This textbook will teach students in criminal justice programs the essential skills needed for effective police administration and management. Although it is written in a manner that graduate students would find stimulating and thought-provoking, its target audience is juniors and seniors. The author uses a three-pronged approach. Each topic is explored from a traditional, modern, and futuristic perspective. This approach combines theory and practical application in a manner that helps the students grasp all the ramifications of the issues at hand. To assist in this, commentary solicited from police administrators (from middle-management to police chief) that reflects their experiences and thoughts on the various issues is offered. In addition to the commentary, realistic and pragmatic examples are provided to clarify the concept and to show its practical applications. This text was written to bridge the gap between purely theoretical and strongly practical texts. The use of theory to establish the concept and realistic illustrations and practitioners' perspectives to demonstrate the link between theory and reality gives this text a dimension found in very few texts. Furthermore, by using a three-pronged approach (traditional, reform and community or yesterday, today and tomorrow), readers are offered the basis from which the concepts originate, their transformation and possibly future implications, in a well-rounded manner allowing for a full view of the ideas and concepts. Combines a theoretical and practical approach Explores a variety of police administration issues from three perspectives, political/traditional, reform/modern, and community/futuristic. Realistic illustrations and practitioner's perspectives

In *The Global Left: Yesterday, Today, Tomorrow*, Immanuel Wallerstein takes stock of the practices of the left, historically in the time of its great ideals and today in the midst of the global crisis of capitalism. He underlines the urgency of seeing the emergence of a global and united left that can pave the way out of the centuries-old domination of capital, considering antisystemic movements, dilemmas of the left in relation to the structural crisis of the modern world-system, and tactics and strategies for political action. The book includes new essays by Étienne Balibar, James K. Galbraith, Johan Galtung, Nilüfer Göle, Pablo González Casanova, and Michel Wieviorka in conversation with Wallerstein's core ideas.

'Yesterday, Today and Tomorrow' is the climax of John Joyce's 'Virtual Trilogy' of cyberthrillers following the quest by billionaire genius Theo Gilkrensky to save his beloved wife Maria from murder by warping the fabric of time. Convinced that the research he carried out in 'Virtually Maria' and 'A Matter of Time' will enable him to jump back in time and save Maria from death, Theo travels to Japan and enters into a pact with his greatest enemies to obtain the computer power he needs to complete his calculations. But dark forces are massing to destroy him. Yukiko Funakoshi, the seductive assassin who blames Theo for the death of her parents recruits a gang of former terrorists to commit the ultimate act of revenge. The CIA are out to arrest him for industrial espionage. And even the faithful Minerva 3000 computer, whose artificially intelligent user-interface programme has been fashioned to look, sound and act like his late wife, is plotting against him. From the infinite horizons of cyberspace - to the depths of the human heart, the final battle for 'Yesterday, Today and Tomorrow' is about to begin.

A vivid, groundbreaking history of the legacies of slavery in an elite Northern town as told by its Black residents I Hear My People Singing shines a light on a small but historic Black neighborhood at the heart of one of the most elite and world-renowned Ivy-League towns—Princeton, New Jersey. The vivid first-person accounts of more than fifty Black residents detail aspects of their lives throughout the twentieth century. Their stories show that the roots of Princeton's African American community are as deeply intertwined with the town and university as they are with the history of the United States, the legacies of slavery, and the nation's current conversations on race. Drawn from an oral history collaboration with residents of the Witherspoon-Jackson neighborhood, Princeton undergraduates, and their professor, Kathryn Watterson, neighbors speak candidly about Jim Crow segregation, the consequences of school integration, World Wars I and II, and the struggles for equal opportunities and civil rights. Despite three centuries of legal and economic obstacles, African American residents have created a flourishing, ethical, and humane neighborhood in which to raise their children, care for the sick and elderly, worship, stand their ground, and celebrate life. Abundantly filled with photographs, I Hear My People Singing personalizes the injustices faced by generations of Black Princetonians—including the famed Paul Robeson—and highlights the community's remarkable achievements. The introductions to each chapter provide historical context, as does the book's foreword by noted scholar, theologian, and activist Cornel West. An intimate testament of the Black community's resilience and ingenuity, I Hear My People Singing adds a never-before-compiled account of poignant Black experience to an American narrative that needs to be heard now more than ever.

From a multi-dimensional and interdisciplinary standpoint, this book challenges the teleological and unidirectional notions of development embodied in the idea of modernisation or 'progress' and offers a critique of the tendency to consider Africa as a basket case, which often gives the Western 'self' an undeserving privilege and superiority over the African 'other'. Mostly authored by emerging African scholars, this 16-chapter volume addresses the historical application of development projects in Africa and their modern impact in economic, political, cultural, social, and infrastructural contexts, among others. The book, therefore, unearths development dynamics in specific African countries, examines the continent's external relations, rethinks predominant ideas on development, and engages in critical examination of concepts and practices that have maintained hegemonic positions in the discussions on Africa's development. Its uniqueness lies in the ability to bring these several voices and themes together into a concise conception of both the challenges and possibilities of Africa's sustainable development. The book targets both the academic and policy worlds in Africa and around the world, as well as ordinary members of the public who seek to broaden their theoretical and empirical understanding on the changing dynamics on the African continent.

"Two distinguished Catholic theologians reflect on how their views about Mary have changed since the 1960s and illustrate this by discussing some of their earlier publications. After looking back on Vatican II, Fr. Schillebeeckx brings out the increasing importance of the Biblical record for his thinking. Catharina Halkes explains why, despite her allegiance to the feminist movement and her dissatisfaction with many of the emphases associated with Mary, she is still unwilling to abandon this figure from her Catholic youth and how in some ways she has grown closer to her again. With an extended introduction and bibliography, this book has been written for Catholics and non-Catholics alike and will prove most helpful to anyone concerned with the role of Mary in the Christian Church of today and tomorrow."--[Back cover.
