"I've paged through stacks of books on the history of watches. . . . But I hadn't come across a book that actually moved me until I picked up A Man and His Watch. The volume is filled with heartfelt stories." —T: The New York Times Style Magazine Paul Newman wore his Rolex Daytona every single day for 35 years until his death in 2008. The iconic timepiece, probably the single most sought-after watch in the world, is now in the possession of his daughter Clea, who wears it every day in his memory. Franklin Roosevelt wore an elegant gold Tiffany watch, gifted to him by a friend on his birthday, to the famous Yalta Conference where he shook the hands of Joseph Stalin and Winston Churchill. JFK's Omega worn to his presidential inauguration, Ralph Lauren's watch purchased from Andy Warhol's personal collection, Sir Edmund Hillary's Rolex worn during the first-ever summit of Mt. Everest . . . these and many more compose the stories of the world's most coveted watches captured in A Man and His Watch. Matthew Hranek, a watch collector and NYC men's style fixture, has traveled the world conducting firsthand interviews and diving into exclusive collections to gather the never-before-told stories of 76 watches, completed with stunning original photography of every single piece. Through these intimate accounts and Hranek's storytelling, the watches become more than just timepieces and status symbols; they represent historical moments, pioneering achievements, heirlooms, family mementos, gifts of affection, and lifelong friendships.

The essential guide for the collector of mechanical wristwatches, with complete information on over 1,400 models from some 130 international brands With Wristwatch Annual, collectors have at hand a wealth of information on the latest offerings from today's most important watch producers, from Swiss mainstays like Rolex and Patek Philippe to the maverick independent brands springing up across Europe and the U.S. The book is arranged alphabetically by producer, and the movement, functions, case, band, price, and variations of each pictured watch are fully described. This year's edition, like its predecessors, will feature a variety of additional articles on independent watchmaking, key personalities in the watch world, and the technical aspects of horology. An illustrated glossary and a primer on watch care help acclimate the reader to the world of fine timepieces.

Now in its third edition, this easy-to-use guide to vintage mechanical watches lists 1,300 timepieces that are accompanied by a color photograph; a description of the movement case and special features or historical significances; and an estimated value based on recent auction results. Original. 7,000 first printing.

-A fantastic reference work for the novice or the seasoned watch enthusiast-Fully illustrated with 470 color photographs-Brand-Agnostic. Features a vast array of timepieces from over 90 manufacturersDespite the functional obsolescence of the mechanical wristwatch (our phones and computers tell more accurate time) the early 21st Century has seen a boom in the development, production, and appreciation of all things horological. Whether it is presented to the collector as an alternative investment, as a feat of micro-mechanical technology, or as a showcase of artisanal mastery, the mechanical wristwatch has never possessed more forms, functions or facets than it does today. The Wristwatch Handbook is written from the epicenter of a renaissance, a place in time between the Quartz revolution and the rise of the smart device - where the mechanical

wristwatch is the antidote to the microprocessor and the permanent buzz of your inbox. From the multi-axis tourbillon, to the split-second chronograph, to the sidereal sky chart, The Wristwatch Handbook covers it all and does so with more than 470 rich illustrations from over 90 of the World's leading brands. The book is separated into two sections. The first section provides the reader with a comprehensive understanding of the mechanical movement. Its chapters explore power, transmission, distribution and regulation illustrating the basic concepts before considering the innovation and complexity that takes place further toward the cutting edge. From the fifty-day power reserve, to the constant force mechanism, and the 1,000Hz mechanical escapement, section 1 will allow the reader to understand and appreciate what is happening beneath the dial of their watch. Section two allows the reader to take this understanding and apply it to the vast range of complications (functions) that exist in modern horology. Each chapter showcases a distinct category of complication. For example, the regatta timer, pulsometer, and monopusher chronograph join a host of others in a chapter entitled 'Recording Lapses of Time'; The power reserve indicator, dynamograph, and crown position indicator are featured in a chapter for 'Power and Performance Indication'; The moon phase indicator, annual calendar, and planetarium can be found in the 'Astronomical Complications' chapter. Once the functional categories are exhausted, the final three chapters explore whimsical complications that have little regard for practical function, novelty time indication, and the 'super-complicated' watch - a rare breed of timepiece that houses an intimidating host of complications featured throughout the book. Upon completion of The Wristwatch Handbook the reader will be able to identify even the most exotic complication from across the room, and be able to share their appreciation and understanding of what makes it so useful and compelling. The Wristwatch Handbook is "brand agnostic", using only those watches that most aptly illustrate the given subject-matter. As a consequence the book places equal emphasis on the classic and the cutting edge, on watches produced in large volume or exclusive runs, by industry-leading technology or at the hand of a master. In doing so the book provides an unparalleled range of watches from over 90 brands, allowing the reader to determine for themselves which brands, complications, and styles they will build their collection from.

Patek Philippe & Co. the Swiss luxury watch manufacturer was founded in 1839 and remains to this day a family owned company (it was acquired in the 1930s by the Stern family). Amongst many firsts, Patek was the first company to make a wrist watch and in 1933 Patek Philippe produced the first ultra-complicated (24 function) pocket-watch for Henry Graves, Jr., known as 'The Supercomplication'. The watch was auctioned at Sotheby's in November 2014 for \$24,000,000, the most expensive timepiece ever sold. In 2014 it was revealed that Brad Pitt had paid \$3m for a rare Patek Philippe 'J.B. Champion Observatory watch' as a gift for Angelina Jolie. Patek have commissioned Preface and Penguin Random House to create the definitive history of the company to celebrate their 175 anniversary. Overseen personally by owner Philippe Stern, Patek have opened their unique archive of timepieces and given the author complete access to their museum in Geneva. Patek have created a new archive of photographs especially for the book. Two years in preparation, this book is eagerly awaited by the millions of watch collectors around the world and will garner as much fanfair as the launch of one of their prestigious new designs.

Time passes, time is captured, time flies-and in no other place does it do those things better than in the hands of the twelve men whose narratives make up the substance of 12 Faces of Time. Each of these epoch-making watchmakers active in the realm of haute horlogerie has a distinct story to tell; in the hands of these masters, time becomes tangible, perpetual, and personal. 12 Faces of Time portrays well-known horological figures such as François-Paul Journe, Vianney Haller, and Philippe Dufour as they've never been seen before and also provides unique insight into major independent horologists like Finnish chronometer specialist Kari Voutilainen, Felix Baumgartner of Urwerk fame, triple-axis tourbillon technician Thomas Prescher, German wunderkind Volker Vyskocil, English contender to the horological crown Roger Smith, resonance specialist Beat Haldimann, and Paul Gerber, Guinness Book of world Records holder. Two men very rarely seen in the press are also portrayed here: Dr. Ludwig Oechslin is not only the curator of the Musée International d'Horlogerie in La Chaux-de-Fonds, but also the movement de-signer of some of Ulysse Nardin's most complicated and forward-thinking works of art and creator of the MIH watch. Kenji Shiohara is the innovative Japanese watchmaker who founded a mini-department for high watchmaking within Japan's gargantuan Seiko Corporation, bringing forth the first Japanese-themed and expertly finished sonnerie-using Seiko's Spring Drive movement as the basis. These twelve technical magicians are portrayed in their own environments along with plenty of their mechanical wizardry, providing impressions of what makes them unique. 12 Faces of Time is not only for passionate aficionados of high watchmaking, but anyone interested in artistic photography and beautiful imagery. A feast for all of the senses, you can expect to practically hear the ticking of the rare and unique timepieces alongside the exotic accents of the masterful thinkers and gifted watchmakers speaking from the pages to introduce their life's work-one that comprises an age-old craft. Embodying the animated yin-yang that is modern mechanical watchmaking, these twelve faces of time represent very different corners of the highest level of watchmaking: individual-and individualistic-styles of this timeless mechanical art.

The Magic of Watches comes back to the origins of the measurement of time: how did we go from the water clock to the wristwatch? The Magic of Watches dares to speak about technique: how does a mechanical movement work? How does a quartz watch work? The Magic of Watches delves into details: what is a "complication" and when do we speak about "chronometer"? The Magic of Watches likes art: how do we enamel a dial? The Magic of Watches is unique: it focuses in detail on the basics in order to understand and love watches better.
