For undergraduate and graduate-level courses in leadership. An exploration of what makes an effective leader Leadership in Organizations, 9th Edition provides a balance of theory and practice as it covers the major theories and research on leadership and managerial effectiveness in formal organisations. Rather than detailing an endless series of studies or prescribing exactly how leaders must operate, it sticks to the major findings and offers recommendations for improving managerial effectiveness. Using this approach, readers understand the implications of their decisions and can determine the best courses of action specific to the situation. With new examples, citations, and guidelines for better clarity and presentation, the text is a relevant and useful tool for students who expect to become managers in the near future.

The Practice of Adaptive Leadership will help you think more clearly and execute better in a constantly shifting environment. It offers a comprehensive and systematic approach to candidly assessing the situation and yourself, and then taking action. Its wisdom and advice are drawn from the experiences of people like you, committed to advancing what you care about most. The book is anchored in the framework of adaptive leadership, but goes beyond the theory to provide a practical set of stories, diagrams, techniques, and activities that will help you both assess and address the toughest challenges that lie ahead. Dozens of tools and tactics are presented in an exciting, clear, and reader-friendly design.

This book focuses on effective leadership in organizations through both theory and practice. It explains and critiques the major theories and studies that are most relevant and informative and reviews what we know about leadership effectiveness. The combination of theory and practice makes this text a useful resource for practicing managers who are looking for something more than superficial answers to difficult questions about leadership.

The facilitator's guide brings to life the content of the survey text, Leadership Theory. It offers instructive advice on how to prepare for the use of a critical perspective as well as providing practical resources to translate survey text content to practice. The facilitator's guide consists of: An overview of how to use the guide as well as recommended skills and reflection questions for educators prior to implementing material. Objectives, critical concepts, a chapter overview, and a chapter framework for each chapter from Leadership Theory Lesson plan "walk-throughs" containing 2-3 activities for each chapter of the survey text, with information for learning outcomes, activity setup, and additional notes for facilitation.

Leadership is a daunting subject for most developing leaders, but eventually all followers will be called upon to lead. Where do we start? What model or theory do we utilize? The choices become overwhelming for anyone attempting online searches. Everywhere you look are leadership books, programs, degrees, workshops, seminars, boot camps, and even mobile apps! Many organizations at Air University are utilizing the full range of leadership approach. Initially introduced by James MacGregor Burns in 1978 and Bernard Bass in 1985, these transformational and transactional leadership styles have sustained nearly four decades. Through (1) idealized transformational leader behaviors, one may raise the levels of his or her ethical and moral values while committing to "doing the right thing" for himself or herself and his or her followers; (2) by using inspirational motivation, leaders learn to articulate a vision to energize followers to accomplish more than they ever thought possible; (3) by intellectually stimulating followers, leaders will challenge followers to create and innovate as they reframe problems with renewed visions; and by providing individualized consideration, leaders may learn to incorporate each member's distinct gifts and talents as individual contributors to the organizational team. These transformational behaviors can offer connections to reaching (4) authentic transformational leadership by incorporating not only ethics and values but also, according to John Sosik, virtues and character strengths to refine one's leadership acumen, ameliorating leader-follower dynamics

Two leadership consultants identify three keys to being a more effective leader: knowing your strengths and investing in others' strengths, getting people with the right strengths on your team, and understanding and meeting the four basic needs of those who look to you for leadership.

In today's complex work world, things no longer get done simply because someone issues an order and someone else follows it. Most of us work in socially intricate organizations where we need the help not only of subordinates but of colleagues, superiors,

and outsiders to accomplish our goals. This often leaves us in a "power gap" because we must depend on people over whom we have little or no explicit control. This is a book about how to bridge that gap: how to exercise the power and influence you need to get things done through others when your responsibilities exceed your formal authority. Full of original ideas and expert insights about how organizations—and the people in them—function, *Power and Influence* goes further, demonstrating that lower-level personnel also need strong leadership skills and interpersonal know-how to perform well. Kotter shows how you can develop sufficient resources of "unofficial" power and influence to achieve goals, steer clear of conflicts, foster creative team behavior, and gain the cooperation and support you need from subordinates, coworkers, superiors—even people outside your department or organization. He also shows how you can avoid the twin traps of naivete and cynicism when dealing with power relationships, and how to use your power without abusing it. *Power and Influence* is essential for top managers who need to overcome the infighting, foot-dragging, and politicking that can destroy both morale and profits; for middle managers who don't want their careers sidetracked by unproductive power struggles; for professionals hindered by bureaucratic obstacles and deadline delays; and for staff workers who have to "manage the boss." This is not a book for those who want to "grab" power for their own ends. But if you'd like to create smooth, responsive working relationships and increase your personal effectiveness on the job, Kotter can show you how—and make the dynamics of power work for you instead of against you.

Shared Leadership: Reframing the Hows and Whys of Leadership brings together the foremost thinkers on the subject and is the first book of its kind to address the conceptual, methodological, and practical issues for shared leadership. Its aim is to advance understanding along many dimensions of the shared leadership phenomenon: its dynamics, moderators, appropriate settings, facilitating factors, contingencies, measurement, practice implications, and directions for the future. The volume provides a realistic and practical discussion of the benefits, as well as the risks and problems, associated with shared leadership. It will serve as an indispensable guide for researchers and practicing managers in identifying where and when shared leadership may be appropriate for organizations and teams.

Appropriate for undergraduate and graduate-level courses in Leadership or Managerial Effectiveness. The most comprehensive survey of the major theories and research on leadership and managerial effectiveness in formal organizations with practical suggestions for improving leadership skills.

The quality of an organization's top leaders is a critical influence on its overall effectiveness and continuing adaptability. Yet, little current research examines leadership within the context of organizational structure, such as how leaders influence organizational performance in those key moments when an executive's action is critical to driving the organization forward. This book represents a significant contribution to the literature of leadership, combining a contextual approach to organizational leadership with an in-depth treatment of the cognitive, social, and affective dynamics underlying that leadership. The Nature of Organizational Leadership, using an interdisciplinary approach that draws from the work of scholars in both management and psychology, provides a much-needed organizational perspective on the problems to be confronted by top executive leaders and the requisite behaviors, attributes, and outcomes necessary to lead organizations effectively.

"With good judgment, little else matters. Without it, nothing else matters." Whether we're talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader's judgment determines the fate of the entire organization. That's why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life

with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you're running a small department or a global corporation, Judgment will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has ever brought it into such clear focus.

“The only way to create great relationships and results is through servant leadership. It's all about putting other people first.” – from the foreword by John Maxwell We've all seen the negative impact of self-serving leaders in every sector of our society. Not infrequently, they end up bringing down their entire organization. But there is another way: servant leadership. Servant leaders lead by serving their people, not by exalting themselves. This collection features forty-four renowned servant leadership experts and practitioners—prominent business executives, bestselling authors, and respected spiritual leaders—who offer advice and tools for implementing this proven, but for some still radical, leadership model. Edited by legendary business author and lifelong servant leader Ken Blanchard and his longtime editor Renee Broadwell, this is the most comprehensive and wide-ranging guide ever published for what is, in every sense, a better way to lead.

The Second Edition of Leading Organizations offers an expanded focus on the fluid roles of leaders and participants (followers) and their mutual responsibility for organizational leadership. Like the first edition, this text contains chapters on implementing the organization's mission, structure, culture and strategy written by leading scholars in the field. These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. "AN IMPORTANT BOOK ABOUT MOTIVATION FROM A PROVEN MOTIVATOR." —JACK WELCH Yum! Brands CEO David Novak learned long ago that you can't lead a great organization of any size without getting your people aligned, enthusiastic, and focused relentlessly on the mission. But how do you do that? There are countless leadership books, but how many will actually help a Taco Bell shift manager, a Fortune 500 CEO, a new entrepreneur, or anyone in between? Over his fifteen years at Yum! Brands, Novak has developed a trademarked program—Taking People with You—that he personally teaches to thousands of managers around the world. He shows them how to make big things happen by getting people on their side. No skill in business is more important. And Yum!'s extraordinary success (at least 13 percent growth for each of the last ten years) proves his point. Novak knows that managers don't need leadership platitudes or business school theories. So he cuts right to the chase with a

step-by-step guide to setting big goals, building strong teams, blowing past your targets, and celebrating after you shock the skeptics. And then doing it again and again until consistent excellence becomes a core element of your culture.

The definition of great leadership, backed by ground-breaking research When Execution Isn't Enough examines the essential leadership skills that go beyond simply executing strategies well. It examines the leadership skills that inspire excellence and drive growth. Great leaders think differently, but their secrets, values, and behaviors can't be bottled—or can they? Is leadership so contextual that it defies standardization? In this book, McKinsey's global head of leadership development draws on ground-breaking McKinsey research to uncover 20 distinct leadership traits. All are important, but some make all the difference in inspiring organizations to exceptional results and growth—and a select few create the vast chasm between strong and weak organizations in terms of leadership effectiveness. Structured as a business parable, this book employs a rich cast of corporate characters to illustrate the critical behaviors of inspirational leadership and the outcomes that become possible. Attempting to nail down exactly what makes a leader inspirational is like trying to capture lightning in a bottle, but new McKinsey research has identified the behavioral leadership catalysts that inspire greatness. This book describes the behaviors to inspire that can be learned—to turn a good leader into a great leader. Understand the neuroscience of inspiration Tailor your inspirational approach to different leadership scenarios Initiate an inspiration cascade to influence people at scale The picture of leadership has changed over time. Today's great leaders are authentic, enthusiastic decision-makers with engaging visions, who are quick to communicate and take action. Less than half of all CEOs believe that their training investments will pay off, yet everyone agrees that leadership drives performance—where is the disconnect? It's in the belief that simple leadership behaviors equal results, forgetting that exceptional results only come from inspiration. When Execution Isn't Enough shows you how to attain the missing link of great leadership to bring exceptional results of your organization.

This book includes contributions from top scholars who outline the best leadership practices for the benefit of the practicing leader. Each chapter focuses on a specific area of leadership practice and ends with a set of "take away" best practices in each area—an executive summary in reverse—that will serve as a quick reference for those who might want to peruse chapters, but still extract the best practices, as well as a summary for those who thoroughly read each chapter. "Jay Alden Conger and Ronald Riggio have brought together a galaxy of sophisticated yet practical experts on leadership, stressing both the complexity and indispensability of both transactional and transforming leadership, with the blessing of the pioneering student of leadership, Bernie Bass." —James MacGregor Burns, professor emeritus, Willams College, and Pulitzer Prize winner

Twenty-five years ago Robert Greenleaf published these prophetic essays on what he coined servant leadership, a practical philosophy that replaces traditional autocratic leadership with a holistic, ethical approach. This highly influential book has been embraced by cutting edge management everywhere. Yet in these days of Enron and what VISA CEO Dee Hock calls our "era of massive institutional failure," Greenleaf's seminal work must reach the mainstream now more than ever. and more autonomous. Encourages collaboration, trust, listening, and empowerment. Offers long-lasting change, not a temporary fix. Extends beyond business for leaders of all types of groups.

A powerful force draws people to leadership in countless businesses, nonprofits, government agencies, and social movements—we call it invisible leadership. Invisible leadership embodies situations in which dedication to a compelling and deeply held common purpose is the motivating force for leadership. *The Power of Invisible Leadership: How a Compelling Common Purpose Inspires Exceptional Leadership*, by Gill Robinson Hickman and Georgia L. Sorenson, is a readable, research-based book that shows readers how invisible leadership exists in the space between leaders and followers, artists and subjects, and purposes and people. Rather than reinforcing the idea that leadership is embodied in celebrity leaders or in gifted and charismatic individuals, this insightful new book identifies "charisma of purpose" as the motivating force for invisible leadership.
