selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawasaki H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

This book analyses the Association of Southeast Asian Nations (ASEAN) as a powerful actor in International Relations by examining how the ASEAN community has evolved, looking specifically at its relationship with the EU with regards to human rights. The book adds to important contemporary debates within constructivist theory, shedding light on the need for 'critical' constructivism that emphasises language and contestation and what that may entail. On an empirical level, it challenges the idea of an 'EU-centrism,' demonstrating how ASEAN is the major driving force behind its human rights and community aspirations, as well as within the ASEAN-EU relationship. Furthermore, this book engages with the introspection surrounding constructivism by addressing the trouble with 'norms,' and instead unpacking the relationship between ASEAN and the EU to show language power in play. In particular, the book looks at how language, or rather coercive language, helps us 'see' contestation in action,

something that researchers sympathetic towards the idea of ASEAN's 'resistance' have been unable to show through a focus on norms. Tracing the evolution of the ASEAN community and human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights.

This invaluable book is a unique collection of tributes to outstanding discoveries pioneered by Leon Chua in nonlinear circuits, cellular neural networks, and chaos. It is comprised of three parts. The first — cellular nonlinear networks, nonlinear circuits and cellular automata — deals with Chua's Lagrangian circuits, cellular wave computers, bio-inspired robotics and neuro-morphic architectures, toroidal chaos, synaptic cellular automata, history of Chua's circuits, cardiac arrhythmias, local activity principle, symmetry breaking and complexity, bifurcation trees, and Chua's views on nonlinear dynamics of cellular automata. Dynamical systems and chaos is the scope of the second part of the book, where we find genius accounts on theory and application of Julia set, stability of dynamical networks, chaotic neural networks and neocortical dynamics, dynamics of

piecewise linear systems, chaotic mathematical circuitry, synchronization of oscillators, models of catastrophic events, control of chaotic systems, symbolic dynamics, and solitons. First hand accounts on the discovery of memristors in HP Labs, historical excursions into 'ancient memristors', analytical analysis of memristors, and hardware memristor emulators are presented in the third and final part of the book. The book is quintessence of ideas on future and emergent hardware, analytic theories of complex dynamical systems and interdisciplinary physics. It is a true Renaissance volume where bright ideas of electronics, mathematics and physics enlighten facets of modern science. The unique DVD covers the artistic aspects of chaos, such as several stunningly melodious musical compositions using chaotic attractors, a virtual gallery of hundreds of colorful attractors, and even a cartoon-like play on the genesis of Chua's circuit that was based on a widely acclaimed performance in Rome and other venues in Italy. In short, it is a veritable kaleiscope of never-before-published historical, pedagogical, and futuristic technical visions on three timely topics of intense interest for both lay readers and experts alike. to our souls after we cross over to the other side. Part I, "Opening Up to the Spiritual Realm," recounts the author's spiritual journey and how she became a spiritual medium after experiencing the light and receiving a life-changing message. It includes real stories of messages she has received from those who have crossed over, showing that our souls really do survive and keep the same personality. Part II, "How to Connect with the Other side," details what the reader can do to receive messages from angels and deceased loved ones. Part III, "Is This All There Is?" incorporates various related spiritual topics, including God, the Angels, reincarnation, the human spirit, life on other planets, and healing. Part IV, "May Peace Prevail on Earth," is perhaps the most important. At this very critical period on earth, the oneness of all life means we can create peace within our hearts first, and then peace throughout the entire universe.
