sharon Hutchinson.

Imperialism in the Modern World combines narrative, primary and secondary sources, and visual documents to examine global relations in the nineteenth and twentieth centuries. The three co-editors, Professors Bowman, Chiteji, and Greene, have taught for many years global history classes in a variety of institutions. They wrote Imperialism in the Modern World to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history (some readers use primary materials exclusively. Some focus on secondary arguments). This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses - one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses. The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework. Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused. This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper-division levels. The reader will allow show students how to read historical documents through a hands-on demonstration in the introduction. The book also incorporates images as visual documents. Finally, the book conceives of global history in the widest possible terms; it contains pieces on political, diplomatic, economic, and military history, to be sure, but it also has selections on technology, medicine, women, the environment, social changes, and cultural patterns. Other readers can not match this text's breadth because they are chronologically and thematically so extended.

An alternative history of the Cold War from the perspective of impoverished Third-World people includes coverage of such topics as the 1927 Brussels conclave of the League Against Imperialism and the launch of the Third World project during the 1955 conference in Indonesia. Reprint.

The late German historian considers all forms and movements of human affairs as he predicts the inevitable eclipse of Western civilization, in an abridged edition of the classic

study, first published more than eighty years ago. Reprint.

A sweeping narrative history of Eastern Europe from the late eighteenth century to today In the 1780s, the Habsburg monarch Joseph II decreed that henceforth German would be the language of his realm. His intention was to forge a unified state from his vast and disparate possessions, but his action had the opposite effect, catalyzing the emergence of competing nationalisms among his Hungarian, Czech, and other subjects, who feared that their languages and cultures would be lost. In this sweeping narrative history of Eastern Europe since the late eighteenth century, John Connelly connects the stories of the region's diverse peoples, telling how, at a profound level, they have a shared understanding of the past. An ancient history of invasion and migration made the region into a cultural landscape of extraordinary variety, a patchwork in which Slovaks, Bosnians, and countless others live shoulder to shoulder and where calls for national autonomy often have had bloody effects among the interwoven ethnicities. Connelly traces the rise of nationalism in Polish, Austro-Hungarian, and Ottoman lands; the creation of new states after the First World War and their later absorption by the Nazi Reich and the Soviet Bloc; the reemergence of democracy and separatist movements after the collapse of communism; and the recent surge of populist politics throughout the region. Because of this common experience of upheaval, East Europeans are people with an acute feeling for the precariousness of history: they know that nations are not eternal, but come and go; sometimes they disappear. From Peoples into Nations tells their story.
