You Do Not Need To Purchase This Book If You Have Already Purchased My Book, 'Born Again.' This book has been written to help you understand what it is to become a Christian; a believer's manual, so to speak - it will provide you with a roadmap of spiritual experiences that God wants you to enjoy, as part of your Christian journey within his kingdom. The major emphasis of this book will concentrate on subjects such as: the difference between a genuine believer and a religious Christian; water baptism and baptism in the Holy Spirit; the difference between faith and deeds and the language of faith; understanding the various ministries available to genuine Christians; spiritual warfare and the armor of God. It is my prayer that this book will provide a useful guide to all those who are genuinely seeking to become Christians and those who want to learn a little bit more about what it is to become a genuine believer.

This is the first major study of the alternatives confronting Iraq as it seeks to rebuild its vital oil industry while simultaneously constructing a new political system. A key challenge facing the country is to allocate the revenues oil generates in a way that avoids economic and social instability. Reviewing the present status of the industry, the authors - including Clement Henry, Massoud Karshenas, Roger Owen, Mona Said and John Sfakianakis - use comparative analysis to suggest how it might best be rebuilt. Oil and Democracy in Iraq is an important and timely assessment of Iraq's oil industry. 'Springborg's observations help understand the current stalemate in (or failure) to define the legal and administrative setting needed to undertake a real reconstruction of the national oil industry.' Maritza Cricorian, Istituto Affari Internazionali 'This book is exemplary, setting forth clear alternatives, as well as cautionary tales from the experiences of other states, and indeed of Iraq itself in an earlier incarnation.' Charles Tripp, School of Oriental and African Studies

Published on the birth centenary of J. Krishnamurti, *Fire in the Mind* is a book of important discussions conducted with Krishnamurti. Held from the end of the 1960s to 28 December 1985, seven weeks before his death on 17 February 1986, these dialogues cover a vast ocean of human concerns—fear, sorrow, death, time, culture, ageing and the renewal of the brain. They also explore subjects that are central to scientific research today, such as the questions of biological survival, the nature of consciousness, artificial intelligence, computers and the mechanical mind. J. Krishnamurti needs no introduction. A sage, a seer, a religious revolutionary and a teacher of profound compassion, Krishnamurti negated all spiritual authority. He sought freedom from the Guru, the book, tradition and the authoritarian voice of another. “Truth is within you,” he said, and to discover that truth in the luminous light of perception was to transform the very

nature of thought and consciousness. It was to awaken intelligence, insight and an abundant compassion. The total responsibility lay with the individual. No one could free another from bondage. These dialogues reveal Krishnamurti's approach to self-knowing and his way of investigation into the brain, the mind and the consciousness. In a world brought to the edge of the abyss by growing violence, soaring religious fundamentalism, the desecration of nature and a massive assault on human integrity, they provide a new direction to those of us seeking an alternative way of life.

One of the chief difficulties in studying the history of Christianity is the lack of prior exposure to the subject that students often bring with them. Struggling to keep up with the large numbers of names, dates, and places presented to them, it is easy for students to lose sight of the "big picture," the broad sweep of movement and change that instructors most wish to communicate. Justo Gonzalez has written this book to help students gain just such a quick and basic grasp of the main periods and issues in the history of Christianity. Drawing upon his own extensive experience and that of others, he contends that having been introduced to the essentials of church history in a brief and accessible form, students are far better able to understand and appreciate what they encounter in more detailed lectures and reading. Gonzalez provides a

comprehensive opening chapter that summarizes major issues and concerns of each of the principal eras of church history. Subsequent chapters focus on the ancient church, the Christian empire, the Middle Ages, the Reformation, the seventeenth through nineteenth centuries, and the twentieth century and the end of modernity.

Rudolf II, king of Bohemia and Holy Roman Emperor, is paranoid, spendthrift, and wayward. In sixteenth-century Prague, seat of Christendom, he rules over an empty treasury and a court of parasites and schemers. Meanwhile in the ghetto, the Great Rabbi, mystic and seer, guides his people in the uneasy cohabitation of Jew and Christian, while the fabulously wealthy financier Mordechai Meisl has a hand in transactions across Europe and is reputed to be sustaining the treasury. His beautiful wife, Esther, forms a link of a different sort between the castle and the ghetto: by night under the stone bridge, she and the emperor entwine in their dreams under the guise of a white rosemary bush and a red rose. Only by severing the two plants can the Great Rabbi break the spell of forbidden love and deliver the city from the wrath of God. Perutz brings Old Prague to life with a cast of characters ranging from alchemists to the angel Asael, and including the likes of Johannes Kepler and the outlaw prince Wallenstein.

For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the

BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.
