A Contemporary Concept of Monetary Sovereignty Claus D. Zimmermann,2013-11-07 Monetary sovereignty is a crucial legal concept dictating that states have sovereignty over their own monetary, financial, and fiscal affairs. However, it does not feature as part of any key instruments of international law, including the Articles of Agreement of the International Monetary Fund. Rather, it has remained a somewhat separate notion, developed under contemporary international law from an assertion of the former Permanent Court of International Justice in 1929. As a consequence of globalization and increasing financial integration and a worldwide trend towards the creation of economic and monetary unions, the principle of monetary sovereignty has undergone significant change. This book examines this evolution in detail, and provides a conceptual framework to demonstrate what this means for the legal and economic challenges faced by the international community. The book examines the historic origins and evolution of the concept of monetary sovereignty, putting it into the context of broader concepts of sovereignty. It argues that monetary sovereignty remains relevant as a dynamic legal concept with both positive and normative components. It investigates the continuing hybridization of international monetary law resulting from changes to its formal and material sources. It then examines the complex phenomenon of exchange rate misalignment under international monetary and trade law, and the increasing regionalization of monetary sovereignty, notably in light of the European sovereign debt crisis. Finally, it assesses the role the concept of monetary sovereignty can play in the reorganization of international finance following the recent global financial crisis.

Broadening Financial Indicators in the Special Data Dissemination Standard International Monetary Fund,2010-02-22 In December 2008, the IMF Executive Board discussed the Seventh Review of Data Standards Initiatives, and Directors requested staff to return to the Board within about a year with a proposal for the inclusion of selected financial

indicators in the Special Data Dissemination Standard (SDDS). This paper responds to the 2008 request taking into account recent developments. The recent financial crisis has heightened the need for policymakers, financial regulators and capital market participants to put in place conditions that would help prevent the occurrence of similar crises in the future. One of the areas identified by the international community as key in crises prevention is the availability of timely and more detailed financial data that could provide early warning signals of impending risks and vulnerabilities

Near-Coincident Indicators of Systemic Stress Mr.Ivailo Arsov,Mr.Elise Canetti,Ms.Laura E. Kodres,Ms.Srobona Mitra,2013-05-17 The G-20 Data Gaps Initiative has called for the IMF to develop standard measures of tail risk, which we identify in this paper with systemic risk. To understand the conditions under which tail risk is present, it is first necessary to develop a measure of what constitutes a systemic stress, or tail, event. We develop such a measure and uses it to assess the performance of eleven near-term systemic risk indicators as ‘early’ warning of distress among top financial institutions in the United States and the euro area. Two indicators perform particularly well in both regions, and a couple of other simple indicators do well across a number of criteria. We also find that the sizes of institutions do not necessarily correspond with their contribution to spillover risk. Some practical guidance for policies is provided.

Islamic Feminisms Roja Fazaeli,2016-11-10 This book explores the contentious topic of women’s rights in Muslim-majority countries, with a specific focus on Iran and the Iranian women’s movement from 1906 to the present. The work contextualizes the authorial self through the use of personal narrative and interviews. A new critique of Islamic law is produced through an in-depth study of the Iranian Constitution, civil and criminal codes. The work presents a novel reconceptualization of the term Islamic feminism by revisiting the arguments of various scholars and through analysis of interviews with Iranian women’s rights activists. It is contended that the feminist movements can play a critical role in Islamic law reform and consequently the eventual implementation of international human rights law in Muslim-majority countries. What emerges from this study is not only a feminist critique of two major regimes of law, but also the identification of possibilities for reform in the future. The study transitions from the Iranian national context to the international by way of

a comparative legal study of international human rights laws and Islamic laws. The book will appeal both to academics and human rights practitioners.

And They Left... Lubin Doe, 2022-04-14 This book will appeal to the curiosity of people interested in the movements of the Ewe population from ancient Egypt to its present location straddling three Western African countries, namely Benin (formerly Dahomey), Togo, and Ghana (formerly Gold Coast). The book also highlights the saga of an Anlo couple fleeing from the mysterious death of their children in Tegbi, a coastal Ghanaian village, the origin of the husband. It chronicles social, religious, and political life in the late 1800s and early 1900s in Mission Tove, a Togolese hamlet where husband and wife ultimately settled and begat their two surviving children. A window is also opened into the life of the descendants of one of these children representing the ninth generation of Togbi Atsu Madokpui Wenya, the leader of the Ewes who founded the Anlo community in the Gold Coast.

Changes in the Sheep Industry in the United States National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on the Economic Development and Current Status of the Sheep Industry in the United States, 2008-10-26 The U.S. sheep industry is complex, multifaceted, and rooted in history and tradition. The dominant feature of sheep production in the United States, and, thus, the focus of much producer and policy concern, has been the steady decline in sheep and lamb inventories since the mid-1940s. Although often described as an industry in decline, this report concludes that a better description of the current U.S. sheep industry is an industry in transition.

Financial Sector Surveillance and the IMF Carlo Gola, Francesco Spadafora, 2009-11-01 The global financial crisis has magnified the role of Financial Sector Surveillance (FSS) in the Fund's activities. This paper surveys the various steps and initiatives through which the Fund has increasingly deepened its involvement in FSS. Overall, this process can be characterized by a preliminary stage and two main phases. The preliminary stage dates back to the 1980s and early 1990s, and was mainly related to the Fund's research and technical assistance activities within the process of monetary and financial deregulation embraced by several member countries. The first official phase of the Fund's involvement in FSS started in the aftermath of the Mexican crisis, and relates to the international call to include financial sector issues among the core areas of Fund surveillance. The second phase focuses on the objectives of bringing the coverage of financial sector issues up to par with the coverage of other traditional core areas of surveillance, and of integrating financial analysis into the Fund's analytical macroeconomic framework. By urging the Fund to give greater attention to its member countries' financial systems, the international community's response to the global crisis may mark the beginning of a new phase of FSS.
