Traditional banks are facing unprecedented disruption from challenger banks today. So why aren't more of them launching challenger banks of their own? Well, two high-profile examples – JP Morgan's Finn and RBS's Bo – were launched with much fanfare, but both shuttered after less than a year. In light of this, the success of TMRW digital bank by UOB, launched in Thailand in 2019 and Indonesia in 2020, is astonishing. Dr Dennis Khoo, who created TMRW, shares with us the thinking behind the design of this revolutionary undertaking. At every step of the way, he and his team went against established paradigms and bucked conventional wisdom to build ASEAN's first digital bank. Filled with visionary analysis and on-the-ground guidance, *Driving Digital Transformation* demonstrates how this success can be replicated across all industries. For any leader or organisation starting on a major digital initiative, this book is a must-read. "What makes this playbook particularly valuable is that it is written by Dennis Khoo, one of the sharpest minds in the industry." – Mary Huen, CEO, Standard Chartered Hong Kong

Perspectives on Creativity explores the topic of creativity from multiple viewpoints, including those of the philosopher, psychologist, neuroscientist, therapist, educator, and artist. The book is organized around a series of themes, beginning with a consideration of the nature of creativity and how it can be cultivated, with special attention to how creativity can be fostered in the classroom and work settings. The second section presents qualitative studies of artists and asks what we can learn about creativity from the lives and work of these individuals, such as whether there exists a relationship between creativity and mental illness. The third section examines the healing power of creativity within the therapeutic milieu, from the relatively more well-known music and art therapy to the less familiar drama therapy. The final section of the book explores the relationship between creativity and the brain and presents studies to address whether the brains of creative individuals function differently from those of the less creative. What makes this book unique is that the topic of creativity is considered in an interdisciplinary way from both theoretical and applied perspectives, making it appealing to individuals from a wide variety of backgrounds. When a community experiences a fracture in its communal life, what tools can be used to foster reconciliation? How can right relationship be restored when there is conflict in the Body of Christ? In *Beyond Accompaniment*, William Nordenbrock proposes the use of a process that is based in the theory of Appreciative Inquiry as a ministerial method to guide a community from brokenness to communion. His practical application of this process in his work with St. Agatha Catholic Church in Chicago? A community whose pastor had been accused and convicted of sexually abusing minors in the parish? Will be beneficial for communities experiencing conflict of any kind. Nordenbrock helps us focus on the positive aspects of our communities in order to discover that our redemption and reconciliation with God, won for us by Christ, is inseparable from the reconciliation and communion that Christians are to live with one another." William A. Nordenbrock, CPPS, is an ordained member of the Missionaries of the Precious Blood. He is on staff at the Precious Blood Ministry of Reconciliation in Chicago (pbmr.org). Nordenbrock has served his congregation in a number of administrative roles and is currently a member of their General Council.

Throughout this book, Segal consistently offers positive, uplifting guidance while adopting an objective yet empathetic tone. A self-directed, interactive manual that should benefit experienced and new job-seekers alike. - Kirkus Reviews, "The most trusted voice in book reviews since 1993" "By the time you have an interview for a job you really want, the stakes are high. You are SO close. You don't want to blow it. Ideally, you want to wow them. Yet most professionals are not great at interviews. To be honest, most are terrible, and this includes people who graduated from Harvard Business School and similar places. Why? Because they don't have a game plan and they haven't put in the work required to execute a good one. So they get close to their dream job or even just an okay job, and they don't get it. The basic premise of Master the Interview is that you don't have to be that person. In this comprehensive book, Anne Marie Segal, a coach, lawyer and writer's writer, sets forth ALL the relevant aspects of interviewing effectively so that you can anticipate them, prepare for them and ultimately master them and get the job you want." - Michael F. Melcher, Author of The Creative Lawyer "It's a really terrific and practical book that helps people think about themselves in an organized and disciplined way while prepping for an interview." - Lisa Maguire, Financial Services Professional "This book is one of the best job search books today." - Joshua Waldman, Author of Job Searching with Social Media for Dummies What is different about this book than other job interview books on the market? Here are five top ways this book is unique: 1) It is a workbook, so you can write and review your own thoughts and learn through doing, guided by expert advice and examples from a host of interviewers and job candidates. 2) It is comprehensive, from networking and informational interviewing to negotiations and noncompetition agreements. With a handy overview in the first chapter on how to use the workbook, you can choose to cover what you need, when you need it. 3) It does not simply give you one so-called "right" answer to any interview situation or run through a list of potential Q&As, but instead it promotes a nuanced and authentic approach. 4) It puts you behind the scenes and into the mind of an interviewer, so you can think more clearly about how you will come across in various contexts (Skype, phone screenings, panel interviews, etc.). 5) It includes four chapters that guide you to build a solid and compelling personal value proposition from the ground-up and tailor your presentation for each target employer. Qualitative interviewing is among the most widely used methods in the social sciences, but it is arguably the least understood. In *The Science and Art of Interviewing*, Kathleen Gerson and Sarah Damaske offer clear, theoretically informed and empirically rich strategies for conducting interview studies. They present both a rationale and guide to the science-and art-of in-depth interviewing to take readers through all the steps in the research process, from the initial stage of formulating a question to the final one of presenting the results. Gerson and Damaske show readers how to develop a research design for interviewing, decide on and find an appropriate sample, construct a questionnaire, conduct probing interviews, and analyze the data they collect. At each stage, they also provide practical tips about how to address the ever-present, but rarely discussed challenges that qualitative researchers routinely encounter, particularly emphasizing the relationship between conducting well-crafted research and building powerful social theories. With an engaging, accessible style, *The Science and Art of Interviewing* targets a wide range of audiences, from upper-level undergraduates and graduate methods courses to students embarking on their dissertations to seasoned researchers at all stages of their careers.

Poverty and unemployment are on the rise among Canadian youth. *Reimagining Intervention in Young Lives* looks at the

issue from the perspective of those most affected, revealing the difficulties young people encounter with the “support system.” In-depth interviews with forty-five young people in Ottawa reveal that solutions do exist, predicated on recognition that the problem lies not with incorrigible youth, but with a social-aid structure that imposes barriers to success. Intervention is necessary, argue the authors, but not so much in the lives of young people as in the faulty structures that incorrectly presume how they interpret risk, poverty, and their own potential.
