justice system fails our most vulnerable immigrant communities. On the surface, fifty-eight-year-old Jose Martinez didn't seem evil or even that remarkable—just a regular neighbor, good with cars and devoted to his family. But in between taking his children to Disneyland and visiting his mom, Martinez was also one of the most skilled professional killers police had ever seen. He tracked one victim to one of the wealthiest corners of America, a horse ranch in Santa Barbara, and shot him dead in the morning sunlight, setting off a decades-long manhunt. He shot another man, a farmworker, right in front of his young wife as they drove to work in the fields. The widow would wait decades for justice. Those were murders for hire. Others he killed for vengeance. How did Martinez manage to evade law enforcement for so long with little more than a slap on the wrist? Because he understood a dark truth about the criminal justice system: if you kill the "right people"—people who are poor, who aren't white, and who don't have anyone to speak up for them—you can get away with it. Melding the pacing and suspense of a true crime thriller with the rigor of top-notch investigative journalism, *The Devil's Harvest* follows award-winning reporter Jessica Garrison's relentless search for the truth as she traces the life of this assassin, the cops who were always a few steps behind him, and the families of his many victims. Drawing upon decades of case files, interrogation transcripts, on-the-ground reporting, and Martinez's chilling handwritten journals, *The Devil's Harvest* uses a gripping and often shocking narrative to dig into one of the most important moral questions haunting our

politically divided nation today: Why do some deaths—and some lives—matter more than others?

"Meticulously researched and tightly woven, *The Devil's Harvest* is an important story because it tells us that if [this] can happen in one place, then it can happen in any place. And that's damn scary." —Michael Connelly, New York Times bestselling author of *The Closers*, *The Lincoln Lawyer*, and *The Night Fire*

This book focuses on controversial issues in neuroanesthesia and neurocritical care that in general have been subjected to insufficient professional scrutiny. The book is in three parts, the first of which is devoted to topics relating to traumatic brain and spinal cord injury, such as brain tissue oxygenation, the role of biomarkers, and diagnosis of brain death. Aspects of airway and pain management are then addressed, covering, for example, airway management in an emergency setting, airway evaluation in the edentulous patient, and pain management in neurosurgery and after craniotomy. The final part of the book considers a wide range of other challenging subjects in the field of neuroanesthesia and neurocritical care. Throughout, much information is provided on the latest, state of the art management. The authors are acknowledged experts in the issues they discuss, and the book will be of interest for graduate and undergraduate students, residents, neuroanesthetists, neurointensivists, emergency medicine residents and specialists, fellows in neurocritical care and all those directly involved in the perioperative care of patients with head and neck pathology.
