How many times are kids supposed to study Gandhi? Come September and out comes the bald head wig, round glasses, white dhoti, tall stick ... that's about the extent of how today's kids engage with the Mahatma. Chandrashekhar is one such teen. Bored by the annual Gandhi projects, he wonders if his teacher is being too unreasonable in asking them to "BE" Gandhi. And then, his world is shaken by events that rock him to the core, forcing him to dig deep and not just find his 'inner Gandhi', but become Gandhi. Not for a day or two. But, maybe even, for life. This is a novel that explores, not Gandhi the man or his life as a leader, but really the Gandhian way that must remain relevant to us. Especially today when the world is becoming increasingly steeped in violence and hate. Anand Kumar, a mathematics prodigy, defied all challenges to set up one of the most successful and innovative teaching initiatives in the world—Super 30. Born in Chandipur Bela, Patna, Anand secured a place in Cambridge University but couldn't attend because he had no money and sold papads in the evenings instead. He dealt with his own disappointment by setting up an innovative school in 2002 to prepare underprivileged students for the IIT JEE examination. Super 30 has an astonishing success rate and on an average, twenty-seven to twenty-

eight of the thirty students crack the exam every year. Stirring and heart-wrenching, this is the extraordinary story of a visionary who has elevated these bright sparks and, through education, given them hope to rise above crippling poverty.

In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In *Educating One and All*, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"--the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. *Educating One and All* examines the curricula and expected outcomes of standards-based education and the educational experience of students

with disabilities--and identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.

The tale unravels his contrarian and controversial bets that made Sun a global force, and him a 'turn-around' artist. Hinduism for GenNext !On the 23rd of April 2004, I was flying from JFK Airport, New York City to SFO to attend a press meeting at Monterey, California. An American girl was sitting right beside me, near the window. After some time, she smiled and we introduced ourselves to each other. I told her that I am from India. Instantaneously, the girl enquired, "What's your faith?" "What?" I asked as I didn't understand the question. "I mean, what's your religion? Are you a Christian or a Muslim?" she elaborated her question. "No!" I replied, "I am neither Christian nor Muslim." With a perplexed look, she questioned, "Then who are you..." "I am a Hindu", I said. She gazed at me as if seeing a caged animal. She could not understand what I was talking about....- These are

opening sentences of my article "Am I a Hindu?" written long ago. Most of the readers would be familiar with this article as this happened to be most shared article on Hinduism for Westerners. Many readers, especially parents of non-resident Indians told me to write a book on the similar line. It took me many years of research and study to complete this book. The 'Why Am I a Hindu?' gives a fresh perspective, mostly with a twist in the tale in a breezy, conversational style that makes even weighty philosophical discussions easy to digest. Opinion of those who read the first few chapters' draft: "A must-read for those who wish to gain a deeper, clearer understanding of issues related to Sanatan Dharma." Ajit Menon. "I find your chapters very thought provoking and insightful. Both my wife and I consider ourselves seekers of truth and enlightenment and your writings evoke great wisdom within this arena. Now, I myself follow eastern spiritual philosophy." Al Sanchez. "This book is a simple gateway to understanding the uncomplicated ways of otherwise seemingly complex Sanatan Dharma through conversations between the author and his friends or readers. The author explains the science, logic and rational of Sanatan Dharma in a very simple, lucid and reader-friendly style. The hardcore Vedic philosophy is made ridiculously simple for the beginners." Anita Sharma. "It is non-fiction, but you can read it as if you are reading a compelling fiction novel. It is really a fun book to read. And you will understand the rational, logic and science of our culture and traditions." Sahana Madhyastha. "This would be the best gift you can present to the younger generation to understand the

science of Sanatan Dharma to begin with following which it can be practiced in daily life to avoid stress and lead a peaceful happy life." Josh Matthew

A deranged mother, a wayward father, a horde of gold, a naïve young man, and a mysterious but beautiful Lady. . . . These are the ingredients of a coming-of-age tale in which our hero grapples with the elements, his sense of morality, and the Devil himself, and eventually finds salvation at the hands of an entirely selfless but sibylline Lady in Green. The Mountain of Gold addresses themes of love, doubt, avarice, and the liberating and redemptive powers of self-sacrifice.

A guide to systematic, as opposed to incidental, ad-hoc innovation Innovation need not only be jugaad. For the first time a book shows us how in India, innovation can be introduced in one's organization in a systematic, deliberate way. 8 Steps to Innovation explains how you can do this by building an idea pipeline in your organization, improving the velocity of ideas coming in, and implementing the ideas within the given constraints. All this is shown through nice, snappy examples, mostly homegrown Indian ones. Few books in the market talk about innovation in the Indian context with Indian examples as this one does.

Imagine a management philosophy based not upon serving a company's customers, but on serving the company's employees. Vineet Nayar, CEO of HCL Technologies in India, has put such a philosophy into practice with remarkable results. His "employee first, customer second" mantra has been recognized globally as an example of organizational innovation, and was deemed a "new and radical management philosophy" ripe for the picking in the Western world by Business Week. In this book, Nayar himself describes his blunt refusal to treat the flesh and blood of HCL--its people--as "human resource" or as "intellectual capital" or even as an asset like all its other assets--and how his unique perspective led to an holistic transformation of his organization. By putting employees on top of the organizational pyramid, he argues, your company can fully realize the value created in the interface between customers and employees. This book leads managers and executives through the five core aspects of Nayar's approach, demonstrating how to create a sense of urgency, overhaul incentives and reporting structures, foster transparency in communications and feedback, provide platforms for achievement and personal growth, and finally recognize the potential of every individual in the organization. The "Employee First" philosophy should be the fulcrum of the transformation journey of any organization.
