The concepts are explained often with illustrative examples and case studies. In particular, the book presents an in-depth coverage of: Applications of SVC, TCSC, GCSC, SPST, STATCOM, SSSC, UPFC, IPFC and IPC for voltage/power control in transmission systems; Application of DSTATCOM, DVR and UPQC for improving power quality in distribution systems; Design of Power Oscillation Damping (POD) controllers; Discrete control of FACTS for improving transient stability; Mitigation of SSR using series FACTS Controllers; Issues affecting control design such as electromagnetic and harmonic interactions. The book can serve as a text or reference for a course on FACTS Controllers. It will also benefit researchers and practicing engineers who wish to understand and apply FACTS technology.

The Change We Choose: Speeches 2007-2009 brings together the key speeches made by Gordon Brown during the first two and a half years of his premiership. It reflects how the values and beliefs that have defined his political career have shaped his response to what have been arguably some of the greatest challenges ever to have faced a new prime minister. The speeches in this book trace what will be seen by historians as an extraordinary era in British and international history. We can learn a lot about his premiership by looking at the Prime Minister's penetrating and insightful speeches in this period, as he sets out his thinking on domestic and foreign policy and responds to the events that have shaped his time in office. We also learn much about Gordon Brown, the man, from the insights of those who have kindly agreed to contribute introductions - and from the person who knows him best of all: his wife, Sarah, who introduced his party conference speeches.
