Written in highly readable layman's language, Fundamentals of Venture Capital is a concise introduction to the key issues facing both investors and entrepreneurs as they embark on the journey of turning a good idea into a profitable reality.

European private equity investment reached €47 billion in 2005, up 27% from 2004. Funds raised for private equity were €72 billion, up 250% on the previous year, both figures being all time highs. Raising Venture Capital Finance in Europe provides business owners, entrepreneurs and investors alike with a step-by-step approach to exploiting this market and funding new projects effectively. Written by Keith Arundale, an advisor and commentator on the European and US VC and private equity industry for over 20 years, the guide blends business experience with practical approaches to enable the reader to maximize the opportunities available. The book includes a series of real-life case studies from venture capitalists and entrepreneurs from around Europe, each with practical tips for successful venture capital finance raising. With forewords from Sir Paul Judge (Chairman, Enterprise Education Trust) and Patrick Sheehan (Chairman, Venture Capital Committee, European Private Equity and Venture Capital Association) the book begins with a brief introduction to the field, including an analysis of current trends and issues in the industry, and goes on to provide a detailed framework for an objective assessment of each business opportunity. The book looks at sources of finance and private equity, shows how to write a successful business plan, details the entire investment process, and considers the tax and legal issues involved. A particular feature of the book is that it looks at the topic from both sides - showing what the venture capitalist is looking for as well as detailing how an entrepreneur or business owner can make proposals attractive to those investors. This means that the reader will be able to minimize time wasted on unnecessary activities and therefore develop investment approaches which are succinct, relevant, and give every chance of success.

Letter writing was widespread in the Graeco-Roman world, as indicated by the large number of surviving letters and their extensive coverage of all social categories. Despite a large amount of work that has been done on the topic of ancient epistolography, material and formatting conventions have remained underexplored, mainly due to the difficulty of accessing images of letters in the past. Thanks to the increasing availability of digital images and the appearance of more detailed and sophisticated editions, we are now in a position to study such aspects. This book examines the development of letter writing conventions from the archaic to Roman times, and is based on a wide corpus of letters that survive on their original material substrates. The bulk of the material is from Egypt, but the study takes account of comparative evidence from other regions of the Graeco-Roman world. Through analysis of developments in the use of letters, variations in formatting conventions, layout and authentication patterns according to the sociocultural background and communicational needs of writers, this book sheds light on changing trends in epistolary practice in Graeco-Roman society over a period of roughly eight hundred years. This book will appeal to scholars of Epistolography, Papyrology, Palaeography, Classics, Cultural History of the Graeco-Roman World.
