**David M. Newman**

**SAGE Readings for Introductory Sociology** Kimberly McGann, 2015-01-27 SAGE Readings for Introductory Sociology is a concise, affordable anthology that contains 22 popular sociology statements designed to introduce readers to the sociological perspective. Kimberly McGann puts together readings that cover core topics in sociology, including culture, socialization, interaction, deviance, gender, class, and race. An alternate, topical table of contents suggests ways to match readings to other subfields in sociology (like family, education, work, and religion), and identifies readings that reflect four theoretical traditions: functionalism, symbolic interactionism, conflict theory, and feminism.

**SAGE Readings for Introductory Sociology** Kimberly McGann, 2021-03-03 This brief anthology for introductory sociology is a collection of 24 short readings that illustrate key concepts in sociology, relate to the everyday lives of students, and spark good classroom discussions. The selections represent four theoretical traditions in sociology (functionalism, symbolic interaction, conflict theory, feminism) and show the range and diversity of sociology and the people who practice it. The book is designed for instructors who want to expose students to some original scholarship in their first sociology course, but who do not want to adopt a comprehensive reader along with the core text they are using.

**Global Feminist Autoethnographies During COVID-19** Melanie Heath, Akosua Darkwah, Josephine Beoku-Betts, Bandana Purkayastha, 2022-01-26 Global Feminist Autoethnographies bears witness to our displacements, disruptions, and distress as tenured faculty, faculty on temporary contracts, graduate students, and people connected to academia during COVID-19. The authors document their experiences arising within academia and beyond it, gathering narratives from across the globe—Australia, Canada, Ghana, Finland, India, Norway, South Africa, the United Kingdom, the United States along with transnational engagements with Bolivia, Iran, Nepal, and Taiwan. In an era where the older rules about work and family

related to our survival, wellbeing, and dignity are rapidly being transformed, this book shows that distress and traumas are emerging and deepening across the divides within and between the global North and South, depending on the intersecting structures that have affected each of us. It documents our distress and trauma and how we have worked to lift each other up amidst severe precarities. A global co-written project, this book shows how we are moving to decolonize our scholarship. It will be of interest to an interdisciplinary array of scholars in the areas of intersectionality, gender, family, race, sexuality, migration, and global and transnational sociology.

**Sociology** David M. Newman, 2010 This carefully edited companion anthology provides provocative, eye-opening examples of the practice of sociology in a well-edited, well-designed, and affordable format. It includes short articles, chapters, and excerpts that examine common everyday experiences, important social issues, or distinct historical events that illustrate the relationship between the individual and society. The new edition will provide more detail regarding the theory and/or history related to each issue presented. The revision will also include more coverage of global issues and world religions.

*The Real World* Kerry Ferris, Jill Stein, 2018 In every chapter, Ferris and Stein use examples from everyday life and pop culture to draw students into thinking sociologically and to show the relevance of sociology to their relationships, jobs, and future goals. Data Workshops in every chapter give students a chance to apply theoretical concepts to their personal lives and actually do sociology.

**Interdisciplining Digital Humanities** Julie Thompson Klein, 2015-01-05 Interdisciplining Digital Humanities sorts through definitions and patterns of practice over roughly sixty-five years of work, providing an overview for specialists and a general audience alike. It is the only book that tests the widespread claim that Digital Humanities is interdisciplinary. By examining the boundary work of constructing, expanding, and sustaining a new field, it depicts both the ways this new field is being situated within individual domains and dynamic cross-fertilizations that are fostering new relationships across academic boundaries. It also accounts for digital reinvigorations of “public humanities” in cultural heritage institutions of

museums, archives, libraries, and community forums.

The Presentation of Self in Everyday Life Erving Goffman, 2022-05-05 Acclaimed on first publication and today considered one of the defining works of the sociology, *The Presentation of the Self in Everyday Life* is Erving Goffman's extraordinary analysis of the structure of our social interactions. Blurring the line between workaday life and theatrical performance, Goffman argues that our behaviour with others is defined by how we wish to be perceived - resulting in displays bearing a startling similarity to those of an actor on the stage. From the houses and clothes that we use as 'fixed props' to the 'backstage' of the solitude in which our personas are rehearsed and relaxed, Goffman's insight reveals human character to be not fixed or stable, but liquid and consciously maintained.

**Reading the Graphic Surface** Glyn White, 2005 The immediate purpose of this book is to construct a vocabulary for the literary study of graphic textual phenomena. -- introd.

**Theater as Data** Miguel Escobar Varela, 2021-08-02 In *Theater as Data*, Miguel Escobar Varela explores the use of computational methods and digital data in theater research. He considers the implications of these new approaches, and explains the roles that statistics and visualizations play. Reflecting on recent debates in the humanities, the author suggests that there are two ways of using data, both of which have a place in theater research. Data-driven methods are closer to the pursuit of verifiable results common in the sciences; and data-assisted methods are closer to the interpretive traditions of the humanities. The book surveys four major areas within theater scholarship: texts (not only playscripts but also theater reviews and program booklets); relationships (both the links between fictional characters and the collaborative networks of artists and producers); motion (the movement of performers and objects on stage); and locations (the coordinates of performance events, venues, and touring circuits). *Theater as Data* examines important contributions to theater studies from similar computational research, including in classical French drama, collaboration networks in Australian theater, contemporary Portuguese choreography, and global productions of Ibsen. This overview is complemented by short descriptions of the author's own work in the computational analysis of theater practices in Singapore and Indonesia. The author ends by considering the future of computational theater research, underlining the importance of open data and digital sustainability practices, and encouraging readers to consider the benefits of learning to code. A web companion offers illustrative data, programming tutorials, and videos.

**The Digital Humanities and Literary Studies** Martin Paul Eve, 2022 A short introduction and overview of developing intersections between digital methods and literary studies that offers the best starting place for those who wish to learn more about the possibilities, but also the limitations, of the digital humanities in the literary space.

The Evolution of International Security Studies Barry Buzan, Lene Hansen, 2009-08-27 *International Security Studies* (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the

development of the subject in that period. It explains how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation across its diversity, and gives an authoritative account of debates on all the main topics within ISS. This is an unparalleled survey of the literature and institutions of ISS that will be an invaluable guide for all students and scholars of ISS, whether traditionalist, 'new agenda' or critical.

**Post-Digital Cultures of the Far Right** Maik Fielitz, Nick Thurston, 2018-12-12 How have digital tools and networks transformed the far right's strategies and transnational prospects? This volume presents a unique critical survey of the online and offline tactics, symbols and platforms that are strategically remixed by contemporary far-right groups in Europe and the US. It features thirteen accessible essays by an international range of expert scholars, policy advisors and activists who offer informed answers to a number of urgent practical and theoretical questions: How and why has the internet emboldened extreme nationalisms? What counter-cultural approaches should civil societies develop in response?
