Baffled by benzines? Confused by carboxylic acids? Here's the help you need—in plain English!

You're no idiot of course. You know that Albert Einstein came up with the famous "E=mc" equation and that his hair looked like it had survived a nuclear test blast. But when it comes to understanding his theories and how they changed the world--well, you're no Einstein. Don't go nuclear yet! The Complete Idiots Guide to Understanding Einstein shows how relatively easy--and fun--it can be to learn and appreciate the world of physics and Einstein's brilliant accomplishments. Designed for students in Nebo School District, this text covers the Utah State Core Curriculum for chemistry with few additional topics.

This book provides an authoritative introduction to the rapidly growing field of chemical reaction network theory. In particular, the book presents deep and surprising theorems that relate the graphical and algebraic structure of a reaction network to qualitative properties of the intricate system of nonlinear differential equations that the network induces. Over the course of three main parts, Feinberg provides a gradual transition from a tutorial on the basics of reaction network theory, to a survey of some of its principal theorems, and, finally, to a discussion of the theory's more technical aspects. Written with great clarity, this book will be of value to mathematicians and to mathematically-inclined biologists, chemists, physicists, and engineers who want to contribute to chemical

reaction network theory or make use of its powerful results.

The world's most comprehensive, well documented and well illustrated book on this subject. With extensive subject and geographical index. 338 photographs and illustrations, many old and rare, many recent in color. Free of charge in digital PDF format on Google Books.

Pick up S.T.E.A.M. with experiments in science, chemistry, technology, engineering and more! Inspired by Netflix's original series, Project Mc2 (TM), The Pretty Brilliant Experiment book has over 20 experiments introduced by our favorite Nov8 (that's Innovate) agents: McKeyla McAlister, Adrienne Atoms, Bryden Bandweth, and Camryn Coyle. Learn about electricity, chemical reactions, physics, and biology while crafting an hour glass, creating crystals, and making ice cream! Then record your own observations after reading the scientific analysis accompanying each activity. The ingredients are affordable and easy-to-find, and each DIY experiment can be completed safely at home with parents and friends. Based on a NETFLIX original series. On October 28th 1890 the great wall of the Barsdon Dam gave way, and the Eagle Star reservoir buried the small Arizona town of Jackson Hope under forty feet of water. Men, women and children perished in the devastating flood, nobody survived. For over a hundred years the town lay forgotten at the bottom of a vast lake, but it has been a particularly harsh summer in Arizona, and the town is starting to emerge. Experts will come and survey the land, hoping to prospect for a bright and lucrative new project, but they will get more than they bargained for. Bit by bit they will uncover the truth behind the disaster which wiped a small farming community off the map, and as they do they will learn with devastating consequences that some secrets should stay buried forever.
