The motorcycle is back! Similar to the fresh contemporary scene that has established itself around bicycles in the last few years, the motorcycle is currently undergoing an aesthetic rebirth. A young subculture worldwide is discovering the motorcycle as an expression of its personality and creativity. The Ride explores motorcycle riding as it is meant to be: as a means of getting around with attitude, as an extension of one's own body, as an expression of personal freedom, but also as a significant challenge to technical expertise, craftsmanship, physics, discipline, and driving skill. In the motorcycle scene of 1960s Britain, it was frowned upon to drive a motorcycle as it was produced in a factory. Following in this historical tradition, The Ride focuses on those who are creating customized motorcycles that come as close to one's own vision of how pure riding should be as possible. For example, the creative young people who are buying old,

wrecked bikes on eBay, removing everything but the motor and frame, and then rebuilding them in ways that are as radical and subversively creative as they are knowledgeable and respectful of tradition. The archetypes of the new motorcycles created in this way--classic board racers, bobbers, café racers, and choppers--may very well be 30-50 or even 80 years old, but what is made out of them is new, not retro. Decked out with state-of-the-art disk brakes, LED lights, gears, and drive components, these machines are more agile, faster, more radical, and therefore more fun than anything produced in the past. The Ride features transformations such as a boring plastic motorcycle made in Japan in the 1990s turned into a slick café racer with an Italian feel, a soulless neo-baroque machine turned into an in-your-face scrambler, or an old find from grandpa's barn turned into a absolutely comfort-free hardtail with the coolest of sounds. The book also presents small, local custom motorcycle workshops from around the globe that have established themselves with sought-after products that inspire other builders worldwide. It features extensive profiles of pioneers including Walt Siegl, Wrenchmonkees, DP Customs, Cole Foster, Deus, Shinya Kimura, Ian Barry, and Uwe Ehinger and their very different ideas of how a motorcycle should be. The unique bikes created in their garages--sometimes made-to-order, sometimes in a limited series--are often technically superior, better thought-out, and simply more radical than those produced by larger manufacturers who need to appeal to a broader audience. The spirit of this young motorcycle scene is reminiscent of that of current bike frame builders or even today's new food subculture. It's about making, transforming, or designing something with your own hands. In this case, something that will get a person from A to B, that makes noise, smells, vibrates, and comes to life. What could be more exciting,

All he had to do now was earn the money. [...] When Ms. Strickland answered the door she looked at the stoop and noticed that it had been shoveled. Since they were both holding shovels, the first thing she said in a rhetorical tone was “Did you guys do that? Thank you!” Before they could get a word out, she continued with “I guess you are here to shovel my drive! Or did you do that too and now you want your money?” Without missing a beat, Mel replied, “Yup! Twenty bucks!” In a scolding almost frantic tone she replied with, “Well I’m not paying. I have the lawn service under contract. Not very smart business boys. You can’t just ask people to pay for a service they didn’t request!” Pete just stood there in shock when Mel said, “OK, we’ll put it back.” She paused for a moment with a look of horror on her face until she realized Mel was joking and started laughing. She said “I’m sorry boys, but I’m already committed.” Mel replied, “That’s OK, we understand.” As they were walking toward the next house, they heard Ms. Strickland’s door open and she started yelling, “Boys!? Boys!? Wait!” Mel and Pete exchanged glances wondering what now? “Come back! I changed my mind! You can shovel my drive!” Pete jokingly said to Mel, “It looks like we’re both gonna make \$20 on this drive since our price just doubled!”

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.
