**Does Higher Education Teach Students to Think Critically?** OECD,2022-08-30 There is a discernible and growing gap between the qualifications that a university degree certifies and the actual generic, 21st-century skills with which students graduate from higher education. By generic skills, it is meant literacy and critical thinking skills encompassing problem solving, analytic reasoning and communications competency.

*Scolpire il Mosè nascosto dentro il marmo* Daniela Mariana Corveddu,2023-07-10 In ogni alunno è nascosto un Mosè nel marmo del suo background. L'Evidence Based Education è lo scalpello che può farlo emergere, perchè la valutazione è un'arte e ha bisogno di tecnica per essere personalizzata.

**¿La educación superior enseña a pensar críticamente?** Dirk Van Damme ,Doris Zhaner,2024-05-07 Existe una brecha notoria y creciente entre las cualificaciones que certifica un grado universitario y las competencias genéricas del siglo XXI con las que se gradúan realmente los estudiantes al final de la educación superior. Cuando hablamos de competencias genéricas nos referimos a las habilidades de lectoescritura y pensamiento crítico que incluyen las habilidades de solución de problemas, razonamiento analítico y capacidad de comunicación. A medida que la automatización se va apropiando de las tareas no cognitivas, o de bajo nivel cognitivo, en el mundo laboral actual, estas competencias genéricas empiezan a cobrar un valor especial, pero el hecho de tener un grado terciario no es un buen indicador del nivel de esas competencias. En los Estados Unidos, el Consejo para la Ayuda de la Educación (CAE) desarrolló una evaluación de las competencias genéricas llamada CLA+ y entre los años 2016 y 2021 realizó pruebas en seis países: Estados Unidos, Reino Unido, Italia, México, Finlandia y Chile. Este libro reúne la información y los análisis de esta "Iniciativa Internacional CLA+". ¿La educación superior enseña a pensar críticamente? fue publicado originalmente en inglés por la Organización para la Cooperación y el Desarrollo Económicos (OCDE), en el 2022.

**Le competenze. Una mappa per orientarsi** L. Benadusi, S. Molina, 2018

**Employability & Competences** Vanna Boffo, Monica Fedeli, 2018 The book is the final report of the researches, discussions, conversations around and about the Project PRIN Employability & Competences which took place on March 9th-11th, 2017 within an International Conference at the University of Florence. It was the final event of the project PRIN2012LATR9N which aims were: «to design innovative programs for higher education, to promote personalized and learner-centered teaching and learning, to build on job competencies, to value talents to create new work opportunities, to support young adults during their employment emergency, as a response to socio economic crisis and as a citizenship action». The research activities concerned the main phases of the students' academic life: career guidance upon entry, personalized teaching, career calling, professional vocation, profession building activities such as internships and work related experiences, and lastly job placement.

**Politeness in Language** Richard J. Watts, Sachiko Ide, Konrad Ehlich, 2008-08-22 The second edition of this collection of 13 original papers contains an updated introductory section detailing the significance that the original articles published in 1992 have for the further development of research into linguistic politeness into the 21st century. The original articles focus on the phenomenon of politeness in language. They present the most important problems in developing a theory of linguistic politeness, which must deal with the crucial differences between lay notions of politeness in different cultures and the term 'politeness' as a concept within a theory of linguistic politeness. The universal validity of the term itself is called into question, as are models such as those developed by Brown and Levinson, Lakoff, and Leech. New approaches are suggested. In addition to this theoretical discussion, an empirical section presents a number of case studies and research projects in linguistic politeness. These show what has been achieved within current models and what still remains to be done, in particular with reference to cross-cultural studies in politeness and differences between a Western and a non-Western approach to the subject. The publication of this second edition demonstrates that the significance of the collection is just as

salient in the first decade of the new millennium as it was at the beginning of the 1990s.

**Economy of the Unlost** Anne Carson, 2009-04-11 The ancient Greek lyric poet Simonides of Keos was the first poet in the Western tradition to take money for poetic composition. From this starting point, Anne Carson launches an exploration, poetic in its own right, of the idea of poetic economy. She offers a reading of certain of Simonides' texts and aligns these with writings of the modern Romanian poet Paul Celan, a Jew and survivor of the Holocaust, whose economies of language are notorious. Asking such questions as, What is lost when words are wasted? and Who profits when words are saved? Carson reveals the two poets' striking commonalities. In Carson's view Simonides and Celan share a similar mentality or disposition toward the world, language and the work of the poet. *Economy of the Unlost* begins by showing how each of the two poets stands in a state of alienation between two worlds. In Simonides' case, the gift economy of fifth-century b.c. Greece was giving way to one based on money and commodities, while Celan's life spanned pre- and post-Holocaust worlds, and he himself, writing in German, became estranged from his native language. Carson goes on to consider various aspects of the two poets' techniques for coming to grips with the invisible through the visible world. A focus on the genre of the epitaph grants insights into the kinds of exchange the poets envision between the living and the dead. Assessing the impact on Simonidean composition of the material fact of inscription on stone, Carson suggests that a need for brevity influenced the exactitude and clarity of Simonides' style, and proposes a comparison with Celan's interest in the negative design of printmaking: both poets, though in different ways, employ a kind of negative image making, cutting away all that is superfluous. This book's juxtaposition of the two poets illuminates their differences--Simonides' fundamental faith in the power of the word, Celan's ultimate despair--as well as their similarities; it provides fertile ground for the virtuosic interplay of Carson's scholarship and her poetic sensibility.

*Sociology of Economic Innovation* Francesco Ramella, 2015-07-24 This book offers a sociological overview of the theories and research on economic innovation. Over the past few decades, the economics of innovation has given rise to a lively flow of studies, and innovation studies continues to develop as an interdisciplinary field of research. Sociology in general, and economic sociology in particular, have already made a significant contribution to innovation and continue to play a crucial role in this emerging field. This book presents an integrated sociological approach to the study of economic innovation. It explores the key theories and sociological research on innovation, as well as other contributions to the field of Innovation Studies from economists, geographers, and psychologists. Ramella argues that in order to understand the processes of innovation, it is necessary to look at the actors of innovation, at the relations that exist between them and at the sectoral and territorial contexts in which they operate. For students, this book includes international case studies throughout, as well as further study questions at the end of each chapter.

**Consumer Culture** Roberta Sassatelli, 2007-04-30 A thorough and wide-ranging synthetic account of social scientific

research on consumption which will set the standard for the second generation of textbooks on cultures of consumption. - Alan Warde, University of Manchester The multi-disciplinary nature of the book provides new and revealing insights, and Sassatelli conveys brilliantly the heterogeneity and ambivalent nature of consumer identities, consumer practices and consumer cultures... Newcomers to consumer culture will find this an invaluable primer and introduction to the major concepts and ideas, while those familiar with the field will find Sassatelli's sharp analysis and discussion both refreshing and inspiring. - James Skinner, Journal of Sociology This is a model of what a text book ought to be. Over the past decade the original debates about consumption have been overlaid by a vast amount of detailed research, and it seems unimaginable that a single text could do justice to all of these. To do so would involve as much a commitment to depth as to breadth. I was quite astonished at how well Sassatelli succeeds in balancing the two... Ultimately, it's the book that I would trust to help people digest what we now have discovered about consumption and start from a much more mature and reflective foundation to consider what more we might yet do. - Daniel Miller, Material World Showing the cultural and institutional processes that have brought the notion of the 'consumer' to life, this book guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within. While rooted in sociology, Sassatelli draws on the traditions of history, anthropology, geography and economics to provide: a history of the rise of consumer culture around the world a richly illustrated analysis of theory from neo-classical economics, to critical theory, to theories of practice and ritual de-commodification a compelling discussion of the politics underlying our consumption practices. An exemplary introduction to the history and theory of consumer culture, this book provides nuanced answers to some of the most central questions of our time.

**The Fascist Dictatorship in Italy** Gaetano Salvemini, 1927

Scribes, Script, and Books Leila Avrin, 2010 In this detailed overview of the history of the handmade book, Avrin looks at the development of scripts and styles of illumination, the making of manuscripts, and the technological processes involved in paper-making and book-binding. **The Cambridge Companion to Tocqueville** Cheryl B. Welch, 2006-10-02 The Cambridge Companion to Tocqueville contains a set of critical interpretive essays by internationally renowned scholars on the work of Alexis de Tocqueville. The essays cover Tocqueville's major themes (liberty, equality, democracy, despotism, civil society, religion) and texts (Democracy in America, Recollections, Old Regime and the Revolution, other important reports, speeches and letters). The authors analyze both Tocqueville's contributions as a theorist of modern democracy and his craft as a writer. Collections of secondary work on Tocqueville have tended to fall into camps, either bringing together only scholars from one point of view

or discipline, or treating only one major text. This Companion transcends national, ideological, disciplinary, and textual boundaries to bring together the best in recent Tocqueville scholarship. The essays not only introduce Tocqueville's major themes and texts, but also put forward provocative arguments that advance the field of Tocqueville studies.

**Technology and Society** John Goyder,2005 In between, the book examines the social and historical foundation for the development and diffusion of technology in the Canadian context.--BOOK JACKET.

*Urban Theory and the Urban Experience* Simon Parker,2003-11-06 For the first time Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies, and the often unacknowledged debt that empirical and theoretical perspectives on the city owe to one another. Both students and urban scholars will appreciate the critical way in which classical and contemporary debates on the nature of the city are presented. Extensive use is made throughout of documentary, literary and cultural sources to bring the different theoretical perspectives to life. Discussion points introduce and explain key concepts and intellectual histories in a jargon free manner. End of chapter further readings have also been annotated to encourage additional study.
