From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).

A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your life." Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth -- the idea that certain work is not really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries -- from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete -- Jaffe reveals how all of us have been tricked into buying into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction.

Gregory the Great was pope from 590-604 and left behind a substantial literary heritage. His most ambitious work and one of the most popular works of scriptural exegesis in the middle ages was the *Moralia in Job*, commenting the book of Job in 35 books running to over half a million words. Saint Gregory's *Commentary on Job* was written between 578 and 595, begun when Gregory was at the court of Tiberius II at Constantinople, but finished only after he had already been in Rome for several years. This is Volume 1 of 3 - containing Books 1-10

"A lively and inspiring guidebook for anyone who wants to make the jump from normal to extraordinary." —Tony Robbins, #1 New York Times bestselling author of *Unshakeable* and *MONEY: Master the Game* An inspirational book that lays out the "Jump Curve"—four steps to wholeheartedly pursuing the career of your dreams—through experiences from a variety of people who have jumped and never looked back When Mike Lewis was twenty-four and working in a prestigious corporate job, he eagerly wanted to leave and pursue his dream of becoming a professional squash player. But he had questions: When is the right time to move from work that is comfortable to a career you have only dared to dream of? How have other people made such a jump? What did they feel when making that jump—and afterward? Mike sought guidance from others who had "jumped," and the responses he got—from a banker who started a brewery, a publicist who became a Bishop, a garbage collector who became a furniture designer, and on and on—were so clear-eyed and inspiring that Mike wanted to share what he had

learned with others who might be helped by those stories. First, though, he started playing squash professionally. The right book at the right time, *When to Jump* offers more than forty heartening stories (from the founder of Bonobos, the author of *The Big Short*, the designer of the Lyft logo, the *Humans of New York* creator, and many more) and takeaways that will inspire, instruct, and reassure, including the ingenious four-phase Jump Curve.

Absentee owners. Single-minded concern for the bottom line. Friction between workers and management. Hostile takeovers at the hands of avaricious and unaccountable multinational interests. The story of America's industrial decline is all too familiar - and yet, somehow, still hard to fathom. Jamie Sayen spent years interviewing residents of Groveton, New Hampshire, about the century-long saga of their company town. The community's paper mill had been its economic engine since the early twentieth century. Purchased and revived by local owners in the postwar decades, the mill merged with Diamond International in 1968. It fell victim to Anglo-French financier James Goldsmith's hostile takeover in 1982, then suffered through a series of owners with no roots in the community until its eventual demise in 2007. Drawing on conversations with scores of former mill workers, Sayen reconstructs the mill's human history: the smells of pulp and wood, the injuries and deaths, the struggles of women for equal pay and fair treatment, and the devastating impact of global capitalism on a small New England town. This is a heartbreaking story of the decimation of industrial America.

For centuries we've believed that work was where you learned discipline, initiative, honesty, self-reliance--in a word, character. A job was also, and not incidentally, the source of your income: if you didn't work, you didn't eat, or else you were stealing from someone. If only you worked hard, you could earn your way and maybe even make something of yourself. In recent decades, through everyday experience, these beliefs have proven spectacularly false. In this book, James Livingston explains how and why Americans still cling to work as a solution rather than a problem--why it is that both liberals and conservatives announce that "full employment" is their goal when job creation is no longer a feasible solution for any problem, moral or economic. The result is a witty, stirring denunciation of the ways we think about why we labor, exhorting us to imagine a new way of finding meaning, character, and sustenance beyond our workaday world--and showing us that we can afford to leave that world behind.

The American claim that we should love and be passionate about our job may sound uplifting, or at least, harmless, but *Do What You Love* exposes the tangible damages such rhetoric has leveled upon contemporary society. Virtue and capital have always been twins in the capitalist, industrialized West. Our ideas of what the “virtues” of pursuing success in capitalism have changed dramatically over time. In the past, we believed that work undertaken with an ethos of industriousness promised financial stability and basic comfort and security for our families. Now, our working life is conflated with the pursuit of pleasure. Fantastically successful—and popular—entrepreneurs such as Steve Jobs and Oprah Winfrey command us. “You’ve got to love what you do,” Jobs tells an audience of college grads about to enter the workforce, while Winfrey exhorts her audience to “live your best life.” The promises made to today’s workers seem so much larger and nobler than those of previous generations. Why settle for a 30-year fixed rate mortgage and a perfectly functional eight-year-old car when you can get rich becoming your “best” self and have a blast along the way? But workers today are doing more and more for less and less. This reality is frighteningly palpable in eroding paychecks and benefits, the rapid concentration of wealth in the hands of a tiny few, and workers’ loss of control over their labor conditions. But where is the protest and anger from workers against a system that tells them to love their work and asks them to do it for less? While winner-take-all capitalism grows ever more ruthless, the rhetoric of passion for labor proliferates. In *Do What You Love*, Tokumitsu articulates and examines the sacrifices people make for a chance at loveable, self-actualizing, and, of course, wealth-generating work and the conditions facilitated by this pursuit. This book continues the conversation sparked by the author’s earlier Slate article and provides a devastating look at the state of modern America’s labor and workforce.

A street smart, inspiring, practical and utterly honest book for renewing or resuming your career. Millions of mid- and late-career professionals are wondering why our careers are dying. We've been fired, downsized, job-eliminated, or we've left work voluntarily to raise children, care for loved ones, or go to school. Our unemployment rate is more than three times the national average. It takes twice as long to get hired, usually for far less money than we were making. Is it age discrimination? Maybe. But it's not that simple. So many of us have lagged on skills and technology, shrugged off social media, or ignored the rate of change and let younger people become the face of our profession's future. Our "track record" really doesn't matter. We want to come back, but we aren't ready. Coming Back offers clear advice, including: -Make yourself visible and relevant by sharing articles and information on your field with colleagues and on social media. -Use LinkedIn to build your network in your industry and identify decision makers. -Tell interviewers about what you will do—don't rely on what you have done. -Stop grousing about "those millennials" and start working with them. -Volunteer strategically to build leadership skills and networks. Coming Back shows how you can save a career if still employed or get one back if cast out. Fawn Germer, one of the nation's most popular leadership experts and global motivational speakers, has personally interviewed more than 300 CEOs, senior executives, professors, lawyers, organizational experts, industry leaders and professionals. The result is a tactical, tough-love call to action: to learn, re-tool, connect, grow, and get ready to work again.

"It is possible to have the job of your dreams. Together we are going to set about getting you there. Before I joined the BBC's Dragons' Den, I spent thirty years setting up and running recruitment companies, placing hundreds of thousands of candidates in the jobs they really wanted. I will take you through the process step by step. How to stay positive in a difficult economic climate and find the right opportunities. How to package yourself to make sure you secure an interview. The vital importance of preparation, so that you are relaxed and give a great performance at interview. How to show your passion, and ask the perfect questions. And finally, how to use your power by closing the best deal on a job offer. At every stage I will help you rethink the traditional, formulaic approach to job hunting. It's the detail that makes the difference. This book is not about hoping you get lucky. It is about creating your own luck." James Caan
