Guide to Modified Exhaust Systems: A Reference for Law Enforcement Officers and Motor Vehicle Inspectors is a slim, portable manual for law enforcement officials, motor vehicle inspectors, prosecutors, and legislators, as well as all citizens who desire peace and quiet. Excessive noise is a major public health issue. High noise levels are associated with hearing loss, heart disease, sleep deprivation, chronic fatigue, ringing of the ears, and aggressive behavior. Loud noise also damages communities, reduces property values, and denies individuals the right to peacefully enjoy their own home and property. One of the major sources of excessive and unnecessary noise is from motorcycles equipped with modified exhaust systems. By definition, a modified exhaust is not of the type installed at the time of manufacture, does not meet the manufacturer's specifications, does not comply with manufacturing regulatory standards, and is the root cause of excessively loud vehicles. Guide to Modified Exhaust Systems: A Reference for Law Enforcement Officers and Motor Vehicle Inspectors concisely provides law enforcement personnel and regular citizens the tools they need to fight back against excessive vehicle noise levels. The book includes numerous color photographs to make it easy to visually identify the illegal equipment installed on some motorcycles that is responsible for the great majority of nuisance noise levels. Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

This book tells the story of a life spent on the road recording the rich diversity of music in America when it was a major part of our lives, not just digital background noise. For music fans, there was a golden era of live music, stretching from the 1960s through the 1980s, and even evolving into the 1990s, if you want to be generous. In the pre-digital era, music fans spent a large part of their free time (and money) listening to their favorite artist's recordings. It was an analog world so if they wanted to hear the music, they actually had to listen to the radio, buy the records, and go to the concerts. Popular artists had long performed live concerts in the major markets, but it took rock 'n' roll to make national touring a viable business. Touring sound systems grew from scratch to keep up with larger and larger venues. Likewise, the ability to record those shows had to grow as well. The rudimentary collection of semi-professional gear grew into full-blown remote recording studios to keep up with the demand for live records, films, and broadcasts. The truly wonderful thing about the remote recording business was the author experienced so many different musical cultures. Where else could you go from recording a tour with the Rolling Stones to a TV special with Mohamed Ali at the Apollo Theater? How about the season opening of Carnegie Hall on PBS TV (with a different major orchestra every year) to Frank Zappa's annual Halloween Show? Or maybe a Yoko Ono tour behind the 1980s Iron Curtain to the Eagles in modern Australia? Then there are worldwide live broadcasts like the Academy Awards and the Grammy Awards to intimate jazz settings with Miles Davis or Wynton Marsalis. Compare the grandeur of the Metropolitan Opera to the irreverent comedy of Saturday Night Live. *On the Road* contains the stories of recording all that music live in its natural habitat, the clubs, theaters, concert halls, and arenas. There were only a few companies that succeeded in the rough and tumble business of live recording. The author was one of the most successful live recording engineers and the constructor of remote recording studios during that era, with thousands of live shows to his credit.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a

solution to virtually any handling problem.

This best-selling book is also “#1 book in motorcycle safety” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “Cornering Habits” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough’s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough’s voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it’s road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or “blind” truck drivers. The book offers the kind of first-hand experience that can literally save riders’ lives, as illustrated in the chapters “Booby Traps” and “Special Situations,” which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, “Sharing the Ride,” is geared toward experienced riders who travel together in groups or who travel with a second

passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

University student David Asbury trusts no one and wants nothing more than to be left alone to study alien languages. For three years he has managed just that as an undergraduate at Shel Matkei Academy. But his scholarship, which is his only means of support as an orphan, requires him to become a diplomat in the InterStellar Commonwealth. Now he's on a team of aliens learning how to broker peace treaties and trade deals. Some of them hate him. Some just think he's strange. And one won't let him hide away and waste his life. Just when David decides there's reason to hope for a better future in this world of codes and customs, everything falls apart. More alone than ever, David now has to fight his way to justice, with all the odds, and some very powerful aliens, arrayed against him. But even solving the mystery of who is responsible may not be enough to put the pieces of David's life back together.

Presents photographs and descriptions of thirty-two machines that have made significant contributions to motorcycling history

Hollywood historian and film reviewer Leonard Maltin invites readers to pull up a chair and listen as he tells stories, many of them hilarious, of 50+ years interacting with legendary movie stars, writers, directors, producers, and cartoonists. Maltin grew up in the first decade of television, immersing himself in TV programs and accessing 1930s and '40s movies hitting the small screen. His fan letters to admired performers led to unexpected correspondences, then to interviews and publication of his own fan magazine. Maltin's career as a free-lance writer and New York Times-bestselling author as well as his 30-year run on Entertainment Tonight, gave him access to Katharine Hepburn, Elizabeth Taylor, Sean Connery, Shirley Temple, and Jimmy Stewart among hundreds of other Golden Age stars, his interviews cutting through the Hollywood veneer and revealing the human behind each legend. Starstruck also offers a fascinating glimpse inside the Disney empire, and Maltin's tenure teaching USC's popular film course reveals insights into moviemaking along with access to past, current, and future stars of film, such as George Lucas, Kevin Feige, Quentin Tarantino, and Guillermo del Toro.
