Virginia Woolf introduced us to the “Angel in the House”, now prepare to meet... The Bitch In the House. This e-book includes an exclusive excerpt from *The Bitch is Back: Older, Wiser, and Getting Happier*, a second collection of essays from nine of the contributors featured in *The Bitch in the House* and from sixteen captivating new voices. Women today have more choices than at any time in history, yet many smart, ambitious, contemporary women are finding themselves angry, dissatisfied, stressed out. Why are they dissatisfied? And what do they really want? These questions form the premise of this passionate, provocative, funny, searingly honest collection of original essays in which twenty-six women writers—ranging in age from twenty-four to sixty-five, single and childless or married with children or four times divorced—invite readers into their lives, minds, and bedrooms to talk about the choices they’ve made, what’s working, and what’s not. With wit and humor, in prose as poetic and powerful as it is blunt and dead-on, these intriguing women offer details of their lives that they’ve never publicly revealed before, candidly sounding off on:

- The difficult decisions and compromises of living with lovers, marrying, staying single and having children
- The perpetual tug of war between love and work, family and career
- The struggle to simultaneously care for ailing parents and a young family
- The myth of co-parenting
- Dealing with helpless mates and needy toddlers
- The constrictions of traditional women’s roles as well as the clichés of feminism
- Anger at laid-back live-in lovers content to live off a hardworking woman’s checkbook
- Anger at being criticized for one’s weight
- Anger directed at their mothers, right and wrong
- And—well—more anger...

“This book was born out of anger,” begins Cathi Hanauer, but the end result is an intimate sharing of experience that will move, amuse, and enlighten. *The Bitch in the House* is a perfect companion for your students as they plot a course through the many voices of modern feminism. This is the sound of the collective voice of successful women today—in all their anger, grace, and glory. From *The Bitch In the House*: “I believed myself to be a feminist, and I vowed never to fall into the same trap of domestic boredom and servitude that I saw my mother as being fully entrenched in; never to settle for a life that was, as I saw it, lacking independence, authority, and respect.” —E.S. Maduro, page 5 “Here are a few things people have said about me at the office: ‘You’re unflappable.’ ‘Are you ever in a bad mood?’ Here are things people—okay, the members of my family—have said about me at home: ‘Mommy is always grumpy.’ ‘Why are you so tense?’ ‘You’re too mean to live in this house and I want you to go back to work for the rest of your life!’” —Kristin van Ogtrop, page 161 “I didn’t want to be a bad mother I wanted to be my mother-safe, protective, rational, calm-without giving up all my anger, because my anger fueled me.” —Elissa Schappell, page 195

A young Registered Nurse, not long out of her training years in a large, busy county hospital serving a major U.S. city, begins her day in the acute locked psychiatric ward of a smaller county hospital nearby. While she knows, in general, what to expect, the details that will emerge over the next eight hours are as yet not revealed. What follows, taken from the notes in her journal concerning that day, reflect the vast array of tragedies, great and small, the triumphs, the hopes, and the disappointments of a representative sample of the 20% of American citizens who will, during their lives, experience similar events that will cause them to spend time in such a setting. Events like suicide attempts, incest, murder, profound unhappiness, entrapment by mind-wrenching drugs, failed loves, and bizarre behavior, not confined to the patients alone, that set people apart from their fellows, along with hope and the earnest wish for a better life. This book, all of it true - though the names of the actors have been disguised - describes a burgeoning problem: what is, sometimes loosely and inaccurately, termed "mental illness" and modern attempts to deal with it. Many of them challenge our best efforts to define what is, and what is not, "normal." Their numbers are growing; the cost of their care takes a huge portion of health expenditures. Solutions are far from being at hand, yet those solutions are a measure of our humanity. Some of the people you will meet here are your friends and neighbors, your family and, just possibly, you yourself. "Black Mesa" by Zane Grey. Published by Good Press. Essays on a Science of Mythology is a cooperative work between C. Kerényi, who has been called the most psychological of mythologists, and C. G. Jung, who has been called the most mythological of psychologists. Kerényi contributes an essay on the Divine Child and one on the Kore (the Maiden), together with a substantial introduction and conclusion. Jung contributes a psychological commentary on each essay. Both men hoped, through their collaboration, to elevate the study of mythology to the status of a science. In *The Primordial Child in Primordial Times* Kerényi treats the child-God as an enduring and significant figure in Greek, Norse, Finnish, Etruscan, and Judeo-Christian mythology. He discusses the Kore as Athena, Artemis, Hecate, and Demeter-Persephone, the mother-daughter of the Eleusinian mysteries. Jung speaks of the Divine Child and the Maiden as living psychological realities that provide continuing meaning in people's lives. The investigations of C. Kerényi are continued in a later study, *Eleusis: Archetypal Image of Mother and Daughter* (Princeton).

"This is a coursebook and reference guide for ichthyology courses that will also serve as a tool for ichthyologists, fisheries scientists, marine biologists, and vertebrate zoologists. It will cover the basic anatomy and diversity of all 62 orders of fishes, focusing on the distinguishing characteristics of approximately 180 of the most commonly encountered fish families. Each family will be diagnosed with easily observed characteristics and clear photos--many in color and from living specimens. This guide will be distinctive through the use of photographs of preserved specimens primarily from the Scripps Institution of Oceanography Marine Vertebrate Collection, supplemented by radiographs and additional illustrations of key characters. The goal is to give ichthyology students, fisheries scientists, marine biologists, vertebrate zoologists, and others with an interest or stake in the diversity of fishes a broad overview of the morphological diversity of fishes, arranged in a modern classification system. For students, it's a natural complement to primary ichthyology textbooks, which don't cover the breadth of morphological characteristics necessary to identify fish"--Provided by publisher.

Friedman and Michael Mandelbaum, on sale September 5th, 2011. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. *The World Is Flat 3.0* is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of *The Lexus and the Olive Tree*. With the help of his closest companions, Morgan fights to keep his home secure--only to discover shocking information about the state of the nation in the process. The Fourth Edition of *Statistics: A Gentle Introduction* shows students that an introductory statistics class doesn't need to be difficult or dull. Author Fred Coolidge minimizes students' anxieties about math by explaining the concepts of statistics in plain language first, before addressing the math. Each formula within the text has a step-by-step example to demonstrate the calculation so students can follow along. Only those formulas that are important for final calculations are included in the text so students can focus on the concepts, not the numbers. A wealth of real-world examples and applications gives a context for statistics in the real world and how it helps us solve problems and make informed choices. New to the Fourth Edition are sections on working with big data, new coverage of alternative non-parametric tests, beta coefficients, and the "nocebo effect," discussions of p values in the context of research, an expanded discussion of confidence intervals, and more exercises and homework options under the new feature "Test Yourself."

With the 21st century upon us, many people are talking about all the "earth changes" that will occur. However, in this inspirational book, best-selling author Louise L. Hay reveals that the primary changes we will see will be internal changes. She points out that when we, as women, are willing to shift our internal ground, our earth, we will operate on a much more expanded level in life.

Louise's goal is to see that all women experience self-love, self-worth, self-esteem, and a powerful place in society. In her inimitably warm and forthright manner, she offers penetrating insights into how women of all ages and backgrounds can achieve this goal and make the coming years the most productive, fulfilling, and empowering ones ever!

To many of us, the experiences that we grew up taking for granted leave become distant dreams in our adult lives: marriages that last a lifetime; safe neighborhoods to call home; the certainty that our children will have a better life than we did; and most of all, lots of time to spend as we wish, living for the moment. Instead, we find our time and energy spent recovering from the past or protecting ourselves from the future. The result is a desperate, sometimes dangerous, and often unsuccessful, search for meaning in our lives. In Real Moments, Barbara De Angelis defines happiness not as an acquisition, but as a skill--the skill of capturing every moment and living it completely. With insight, wisdom, and vision, she teaches us how to rediscover real moments with our mates and our children, with our work and our play, in sex and intimacy, and real moments with ourselves. It is an examination of our relationship with the process of living itself, offering inspiration as well as practical tools for creating more of one of the most precious moments of all--moments of true meaning in our lives.

Aion is one of a number of major works that Jung wrote during his seventies that were concerned with the relations between psychology, alchemy and religion. He is particularly concerned in this volume with the rise of Christianity and with the figure of Christ. He explores how Christianity came about when it did, the importance of the figure of Christ and the identification of the figure of Christ with the archetype of the Self. A matter of special importance to Jung in his seventies - the problem of opposites, particularly good and evil - is further discussed and the importance of the symbolism of the fish, which recurs as a symbol of both Christ and the devil, is examined. As a study of the archetype of the self, Aion complements The Archetypes and the Collective Unconscious, which is also published in paperback.

Thousands of readers who have profited from engagement with the lively mind of Rudolf Arnheim over the decades will receive news of this new collection of essays expectantly. In the essays collected here, as in his earlier work on a large variety of art forms, Arnheim explores concrete poetry and the metaphors of Dante, photography and the meaning of music. There are essays on color composition, forgeries, and the problems of perspective, on art in education and therapy, on the style of artists' late works, and the reading of maps. Also, in a triplet of essays on pioneers in the psychology of art (Max Wertheimer, Gustav Theodor Fechner, and Wilhelm Worringer) Arnheim goes back to the roots of modern thinking about the mechanisms of artistic perception.
