From the #1 New York Times bestselling author of the Ella and Micha series comes a gripping story of passion, pain, and the courage to love . . . THE TEMPTATION OF LILA AND ETHAN On the surface, Lila Summers is flawless: good looks, expensive clothes, and a big, beautiful smile. But a dark past and even darker secrets are threatening to bubble over her perfect façade. She'll do anything to keep the emptiness inside hidden-which leads her into situations that always end badly. Whenever she hits bottom, there's only one person who's there to pull her out: Ethan Gregory. Ethan set the rules a long time ago: he and Lila are just friends. He doesn't do relationships. Although his tattooed, bad boy exterior is a far cry from Lila's pretty princess image, Ethan can't deny they have a deeper connection than he's used to. If he's not careful, he could be in serious danger of becoming attached-and he's learned the hard way that attachment only leads to heartbreak. When Lila falls farther than she ever has before, can Ethan continue to help as a friend? Or is he also getting close to falling . . . for her? Mary Russell is used to dark secrets--her own, and those of her famous partner and husband, Sherlock Holmes. But what of the other person to whom she has opened her heart: the couple's longtime housekeeper, Mrs. Hudson? Russell's

faith and affection are suddenly shattered when a man arrives on the doorstep claiming to be Mrs. Hudson's son. And though what he tells Russell cannot possibly be true, she believes him--as surely as she believes the threat of the gun in his hand. In a devastating instant, everything changes. And afterward, a pool of blood stains the floor, the smell of gunpowder hangs in the air, and most shocking of all: the grim clues point directly to Clara Hudson. Or rather, the woman she was before Baker Street. Now, to uncover the truth, a frantic Sherlock Holmes must put aside his anguish and push deep into his housekeeper's secrets--to a time before her deception, before her crimes were buried. There is death here, and murder, and trust betrayed. And nothing will ever be the same.

The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible. The many books on globalization published over the past few years range from claims that the world is flat to an unlikely rehabilitation of Genghis Khan as a pioneer of global commerce. Missing from these accounts is a consideration of the technologies behind the creation of the globalized economy. What makes it possible for us to move billions of tons of raw materials and manufactured goods from continent to continent? Why are we able to fly almost anywhere on the

planet within twenty-four hours? In *Prime Movers of Globalization*, Vaclav Smil offers a history of two key technical developments that have driven globalization: the high-compression non-sparking internal combustion engines invented by Rudolf Diesel in the 1890s and the gas turbines designed by Frank Whittle and Hans-Joachim Pabst von Ohain in the 1930s. The massive diesel engines that power cargo ships and the gas turbines that propel jet engines, Smil argues, are more important to the global economy than any corporate structure or international trade agreement. Smil compares the efficiency and scale of these two technologies to prime movers of the past, including the sail and the steam engine. The lengthy processes of development, commercialization, and diffusion that the diesel engine and the gas turbine went through, he argues, provide perfect examples of gradual technical advances that receive little attention but have resulted in epochal shifts in global affairs and the global economy.

As she uses her knowledge of forensic medicine to investigate the death of a young runaway, seventeen-year-old Cameryn Mahoney, an assistant to her coroner father, worries that her secretive mother may be involved.

Are digital means of communication better than traditional bhaashans and processions? Will a social media revolution coerce armchair opinion makers to head to poll booths? Twitter, Facebook, and LinkedIn are changing the way the

denizens of the world, and more specifically youth of this country, communicate and connect. In *The Big Connect*, Shaili Chopra traces the advent of social media in India and how politics and lobbying has now shifted to the virtual floor. She argues that though a post, a pin, or a tweet may not translate into a vote, it can definitely influence it. With comparisons to the Obama campaign of 2008 and 2012 and analysis of the social media campaigns of political bigwigs like Narendra Modi, Rahul Gandhi, and Arvind Kejriwal—the book discusses the role of a digital community in Indian politics.

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection

equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Watching the kite ascend higher into the sky, ten-year-old Raghav felt butterflies run deep down his gut, inflating his desire to fly high in a supersonic jet. His kite, entangled with another, crashed onto the ground. The flight took off smoothly from the runway of her heart, only to be hit by turbulence and thunderstorms smashing the plane into an abandoned sea full of gloominess. There he saw a lighthouse, a ray of hope. She became his lifeguard and taught him to swim through the storm. Like a guiding angel, she enlightened him towards the path of self-discovery leading to his journey to the island called 'Bollywood.' Raghav rode on a roller coaster encompassing love, passion, and conflicts. Hopping from one town to another in search of his purpose, he landed in the city of love and lights, Paris, where he saw the horizon, an illusion of his world merging with hers. But just like the two poles on Earth never meet, so was his destiny. On one side, he had Diya whom he could never get, and on the other side was Niharika whom he could never lose, and in the midst of all the chaos, he found his treasure. Come along with him to discover his hidden treasure. Who knows! You might find yours too.

After the death of a police officer, assassin Kahllah (aka the Black Lotus) is forced out of retirement in an attempt to clear her name while outrunning a mysterious enemy. "K'wan delivers a lean, tightly plotted tale that balances noir aesthetics with comic book flair. Fans of pulp and urban lit will be well satisfied." --Publishers Weekly "From page one to the last, K'wan's Black Lotus 2: The Vow is a high-wire act with no net. A smart refiguring of hard-boiled with a nitro injection of new-age sensibilities." --Reed Farrel Coleman, New York Times best-selling author of *Walking the Perfect Square* "Like a cool, hip, and fun evening at a vintage drive-in, Black Lotus 2: The Vow takes me back to a time when Jim Kelly, Pam Grier, and Fred Williamson graced the big screen. Throw in some Bruce Lee and a little *The Last Dragon* and you have a hell of a butt-kicking, action-filled ride." --Ace Atkins, New York Times best-selling author of *The Shameless* "Black Lotus 2: The Vow is a thrilling roller-coaster ride of a mystery that kept me on the edge of my seat!" --Bernice L. McFadden, author of *The Book of Harlan* It's been months since Kahllah El-Amin, aka the Black Lotus, hung up her pistols, retired from the murder-for-hire business, and finally found peace. But when a police officer is murdered and a familiar flower is left at the crime scene, all signs point to it being the work of the Black Lotus. Someone is trying to frame her. Things get more complicated when the case is handed to Detective James Wolf, a former adversary who has since become a friend. To clear her name, Kahllah is forced out of retirement and once again must don the mask of the Black Lotus. She races against time to catch the real killer while trying to outrun her most formidable rival. Their deadly game leads to a shocking truth buried under a mountain of lies, as Kahllah attempts to find justice in a world devoid of light.

"The best explanation that I have seen of corrosion on boats."—Nigel Calder, author of

Boatowner's Mechanical and Electrical Manual "A powerful weapon in the war against metal deterioration."—Cruising World Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, *The Boatowner's Guide to Corrosion* shows you how to: Prevent corrosion with proper grounding, cathodic protection, protective coatings, and careful selection and matching of metal parts Protect your boat's hull, deck gear, masts, and rigging, as well as its propulsion, electrical, plumbing, and steering systems Recognize and cure developing corrosion before it can damage your boat

Digital transformation is not about technology--it's about change. In the rapidly changing digital economy, you can't succeed by merely tweaking management practices that led to past success. And yet, while many leaders and managers recognize the threat from digital--and the potential opportunity--they lack a common language and compelling framework to help them assess it and guide them in responding. They don't know how to think about their digital business model. In this concise, practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field-tested globally with dozens of senior management teams. Based on years of study at the MIT Center for Information Systems Research (CISR), the authors find that digitization is moving companies' business models on two dimensions: from value chains to digital ecosystems, and from a fuzzy understanding of the needs of end customers to a sharper one. Looking at these

dimensions in combination results in four distinct business models, each with different capabilities. The book then sets out six driving questions, in separate chapters, that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what's needed to move toward a higher-value digital business model. Filled with straightforward self-assessments, motivating examples, and sharp financial analyses of where profits are made, this smart book will help you tackle the threats, leverage the opportunities, and create winning digital strategies.

Les Fleurs du mal, Charles Baudelaire's masterpiece, takes pride of place in this new bilingual edition, with Francis Scarfe's elegant prose versions for support. All of Baudelaire's other collections, occasional and juvenile verse are included. Scarfe's introduction on the man, his circle, and poetry is an ideal entry-point for new readers.

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

Highlighting the importance of regional and national differences in industrial

development, this book is a pioneering long term comparison of the two regions of Lancashire and Kansai.

The mythical Venus helps a nerdy woman find her own inner goddess in this novel in #1 New York Times bestselling author P. C. Cast's Goddess Summoning series... Pea Chamberlain needs a makeover—shoes, hair, clothes, make-up, everything—especially if she wants to attract sexy fireman Griffin DeAngelo at the fireman's masked ball. And there's no one better suited to coax Pea out of her pod than the Goddess of Love, whom she invokes in a moment of desperation.

After eons of helping others find love, Venus has no problem working her magic on Pea. But when the goddess herself starts falling head over heels for Griffin, it will take an act of divine intervention to set this love triangle to rights...

"Hormegeddon" is the term coined by entrepreneur and New York Times Bestselling Author Bill Bonner to describe what happens when you get too much of a good thing in the sphere of public policy, economics and business. Simply put, it ends in disaster. Drawing on stories and examples from throughout modern political history-from Napoleon's invasion of Russia to the impending collapse of the American healthcare system, from the outbreak of WWII and the fall of the Third Reich to the 21st century War on Terror, from the Great Recession to the sovereign debt crisis-Bonner pursues a modest ambition: to understand what goes wrong. History is not a clean yarn spun by its victors. It is a long tale of things that went FUBAR-debacles, disasters, and catastrophes. That each disaster carries with it a warning is what makes it useful to study. For instance, if the architect of a great ship tells you that 'not even God himself could sink this ship, ' you should take the next boat. If the stock market is selling at 20 times earnings and all the expert analysts urge you to 'get in' because you 'can't lose'-it's time to get out! Similarly, public policy disasters are what you get when well meaning people with this same Titanic degree of certitude apply rational,

small-scale problem-solving logic to inappropriately large scale planning. First, you get a declining rate of return on your investment (of time or resources) until you hit zero. Then, if you keep going through the zero floor-and you always keep going-you get a disaster. The problem is, these disasters cannot be stopped by well-informed smart people with good intentions, because they are the people who cause them in the first place. From the mind of Bill Bonner comes Hormegeddon, a phenomenon that occurs when a small dose of something produces a favorable result, but if you increase the dosage, the results end in disaster. The same applies when the world gets too much of a good thing in public policy, economics, and business. Drawing on examples throughout modern political history, Bonner brings context and understanding to this largely ignored and anonymous phenomenon.

While the military use of drones has been the subject of much scrutiny, the use of drones for humanitarian purposes has so far received little attention. As the starting point for this study, it is argued that the prospect of using drones for humanitarian and other life-saving activities has produced an alternative discourse on drones, dedicated to developing and publicizing the endless possibilities that drones have for "doing good". Furthermore, it is suggested that the Good Drone narrative has been appropriated back into the drone warfare

discourse, as a strategy to make war "more human". This book explores the role of the Good Drone as an organizing narrative for political projects, technology development and humanitarian action. Its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are "good", with a primary objective to initiate a critical conversation about the political currency of "good". This study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones' functionalities can make, but also what difference the presence of drones themselves – as unmanned and flying objects – make. Discussed and analysed are the implications for the drone industry, user communities, and the areas of crisis where drones are deployed.

This free eBook short story fills in the gaps of Sophie Kinsella's bestselling

Shopaholic series, following Becky Brandon and her husband, Luke, as they start their luxurious yearlong honeymoon around the world. But these jet-setters are about to hit some turbulence. Becky and Luke are in Venice—the city of winding canals, gorgeous historic buildings, and, of course, exceptional shopping. To unwind from the stress of their wedding, Becky has planned an utterly blissful honeymoon where, for an entire year, they will hop from one country to the next—Italy to the Czech Republic to Sri Lanka and beyond—as they please. But lately, Luke has been more restless than relaxed. In fact, he seems (unbelievably!) like he wants to go home. Will Becky be able to save their dream vacation, or will their globe-trotting come to a sudden halt? Praise for the Shopaholic novels “[Sophie] Kinsella has a genuine gift for comic writing.”—The Boston Globe “Hilarious . . . hijinks worthy of classic I Love Lucy episodes . . . too good to pass up.”—USA Today “Kinsella’s Bloomwood is plucky and funny. . . Motorcycle Riders Notebook small diary/journal/notebook to write in. for creative writing, creating list, for scheduling, Organizing and Recording your thoughts. Perfectly sized at 6"x9" 120 page softcover bookbinding flexible Paperback This volume, the proceedings of the Seventh International Conference on Coelenterate Biology, is organized as the meeting was around six topics.

Because several sessions of ICCB7 constituted the 2003 North American meeting of the International Society for Reef Studies, the subject of coral reefs is strongly represented in the section on Ecology. The other themes are Neurobiology; Reproduction, Development, and Life Cycles; Pioneers in Coelenterate Biology; Cnidaria; and Taxonomy and Systematics. Ctenophores, as well as representatives of all four classes of cnidarians are among the study subjects of the research reported in this volume. The theme of variability runs through the volume – be it in cnidaria, morphology, behavior, neurobiology, ecology, colony form, or reproduction, variability is a major reason these animals are so interesting and challenging to study! This is a must-read resource for anyone doing research – or planning to do research – on cnidarians and ctenophores.

Could I have been one of them? was what Sam McKinney wondered as he retraced, alone, from Puget Sound to Queen Charlotte Strait, the explorations of Captain George Vancouver and his men. In the 1790s, day after day, they had rowed for long hours, camping on rocky beaches in all weathers and charting the intricate coastline for the first time. Two hundred years later, McKinney followed them in his 25-foot sailboat, anchoring in the same locations as they had done, experiencing the same winds and waves, and sharing what McKinney calls the link of vulnerability that is the ever-present

condition of all people who go to sea. With his boat, his pipe and the occasional glass of rum, McKinney invites readers along on a perceptive voyage through time and along the magnificent Pacific Northwest coast from Puget Sound through the Georgia and Queen Charlotte Straits. Describing both the historical and contemporary voyages around the Inland Sea, McKinney offers insightful comparisons of what sailors saw and experienced in the 18th century and what they see today. At the end of his trip McKinney, like Vancouver, claims the area he had explored, not by deed of ownership but out of love for the place, its staggering beauty... (and) the memories of the people and cultures who have found homes along its shores. Could he have, indeed, been one of Vancouver's men? He isn't sure, but he would like to have given it a try.

This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. Presents the papers from the IMechE conference on fuel

An introduction to a powerful and flexible network modeling tool for developing and understanding complex systems, with many examples from a range of industries. Design structure matrix (DSM) is a straightforward and flexible modeling technique that can be used for designing, developing, and managing complex systems. DSM offers network modeling tools that represent the elements of a system and their interactions, thereby highlighting the system's architecture (or designed structure). Its advantages include compact format, visual nature, intuitive representation, powerful analytical capacity, and flexibility. Used primarily so far in the area of engineering management, DSM is increasingly being applied to complex issues in health care management, financial systems, public policy, natural sciences, and social systems. This book offers a clear and concise explanation of DSM methods for practitioners and researchers. This book gathers more than 150 peer-reviewed papers presented at the 5th INTBAU International Annual Event, held in Milan, Italy, in July 2017. The book represents an invaluable and up-to-date international exchange of research, case studies and best practice to confront the challenges of designing places, building cultural landscapes

and enabling the development of communities. The papers investigate methodologies of representation, communication and valorization of historic urban landscapes and cultural heritage, monitoring conservation management, cultural issues in heritage assessment, placemaking and local identity enhancement, as well as reconstruction of settlements affected by disasters. With contributions from leading experts, including university researchers, professionals and policy makers, the book addresses all who seek to understand and address the challenges faced in the protection and enhancement of the heritage that has been created.
