The author and every male member of his immediate family served in the Vietnam war. In 1988, his older brother, Elmo, died from Agent Orange-related cancers linked to his service as a Swift Boat commander during the Vietnam war. In a bitter irony, it was the actions of his father, Admiral Elmo R. Zumwalt, Jr., in ordering the spraying of Agent Orange when he commanded all US naval forces in Vietnam that sealed his brother's fate. People react differently to grief. For the author, it turned to animosity, directed against not only the war but also the enemy against whom we had fought. In 1994, traveling to Vietnam for the first time since the war, he met with Vietnamese leaders to discuss the Agent Orange issue. In doing so, it provided him with the opportunity to learn about the conflict from the perspective of those who had fought it on the other side of the battlefield. As these former enemy veterans began sharing their personal stories of hardship and tragedy-one of which was not too dissimilar from the author's own-he was struck by a stark realization. As difficult and tragic as the war had been for Americans who served, it had taken as much, if not greater, a toll on the Vietnamese. In war, there are never winners-and Vietnam was no exception. Returning to Vietnam more than 50 times to interview hundreds of North Vietnamese Army (NVA) and Viet Cong (VC) veterans, in addition to Vietnamese civilians, the author obtained a better understanding as to the extent of our former enemy's suffering during that war. The result was a metamorphosis, which changed his attitude towards a former foe. "Bare Feet, Iron Will" became the vehicle by which he shares what this metamorphosis taught him. In "Bare Feet, Iron Will" are stories of intrigue, of patience, of ingenuity, of dedication and, most importantly, about a people with no option other than victory. These stories, share unique insights about the war. Intriguing insights evolving into odd coincidences-such as what led a Vietnamese veteran to write a novel, praised by Western critics, about the war; an interview where the author would learn the interviewee had tried to assassinate his father; the earlier-than-realized first American casualty of the Vietnam conflict and what that incident would portend for US involvement. About Vietnam's allies-including China, a country with which Vietnam has fought in almost every century and how China sought at times to give the appearance of helping North Vietnam while not doing so and North Korea, which pressured to send pilots to fight the Americans, only to have Hanoi send the Koreans home, trying to hide their participation by burying North Korean pilots in an obscure cemetery. More than a generation after the war in Vietnam ended, many Americans are still haunted by its memory. More than thirty-four years after the fall of Saigon, it is time to better understand the enemy we fought and the role their "iron will" played. And with that understanding, hopefully many may find the healing they seek.

Securitisation Law: EU and US Disclosure Regulations sets out the relevant regulations governing asset backed securities in the US and the EU. It provides the most up-to-date commentary and checklists alongside practical aids such as flow charts relating to disclosure regulations of asset backed securities governed by the EU prospectus directive and prospectus regulation, and the US Regulation AB. The book also contains a discussion on the latest case law (including case studies) and critical legal issues. One of the unique features of this book is its international scope. It is intended to meet the demand of international practitioners, and also to set out a comparative

methodology that will allow practitioners to decide regulatory compliance issues relating to a particular jurisdiction and to help determine whether a particular approach is sufficiently credible against comparative benchmarks, which is increasingly pivotal in the current economic climate.

Hyperbole and a Half Unfortunate Situations, Flawed Coping Mechanisms, Mayhem, and Other Things That Happened Simon and Schuster

This once banned book is the first colonial-era Vietnamese novel to be translated into English and published in the West

As he watches her refuse to defend her innocence, Michael gradually realizes that Hanna may be guarding a secret she considers more shameful than murder.

A decade-long hydrocarbon boom has led to a fast rise of average incomes and spurred a large scaling up of investment spending on infrastructure, although progress on social indicators has been slow. With hydrocarbon extraction shifting into a trend decline in the context of weak oil prices outlook and still high capital spending, the fiscal position has weakened and fiscal buffers diminished.

Brosh’s debut marks the launch of a major new American humorist who will surely make even the biggest scrooge or snob laugh. We dare you not to. FROM THE AUTHOR: This is a book I wrote. Because I wrote it, I had to figure out what to put on the back cover to explain what it is. I tried to write a long, third-person summary that would imply how great the book is and also sound vaguely authoritative—like maybe someone who isn’t me wrote it—but I soon discovered that I’m not sneaky enough to pull it off convincingly. So I decided to just make a list of things that are in the book: Pictures Words Stories about things that happened to me Stories about things that happened to other people because of me Eight billion dollars\* Stories about dogs The secret to eternal happiness\* \*These are lies. Perhaps I have

underestimated my sneakiness!

'Of ways you may speak, but not the Perennial Way; By names you may name, but not the Perennial Name.' The best-loved of all the classical books of China and the most universally popular, the Daodejing or Classic of the Way and Life-Force is a work that defies definition. It encapsulates the main tenets of Daoism, and upholds a way of being as well as a philosophy and a religion. The dominant image is of the Way, the mysterious path through the whole cosmos modelled on the great Silver River or Milky Way that traverses the heavens. A life-giving stream, the Way gives rise to all things and holds them in her motherly embrace. It enables the individual, and society as a whole, to harmonize the disparate demands of daily life and achieve a more profound level of understanding. This new translation draws on the latest archaeological finds and brings out the word play and poetry of the original. Simple commentary accompanies the text, and the introduction provides further historical and interpretative context. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

"Hitchens presents a George Orwell fit for the twenty-first century." --Boston Globe In this widely acclaimed biographical essay, the masterful polemicist

Christopher Hitchens assesses the life, the achievements, and the myth of the great political writer and participant George Orwell. True to his contrarian style, Hitchens is both admiring and aggressive, sympathetic yet critical, taking true measure of his subject as hero and problem. Answering both the detractors and the false claimants, Hitchens tears down the façade of sainthood erected by the hagiographers and rebuts the critics point by point. He examines Orwell and his perspectives on fascism, empire, feminism, and Englishness, as well as his outlook on America, a country and culture toward which he exhibited much ambivalence. Whether thinking about empires or dictators, race or class, nationalism or popular culture, Orwell's moral outlook remains indispensable in a world that has undergone vast changes in the seven decades since his death. Combining the best of Hitchens' polemical punch and intellectual elegance in a tightly woven and subtle argument, this book addresses not only why Orwell matters today, but how he will continue to matter in a future, uncertain world. For use in schools and libraries only. forgotten by RATIONAL scientists: Dog's living maybe better than Autistic kid's Felt signs caught by the Religious leader, artist, Educator, better than Ph.D., Scientist & Autistic machine. So NLP, affirmation, meditation is better than medicine, punishment How can we heal, prevent, treat the things we do not know? A lot of resources put in researching and carrying out but the trend of Suicide, Autism, ADHD, Gunfire are Soaring??? REDEFINE OF STRESS The right definition of stress: human beings have basic human needs described by Abraham Maslow. Anything threatens of satisfying these needs will lead to Fight and Flight responses. IF people cannot change the situation, threaten, they will be the victims of STRESS AND STRESS HORMONES. No need to do the research, just see the fact of modern, developed, abundant world. Suicide claims more lives than war, murder, and natural disasters combined. General In 2015 (latest available data), there were 44,193 reported suicide deaths in the U.S. Suicide is the 2nd leading cause of death for those between the ages of 15 and 34 in the United States. Currently, suicide is the 10th leading cause of death in the United States. A person dies by suicide about every 12.8 minutes in the United States. Every day, approximately 121 Americans take their own life. Ninety percent of all people who die by suicide have a diagnosable psychiatric disorder at the time of their death. There are four male suicides for every female suicide, but three times as many females as males attempt suicide. 494,169 people visited a hospital for injuries due to self-harm behavior, suggesting that approximately 12 people harm themselves (not necessarily intending to take their lives) for every reported death by suicide. Pavlov has taught about Conditioned Reflex. NLP take advantages of this with the science of mind and achievement. All art of communicating is using the knowledge of mind to talk, discuss and persuade people based on the need of people. THINGS ALL SHOULD KNOW IS PEOPLE ARE CONTROLLED BY HUMAN DRIVE: certainty, uncertainty, love and connection, significance, Growth, and contribution... Anger, anxiety, behavior, depressed, name, lack of mindfulness, lack of concentration, taboo, fear, happiness are Conditioned Responses; they are unconsciously coded and silently control us. It can explain why Alternative therapies help. So best of all is an effective combination...

This is the first in the PALI Language Text series to deal with a Southeast Asian language. The author's approach in this pronunciation guide owes much to the methodology pioneered by Charles Fries. A basic assumption of this approach is that in learning a new language the problem is not first of all learning vocabulary but "mastery of the sound system." Moreover, the problems of learning a new sound system vary with the native language of the student. This manual is designed specifically for the English-speaking student and concentrates on the particular difficulties an English-speaking person would have in learning to speak Vietnamese. There are no outstanding grammatical differences in the three main Vietnamese dialects, but there are some significant phonological differences. The Saigon dialect forms the main core of the lessons here, but materials and drills of

standard Hanoi Vietnamese have been included in review lessons for recognition purposes.

From one of the greatest spiritual leaders of the twentieth century, *Creativity: Unleashing the Forces Within* will inspire you to nurture your inner ideas and innovations—and apply them in every aspect of your life. As Osho points out in this book’s foreword, historically, the creative person has been all but forced to rebel against the society. But nowadays, the situation has dramatically changed. In today’s world, the ability to respond creatively to new challenges is demanded of everybody, from corporate CEOs to “soccer moms.” Those whose toolbox for dealing with life includes only what they have learned in the past from their parents and their teachers are at a distinct disadvantage both in their relationships and in their careers. Making a switch from imitative and rule-bound behavior to creative innovation and flexibility requires a profound change in our attitudes about ourselves and our capabilities. *Creativity* is a handbook for those who understand the need to bring more creativity, playfulness, and flexibility to their lives. It’s a manual for thinking “outside the box”—and learning to live there as well. Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the *Sunday Times* of London as one of the “1000 Makers of the 20th Century” and by *Sunday Mid-Day* (India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world. How do you find your original self? Osho perceives man as becoming increasingly alienated from his inner self, gradually losing his natural innocence and creativity in the mindless quest for worldly power and success. To appear strong, the average man suppresses his innate qualities of love and compassion. For Osho, the ideal man is Zorba, the Buddha—a perfect blend of matter and soul. This seamless collection of discourses takes the reader through the various stages of man’s evolution: from Adam to Slave, Son, Homosexual, Priest and Politician, until he attains the pinnacle of his consciousness as the Rebel or Zorba. Sparkling with anecdotes and enriched with brilliant repartee, *The Book of Man* is a remarkable blend of wisdom and wit.

This book sheds new light on the dynamics of the colonial encounter between Britain and India. It highlights how various analytical approaches to this encounter can be creatively mobilised to rethink entanglements of memory and identity emerging from British rule in the subcontinent. This volume reevaluates central, long-standing debates about the historical impact of the British Raj by deviating from hegemonic and top-down civilizational perspectives. It focuses on interactions, relations and underlying meanings of the colonial experience. The narratives of memory, identity and the legacy of the colonial encounter are woven together in a diverse range of essays on subjects such as colonial and nationalist memorials; British, Eurasian, Dalit and Adivasi identities; regional political

configurations; and state initiatives and patterns of control. By drawing on empirically rich, regional and chronological historical studies, this book will be essential reading for students and researchers of history, political science, colonial studies, cultural studies and South Asian studies.

In *The Gifts of Adversity*, Dr. Carolee Tran vividly recounts her harrowing escape out of Vietnam with her family during the fall of Saigon and the obstacles they faced in pursuing the American dream, including the traumas of the Vietnam War, polio, forced relocation to the U.S., bullying, and experiences of racism. She also describes her history of sexual abuse by a Catholic priest for seven years, its impact on her life, and how she found the strength to extricate herself from the perpetrator's control. Dr. Tran reflects on how overcoming these adversities have given her some great gifts-what she refers to as "the gifts of adversity." This moving and inspiring book is a human story about trauma, hope, resilience, and the power of the human spirit to survive and thrive under the most difficult circumstances.

A major new novel from the most important Vietnamese author writing today Duong Thu Huong has won acclaim for her exceptional lyricism and psychological acumen, as well as for her unflinching portraits of modern Vietnam and its culture and people. In this monumental new novel she offers an intimate, imagined account of the final months in the life of President Ho Chi Minh at an isolated mountaintop compound where he is imprisoned both physically and emotionally, weaving his story in with those of his wife's brother-in-law, an elder in a small village town, and a close friend and political ally, to explore how we reconcile the struggles of the human heart with the external world. These narratives portray the thirst for absolute power, both political and otherwise, and the tragic consequences on family, community, and nationhood that can occur when jealousy is coupled with greed or mixed with a lust for power. *The Zenith* illuminates and captures the moral conscience of Vietnamese leaders in the 1950s and 1960s as no other book ever has, as well as bringing out the souls of ordinary Vietnamese living through those tumultuous times.
