**Health Promotion in Multicultural Populations** Michael V. Kline, Robert M. Huff, 2008-06-11 The thoroughly updated Second Edition of *Health Promotion in Multicultural Populations* grounds readers in the understanding that health promotion programs in multicultural settings require an in-depth knowledge of the cultural group being targeted. Numerous advances and improvements in theory and practice in health promotion and disease prevention (HPDP) are presented. Editors Michael V Kline and Robert M Huff have expanded the book to include increased attention directed to students and instructors while also continuing to provide a handbook for practitioners in the field. This book combines the necessary pedagogical features of a textbook with the scholarship found in a traditional handbook. Several new chapters have been added early in the text to provide stronger foundations for understanding the five sections that follow. The book considers five specific multicultural groups: Hispanic/Latino, African American, American Indian and Alaska Native, Asian American, and Pacific Islander populations. The first chapter in each of the five population group sections presents an overview devoted to understanding this special population from a variety of perspectives. The second chapter of each section explains how to assess, plan, implement, and evaluate health promotion programs for each of the specific groups. The third chapter in each section highlights a case study to emphasize points made in the overview and planning chapters. The fourth chapter in each section provides Tips for working with the cultural groups described in that section. New to the Second Edition Devotes a chapter to traditional health beliefs and traditions that can help the practitioner better understand how these beliefs and traditions can impact on Western biomedical practices Contains a new chapter that evaluates health disparities across the U.S. Presents a new chapter that examines ethical dilemmas and considerations in a multicultural context Offers updated citations and content throughout Gives selected Web sites of interest Intended Audience This book is ideal for practitioners and students in the fields of health promotion and education, public health, nursing, medicine, psychology, sociology, social work, physical therapy, radiology technology and other allied professions.

**Latina/o American Health and Mental Health** Leticia Arellano-Morales Ph.D.,Erica T. Sosa,2018-02-16 Essential reading for health and mental health administrators, community agencies, and policy makers as well as students and general interest readers, this book details the state of the physical and mental health of many Latina/o American groups. While Latina/o Americans originate from more than 25 countries, most health or mental health texts largely focus on Mexican Americans and often fail to address other Latina/o groups, such as South Americans, Central Americans, Puerto Ricans, and others. Moreover, most works address either health or mental health, but not both together. In contrast, Latina/o American Health and Mental Health addresses both the health and mental health of diverse Latina/o heritage groups. An interdisciplinary approach enables readers to identify both similar and divergent areas that affect the health and mental health of Latina/o Americans. Strengths-based and social justice perspectives, rather than a deficit perspective, guide the work in its assessment of disparities among treatment for different groups. This text is ideal for graduate students, practitioners, researchers, and policy makers in public health, community health, family studies, psychology, counseling, social work, and Latina/o studies who are interested in understanding Latina/o health and mental health in the United States and providing culturally responsive services.

*Health Program Planning, Implementation, and Evaluation* Lawrence W. Green, Andrea Carlson Gielen, Judith M. Ottoson, Darleen V. Peterson, Marshall W. Kreuter, 2022-02-08 A time-tested, landmark approach to health promotion and communication projects and everything that goes into making them successful. For more than 40 years, the PRECEDE-PROCEED model, developed in the early 1970s by Lawrence W. Green and first published as a text in 1980 with Marshall W. Kreuter, Sigrid G. Deeds, and Kay B. Partridge, has been effectively applied worldwide to address a broad range of health issues: risk factors like tobacco and lack of exercise, social determinants of health such as lack of access to transportation and safe housing, and major disease challenges like heart disease and guinea worm disease. In *Health Program Planning, Implementation, and Evaluation*, Green and his team of senior editors and chapter authors combine their expertise to offer a high-level guide to public health programming. This guide aligns with foundational public health competencies required by increasingly rigorous certification and accreditation standards. Driven by the coronavirus pandemic and a looming climate crisis, the book addresses the rapid changes in modern-day conceptions of disease prevention and health promotion. Today's public health practitioners and researchers are often called upon to address a complex web of factors, including population inequities, that influence health status, from biology to social and structural determinants. Program and policy solutions to

population health challenges require systematic planning, implementation, and evaluation. Providing students with knowledge, skills, and a range of tools, the book recognizes new approaches to communication and fresh methods for reaching a greater diversity of communities. The authors highlight the importance of starting the population health planning process with an inclusive assessment of the social needs and quality-of-life concerns of the community. They explain how to assess health problems systematically in epidemiological terms and address the behavioral and environmental determinants of the most important and changeable health problems. They also cover procedures for assessing and developing the capacity of communities and organizations to implement and evaluate programs. Drawing on more than 1,200 published applications of the PRECEDE-PROCEED model, *Health Program Planning, Implementation, and Evaluation* features numerous case studies and contributions from internationally recognized experts, including governmental, academic, and community public health leaders, giving readers a thorough and well-rounded view of the subject. Ultimately, it is an up-to-date powerhouse for community and global health promotion at all levels. Contributors: Faten Ben Abdelaziz, John P. Allegrante, Patricia Chalela, Cam Escoffery, Maria E. Fernandez, Jonathan E. Fielding, Robert S. Gold, Shelly Golden, Holly Hunt, Vanya C. Jones, Michelle C. Kegler, Gerjo Kok, Lloyd J. Kolbe, Chris Y. Lovato, Rodney Lyn, Guy Parcel, Janey C. Cousins, 2014-09-05 Encyclopedia of Human Services and Diversity is the first encyclopedia to reflect the changes in the mission of human services professionals as they face today's increasingly diverse service population. Diversity encompasses a broad range of human differences, including differences in ability and disability, age, education level, ethnicity, gender, geographic origin, religion, sexual orientation, socioeconomic class, and values. Understanding the needs and problems of Asian Americans, Hispanic Americans, the deaf, the blind, the LGBT community, and many other groups demands an up-to-date and cutting-edge reference. This three-volume encyclopedia provides human services students, professors, librarians, and practitioners the reference information they need to meet the needs of an increasingly diverse population. Features: 600 signed entries are organized A-to-Z across three volumes. Entries, authored by key figures in the field, conclude with cross references and further readings. A Reader's Guide groups related articles within broad, thematic areas, such as aging, community mental health, family and child services, substance abuse, etc. A detailed index, the Reader's Guide, and cross references combine for search-and-browse in the electronic version. A helpful Resource Guide guides students to classic books, journals, and web sites, and a glossary assists them with the terminology of the field. Available in both print and electronic formats, Encyclopedia of Human Services and Diversity is an ideal reference for students, practitioners, faculty and librarians.

*Multicultural America* Carlos E. Cortés, 2013-08-15 This comprehensive title is among the first to extensively use newly released 2010 U.S. Census data to examine multiculturalism today and tomorrow in America. This distinction is important considering the following NPR report by Eyder Peralta: "Based on the first national numbers released by the Census Bureau, the AP reports that minorities account for 90 percent of the total U.S. growth since 2000, due to immigration and higher birth rates for Latinos." According to John Logan, a Brown University sociologist who has analyzed most of the census figures, "The futures of most metropolitan areas in the country are contingent on how attractive they are to Hispanic and Asian populations." Both non-Hispanic whites and blacks are getting older as a group. "These groups are tending to fade out," he added. Another demographer, William H. Frey with the Brookings Institution, told The Washington Post that this has

been a pivotal decade. “We’re pivoting from a white-black-dominated American population to one that is multiracial and multicultural.” *Multicultural America: A Multimedia Encyclopedia* explores this pivotal moment and its ramifications with more than 900 signed entries not just providing a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is America today. Pedagogical elements include an introduction, a thematic reader’s guide, a chronology of multicultural milestones, a glossary, a resource guide to key books, journals, and Internet sites, and an appendix of 2010 U.S. Census Data. Finally, the electronic version will be the only reference work on this topic to augment written entries with multimedia for today’s students, with 100 videos (with transcripts) from Getty Images and Video Vault, the Agence France Press, and Sky News, as reviewed by the media librarian of the Rutgers University Libraries, working in concert with the title’s editors.
