This 208-page paperback book contains step-by-step instructions for 101 magic tricks, and coloured illustrations throughout.

Provides instructions for how to perform eight magic tricks involving playing cards, memory, and sleight-of-hand.

Here's an excellent guidebook for people who want to learn how to perform card tricks without having to spend wearisome hours practicing. Thirteen diagrams and easy-to-follow directions provide the novice with fundamentals for successfully mastering more than 50 impressive techniques -- among them The False Shuffle, The Corner Crimp, Sensitive Finger Tips, Palming, The Glide, The Slip Force, and Reading the Pack. No special dexterity is needed to successfully complete any of these methods.

This giant-sized collection explains how to perform over 600 professional card tricks, devised by the world's greatest magicians. The finest single compendium available, the book features a clear style that makes the instructions easy to follow.

Magic is everywhere, from the big spectacle celebrity of David Copperfield and Siegfried and Roy to the quirky Penn and Teller to the spooky David Blaine and Criss Angel to the endless material on YouTube. But until now, learning it has never been easy—that's all about to change with Magic, a book that does for close-up magic what How to Grill does for barbecue. Written by charismatic young magician Joshua Jay, Magic combines expertise, photographs, and step-by-step directions showing how to perform 100 tricks. Joshua Jay took home the top prize at the World Magic Seminar (the Olympics of magic) when he was just 16 years old. Now he continues to perform magic, write about magic, eat, sleep, and breathe magic. Here, he brings all his passion and knowledge to teaching magic. Each trick is broken down into the Effect, the Secret, the Set-up, and, most important, the Performance, with lessons on what to say, how to direct the audience's attention, where to keep your hands, and so on. (In other words, how to be smart about the things your audience is surprisingly clueless about.) Here are the Ten Greatest Card Tricks; tricks to dazzle a dinner date; tricks to perform for the boss (poke a hole through his shirt, then magically mend it); tricks especially for kids; and even tricks for an audience in another state—with "Australian Self-Help," you can find a participant's chosen card over the phone. It's the Aha! book for a subject whose time has come.

If you practice any sort of magic—or plan on giving it a try—you probably know that for most people, card tricks are often the starting point. If you have a deck of cards readily available, as many common households do, the only things required to wow an audience are a little sleight of hand and a magician's secrets. In spite of the timeless credo "good magicians never reveal their secrets," renowned magicians Jean Hugard and Frederick Braué generously divulged theirs in Card Tricks: The Royal Road to Card Magic.

Published originally in the 1940s, this classic guide contains more than one hundred spectacular tricks allowing anyone to pick up a deck and dazzle an audience—whether their performance is in a theatre, at a party, or even on the street! With more than 120 illustrations to accompany trick instructions and the addition of a new foreword by Steven Cohen, a master of sleight of hand, this edition of Card Tricks is one of the leading authoritative books on card magic.

Mystifying, entertaining illusions include "Prediction Wallet," in which the card a spectator has chosen is found in the magician's wallet; "Suspense," in which a card remains dangling in midair, others. 116 black-and-white illustrations.

Pull some magic out of your hat with these guides to the best tricks around. Guaranteed to amaze and astound your audience. Featuring step-by-step instructions, top tip boxes, clear bright illustrations, and including profiles of famous magicians

Covers impromptu tricks, banded decks, stacked-deck tricks, gambling secrets, sleight-of-hand tricks, prepared-card tricks, shuffle systems, four-ace tricks, one-way decks, and sample card routines

Demonstrates how to perform a wealth of tricks using everyday props as well as a variety of card tricks, illustrating each in color photographs that reveal hidden details of sleight of hand.

What is a self-working card trick? A trick that does not depend upon legerdemain or special abilities on the part of the magician, but a trick that works automatically because of the mathematics inherent in the card deck itself. Long practice and supernormal dexterity are not needed to perform these tricks, yet they are often among the most entertaining and most spectacular of all card tricks. Some of these sure-fire tricks are simple, a good place to begin. Others were specially adapted from professional routines and are here

presented for the first time for amateurs. Almost all of these tricks can be worked informally, with a borrowed deck of cards. Some also adapt to stage presentation. Individual tricks in this book have sold for more than the price of the entire book. Amateurs can use them to get a start in magic and to feel, at once, the rewards of giving a professional performance.

Provides magicians of all abilities with step-by-step instructions for executing card tricks and flourishes, including making cards appear and disappear, change suit, and defy the laws of gravity.

"Magical Mathematics reveals the secrets of amazing, fun-to-perform card tricks--and the profound mathematical ideas behind them--that will astound even the most accomplished magician. Persi Diaconis and Ron Graham provide easy, step-by-step instructions for each trick, explaining how to set up the effect and offering tips on what to say and do while performing it. Each card trick introduces a new mathematical idea, and varying the tricks in turn takes readers to the very threshold of today's mathematical knowledge. For example, the Gilbreath principle--a fantastic effect where the cards remain in control despite being shuffled--is found to share an intimate connection with the Mandelbrot set. Other card tricks link to the mathematical secrets of combinatorics, graph theory, number theory, topology, the Riemann hypothesis, and even Fermat's last theorem. Diaconis and Graham are mathematicians as well as skilled performers with decades of professional experience between them. In this book they share a wealth of conjuring lore, including some closely guarded secrets of legendary magicians. Magical Mathematics covers the mathematics of juggling and shows how the I Ching connects to the history of probability and magic tricks both old and new. It tells the stories--and reveals the best tricks--of the eccentric and brilliant inventors of mathematical magic. Magical Mathematics exposes old gambling secrets through the mathematics of shuffling cards, explains the classic street-gambling scam of three-card monte, traces the history of mathematical magic back to the thirteenth century and the oldest mathematical trick--and much more"-

A clearly illustrated book for kids on magic and card tricks.

Two books, bound together in a single volume, ground novices in fundamentals and lead them to mastery of 80 different tricks involving cards, coins, matches, and other articles. 89 illustrations.
