"Who knew that a who-dun-it would not only keep you guessing—but have you laughing! Deborah Sharp is the new Edna Buchanan."—Hoda Kotb, co-anchor of NBC's Today show Meet Mama: a true Southern woman with impeccable manners, sherbet-colored pantsuits, and four prior husbands, able to serve sweet tea and sidestep alligator attacks with equal aplomb. Mama's antics—especially her penchant for finding trouble — drive her daughters Mace, Maddie, and Marty to distraction. One night, while settling in to look for ex-beaus on COPS, Mace gets a frantic call from her mother. This time, the trouble is real: Mama found a body in the trunk of her turquoise convertible and the police think she's the killer. It doesn't help that the handsome detective assigned to the case seems determined to prove Mama's guilt or that the cowboy who broke Mace's heart shows up at the local Booze & 'n' Breeze in the midst of the investigation. Before their mama lands in prison—just like an embarrassing lyric from a country-western song—Mace and her sisters must find the real culprit. Tractors, unique in their uses, have undergone thousands of changes over the years to become one of the most handy machines one can have, in any form. There have been so many amazing discoveries and

inventions in the history of mankind that it would be difficult to place them in order of importance. Many have revolutionized the way society works, and this could also be said of the humble tractor. Without it, it would be impossible to produce the vast amounts of food required by society today, and for this reason alone it must qualify as a small but essential cog in the vast machine that is the modern world. The earliest pioneer machines used steam traction rather than the new-fangled internal combustion engines, but technological break-throughs came thick and fast: diesel engines, Harry Ferguson's revolutionary three-point-hitch, sophisticated hydraulics, and the wonders of electronics in our own time. Henry Ford made tractors that small farmers could afford, International Harvester pioneered the 1920s Farmall - the first tractor able to cope with row crops - while Allis-Chalmers introduced pneumatic rubber tires in the 1930s. Nearly 30 years later the Steiger brothers invented an entirely new breed, the giant four-wheel-drive articulated super-tractor. This book covers more than a century of tractor-making and features tractors that are regarded with something like affection - Case, Fordson, Massey-Ferguson, Minneapolis-Moline, Versatile - they are all here and many others. Tractors of all shapes, sizes, ages, colors and types - they are here in all their resplendent glory.

Rhetorical analyses of the Pauline letters concentrate on the way in which Paul went about persuading his readers by means of his letters. Normally scholars employ ancient rhetorical models to explain this. D. Francois Tolmie's study represents the first attempt to reconstruct Paul's rhetorical strategy in the Letter to the Galatians in a different way, namely by concentrating on the letter itself in order to develop the best categories for describing the way in which Paul tried to persuade his readers.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another

tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

you to the crew of the USS Pioneer - the world's first superluminal spacecraft. It eventually leaves you with a question as to what happened to the majority of the crew of that ship when it became stranded in the Beta Hydri system. Legacy brings you the tale of those descendants of the original Pioneer colony in the Beta Hydri System, introducing for the first time, the Mystics. When Legacy is invaded by a fleet of spacecraft, the primitive colony, nine-hundred years in the making, reacts in the only way it knows how. When it comes to the Mystics, this reaction could be quite deadly. Violation finishes up the overall "introduction" to the true Mystic Saga, bringing you the tale of about a dozen USSC assassins sent to a 1940's Earth. Their sole purpose is to slip in, kill their list of targets, and slip out as quietly as possible. Unfortunately, a disgruntled soldier and a vengeful Mystic raise a significant amount of ruckus along the way. Judgment introduces us to Cyan - an IX7 unit embodied by a triune of souls from the once primitive race living beneath Legacy. Elix has been returned safely to his people on Legacy. Unfortunately for him, his abductors returned him to an era far before his own lifetime. Fortunately, however for his people, Elix offers a plethora of knowledge about the future invaders and their technologies. He offers a fighting chance for his people. reasons. Firstly, research suggests that music education can benefit young dyslexics as it helps them focus on auditory and motor timing skills and highlights the rhythms of language. Secondly, dyslexic musicians at a more advanced level face particular challenges such as sight-reading, written requirements of music examinations and extreme performance nerves. This is a sequel to the highly successful *Music and Dyslexia: Opening New Doors*, published in 2001. The field of dyslexia has developed rapidly, particularly in the area of neuropsychology. Therefore this book focuses on these research advances, and draws out the aspects of music education that benefit young dyslexics. The contributors also discuss the problems that dyslexic musicians face, and several chapters are devoted to sight-reading and specific strategies that dyslexics can use to help them sight-read. The book offers practical techniques and strategies, to teachers and parents to help them work with young dyslexics and dyslexic musicians.
