

Worldwide Rules Passenger Air Tariff

This is a policy oriented and comparatively oriented textbook on air and space law for students and practitioners. It covers the history and development in air and space law; their interrelationships with the law of the seas and the law of Antarctica; institutions working in the field of air and space law; sovereignty in national penal air law; private international air law, especially liability law; and public and private space law. Much attention is devoted to the law of air commerce: bilateral air services agreements; inter-airline co-operation; the effect of competition, antitrust and European Union law; deregulation, privatization and commercialization of air transport; ownership and control of airlines, and airline alliances; multilateralisation of air transport; and congestion and environmental controls. The last chapter of the book briefly deals with the legal aspects of commercial outer space application. Increasingly, air transport, both in fact and in law, is becoming an ordinary industry like any other and is being treated as such. Rapidly, commercial outer space activities are being privatized and commercialized.

The Canadian Yearbook of International Law is issued annually under the auspices of the Canadian Branch of the International Law Association (Canadian Society of International Law) and the Canadian Council on International Law. The Yearbook contains articles of lasting significance in the field of international legal studies, a notes and comments section, a digest of international economic law, a section on current Canadian practice in international law, a digest of important Canadian cases in the fields of public international law, private international law, and conflict of laws, a list of recent Canadian treaties, and book reviews.

Ratemaking in international air transport is a matter of vital importance for airlines, consumers and Governments. For airlines, because the level of international air fares and rates forms one of the bases of their profit-making ability. For consumers, because that level determines whether they can afford the use of international air transport. For Governments, because they, as the guardians of the interests of both the airlines and the consumers, have the task to strike a just balance between those interests. International air fares and rates are of two kinds: scheduled and non-scheduled. The International Air Transport Association (IATA), the trade association of the world's scheduled international airlines, determines, under Governmental supervision and control, uniform fares and rates for scheduled international air services. These services account for approximately seventy-five percent of total international air traffic. The remaining twenty-five percent consists of non-scheduled, or charter international air services. International charter air fares and rates are by and large set by the free forces of the marketplace, and compete with scheduled international (IATA) air fares and rates. This book studies both scheduled and charter international air fares and rates. It examines the role of airlines, airline associations and Governments in the international ratemaking process. Furthermore, it analyses the competitive relationship between charter and scheduled international air fares and rates.

Rev. ed. of : Antitrust law developments (fifth). c2002.

The Proceedings of the Conferences on Air and Space Law, organized in Asia by the Asian Institute of Air and Space Law, are establishing themselves as a major source of up-to-date and thought-provoking literature on the latest international developments. The organizers have again succeeded in attracting the most influential and provocative contributors, and their well-edited papers make a significant addition to the worldwide discussions on the vital question of the use of Air and Outer Space.

Written by one of the world's leading international lawyers, this is a landmark publication in the teaching of international law. International law can be defined as 'the rules governing the legal relationship between nations and states', but in reality it is much more complex, with political, diplomatic and socio-economic factors shaping the law and its application. This refreshingly clear, concise textbook encourages students to view international law as a dynamic system of organizing the world. Bringing international law back to its first principles, the book is organised around four questions: where does it come from? To whom does it apply? How does it resolve conflict? What does it say? Building on these questions with both academic rigour and clarity of expression, Professor Klabbbers breathes life and energy into the subject. Footnotes point students to the wider academic debate while chapter introductions and final remarks reinforce learning.

An entry-level training manual and reference for travel agency managers, this text covers selling techniques, reservation procedures, marketing and selling ideas. It contains updated rules and regulations governing travel agents, and new information on tours, hotels, car rentals, and cruises. For professional travel agents and all those interested in a career as a travel agent.

Ratemaking in International Air Transport A Legal Analysis of International Air Fares and Rates Springer Science & Business Media

This book assesses the present status of space activity regulation against the background of the progressive commercialization of outer space. The basic legal framework for outer space activity was established during a time when space endeavour was still in its infancy & a critical reassessment of its principles therefore forms the basis of this publication. The outcome of this analysis & the legal implications which result from applying it to practical space utilization yield an insight into the legal questions pertaining to space commercialization & its practical implementation. Commercial Utilization of Outer Space will be of great interest to academics & practitioners in the field of space activities, as well as to government policy makers in different sectors of space commercialization ranging from space transportation, satellite communication & remote sensing to space insurance & manufacturing in outer space. Wherever appropriate & feasible practical aspects have been dealt with against the background of present-day realities & developments foreseen for the future.

This book addresses the lack of binding multi-lateral international agreement on cartels, through analysis of trials and failures. It also suggests strategic approaches to overcome current standstills. In addition, the book contrasts international agreement on cartels with inter-governmental commodity agreement which has been developed separately through international law.

Through this project, the author puts forth that successful international law on cartels needs to reflect the interests and arguments of developing countries.

Drawing upon hundreds of mainly secondary sources, this book answers three questions: how did air transportation develop in the century after the Wright Brothers, what does it mean to live in an airborne world, and what is the future of aviation in this century?

Taking a global and multidisciplinary approach, The SAGE International Encyclopedia of Travel and Tourism brings together a team of international scholars to examine the travel and tourism industry, which is expected to grow at an annual rate of four percent for the next decade. In more than 500 entries spanning four comprehensive volumes, the Encyclopedia examines the business of tourism around the world paying particular attention to the social, economic, environmental, and policy issues at play. The book examines global, regional, national, and local

issues including transportation, infrastructure, the environment, and business promotion. By looking at travel trends and countries large and small, the Encyclopedia analyses a wide variety of challenges and opportunities facing the industry. In taking a comprehensive and global approach, the Encyclopedia approaches the field of travel and tourism through the numerous disciplines it reaches, including the traditional tourism administration curriculum within schools of business and management, economics, public policy, as well as social science disciplines such as the anthropology and sociology. Key features include: More than 500 entries authored and signed by key academics in the field Entries on individual countries that details the health of the tourism industry, policy and planning approaches, promotion efforts, and primary tourism draws. Additional entries look at major cities and popular destinations Coverage of travel trends such as culinary tourism, wine tourism, agritourism, ecotourism, geotourism, slow tourism, heritage and cultural-based tourism, sustainable tourism, and recreation-based tourism Cross-references and further readings A Reader's Guide grouping articles by disciplinary areas and broad themes

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The terms travel and tourism are often used interchangeably in tourism literature. This comprehensive textbook provides students with essential knowledge of the intricate relationship existing between travel, transport and tourism. The book analyses the structure, functions, activities, strategies and practices of each of the sectors in the travel industry, such as airlines, airports, tour operators, travel agencies and cruises. It is structured into six parts, covering all modes of transport (air, land and water), travel intermediation, the tour operation business and impacts and prospects for the future. International case studies are integrated throughout to showcase practical realities and challenges in the travel industry and to aid students' learning and understanding. Written in an accessible and engaging style, this is an invaluable resource for students of tourism, hospitality, transport and travel management courses.
