When it was first published (in 1991), Political Agenda of Education was hailed as an outstanding contribution to educational theory. This thoroughly revised edition sharpens the focus and explanatory range of the original framework. In particular, the author has

incorporated the complex terrain of gender and girls' education while bringing in a more nuanced discussion of caste as a factor of equality in educational opportunity. The book is divided into two parts. Part I analyzes the circumstances surrounding the establishment of a colonial system of educational administration and the implications it had for both teaching and curriculum. Part II locates educational reform within the dynamics of the three major quests of the freedom struggle: the demand for equal participation in education by the lower castes; the quest for self-identity; and the idea of progress. Krishna Kumar uses the history of ideas to develop insights which are highly relevant for the challenges facing the system of education in India and the rest of South Asia today.

The Children of Sorrow is not a fictitious literature though it is written in a fashion of a novel. It is a kind of historical document of particular period. What author has done only that he recreated all characters and thrown into new and dramatic circumstances. This is a lamentable tale of untouchables who were victims to unequal social system, poverty and discrimination. The author minutely observed the twists and turns in their life till their involvement in three point formula of Dr Ambedkar "educate, organise and agitate". The author explained how the untouchables were trapped in poverty, hunger, dearth and starvation at all times. How the villages were turned in to prison by the high caste people and how the untouchables put to torture there with a view to castrate their brain and morale. Cruelty was the law of the land and it was destroying them physically and spiritually. They were rendered to that position where the crocodile tears also didn't fall to their share.
